How Ordinary People Make Aid Work Stefan Kruse, 2025-10-07 How community organizations and civic engagement drive the success of global health aid What makes health related development assistance truly effective In *How Ordinary People Make Aid Work* Stefan Kruse argues that the answer lies in the power of ordinary citizens By examining the role of community organizations and social movements Kruse challenges conventional approaches to aid showing that true accountability requires more than institutional reforms or participatory spaces that offer citizens a seat at the table Through rigorous analysis and compelling case studies the book reveals how traditional forms of exercising voice especially in politically challenging contexts drive the success of donor funded health projects Kruse demonstrates that reducing infant mortality since the 1990s owes more to an engaged citizenry than to formal accountability mechanisms Surprisingly state capacity and democratic institutions show little effect on the success of health aid once citizen involvement is accounted for By bridging macroeconomic studies of aid effectiveness with research on political behavior these findings underscore the indispensable role of civic engagement in building resilient health systems

How Ordinary People Make Aid Work critiques the limitations of traditional top down development models and advocates for empowering communities to lead their own progress It highlights how social ties and collective action equip citizens to oversee health projects and create sustainable solutions to public health challenges Offering fresh insights for policymakers development practitioners and scholars this book redefines what it takes to make aid truly impactful

Feminisms in Development Andrea Cornwall, Elizabeth Harrison, Ann Whitehead, 2008-02-29 This collection of essays by leading feminist thinkers from North and

South constitutes a major new attempt to reposition feminism within development studies. Feminism's emphasis on social transformation makes it fundamental to development studies. Yet the relationship between the two disciplines has frequently been a troubled one. At present the way in which many development institutions function often undermines feminist intent through bureaucratic structures and unequal power quotients. Moreover the seeming intractability of inequalities and injustice in developing countries have presented feminists with some enormous challenges. Here emphasizing the importance of a plurality of approaches the authors argue for the importance of what feminisms have to say to development. Confronting the enormous challenges for feminisms in development studies this book provides real hope for dialogue and exchange between feminisms and development. Administrative Law and Governance in Asia Tom Ginsburg, Albert H.Y. Chen, 2008-10-30 This book examines administrative law in Asia exploring the profound changes in the legal regimes of many Asian states that have taken place in recent years. Political democratization in some countries economic change more broadly and the forces of globalization have put pressure on the developmental state model wherein bureaucrats governed in a kind of managed capitalism and public private partnerships were central. In their stead a more market oriented regulatory state model seems to be emerging in many jurisdictions with emphases on transparency publicity and constrained discretion. This book analyses the causes and consequences of this shift from a socio legal perspective showing clearly how decisions about the scope of administrative law and judicial review have an important effect on the shape and style of government regulation. Taking a comparative approach individual chapters trace the key developments in the legal regimes of major states across Asia including China Japan Korea Malaysia Taiwan Hong Kong Indonesia Singapore the Philippines Thailand and Vietnam. They demonstrate that in many cases Asian states have shifted away from traditional systems in which judges were limited in terms of their influence over social and economic policy towards regulatory models of the state involving a greater role for judges and law like processes. The book also considers whether judiciaries are capable of performing the tasks they are being given and assesses the profound consequences the judicialization of governance is starting to have on state policy making in Asia. *Being a Teacher in Post-Apartheid South Africa* Yusuf Sayed, Marcina Singh, 2025-05-01 In a compelling exploration of the challenges faced by newly qualified teachers NQTs in South Africa's evolving educational landscape this book provides an empirically grounded account of their experiences. The book acts as a crucial platform for the voices of NQTs shedding light on the myriad enablers and disablers they encounter during this transformative period. Timely and relevant it tackles pressing questions about the readiness of teacher education to prepare students for the demands of South African schools. The book

charts the transition from teacher education to active teacher for NQTs The lessons distilled from this research present a clarion call for a re assessment of teacher education policies and practices This book arrives at a pivotal moment as South Africa reviews its teacher education policies With the quality of initial teacher education programmes under scrutiny the book s critiques findings and recommendations serve as indispensable tools for policymakers arguing for the need to reconceptualise South African teacher education policies As South Africa strives to avoid a cycle of developing new teachers only to lose them due to inadequate support this book seeks to support educators policymakers and all those invested in the future of South African education toward creating a more socially just education system recognising the highly unequal society in which teachers work
