Close Relationship Loss Terri L. Orbuch, 2012-12-06 Social scientists from various disciplines have been increasingly concerned with the nature structure and function of close relationships Although most of the early work on the topic of close relationships drew attention to the development of close relationships since the mid 1970s researchers have begun to investigate the many different aspects connected to the loss of close relationships Despite the change to a more comprehensive conceptual framework close relationship research is often criticized for being atheoretical the research is criticized for being purely descriptive in nature and thus lacking a more theoretical framework Contrary to this belief I wish to argue that researchers in the area of close relationship loss employ

several critical and prominent theoretical perspectives to describe explain and understand the endings of relationships thus the fruition of this book The major aim of this edited book is to present and illuminate within one volume some of these major theoretical perspectives The volume as a whole has several unique qualities First within each chapter the authors provide a general overview of the theoretical perspective or approach within which they examine close relationship loss **Creating Optimal Relationships** Kathryn Elliott,, James Elliott,2015-10-30 Recent relationship science research finds that intense satisfying romantic love is a real phenomenon occurring in couples Creating Optimal Relationships Use of the Voltage Concept with Couples provides the field of marriage and family therapy with the first model for assisting couples to sustain bliss for a lifetime The voltage concept based on over forty years of clinical research uses a skills based approach from Anthetic Relationship Therapy By providing psychodynamic skills for facilitating each partner s psychological growth the psychological infrastructure is then achieved for supporting optimal relating skills The voltage concept presents a useful dichotomy of closeness levels to which partners aspire Couples who want a more surface relationship fit a Low Voltage Relationship model marked by less emotional intensity With such couples minimal skills can be taught to reduce any conflict that brought them to therapy High Voltage couples desire great emotional depth and receive skills to help them achieve it Perhaps even more valuable the voltage vocabulary equips clinicians and partners in understanding a common source of couple conflict that is the voltage mismatch The book offers options for treatment when a voltage discrepancy exists in the couple **General characteristics** Michael Baker Jr., Inc,1964 **Genome Data Analysis** Ju Han Kim,2019-04-30 This textbook describes recent advances in genomics and bioinformatics and provides numerous examples of genome data analysis that illustrate its relevance to real world problems and will improve the reader s bioinformatics skills Basic data preprocessing with normalization and filtering primary pattern analysis and machine learning algorithms using R and Python are demonstrated for gene expression microarrays genotyping microarrays next generation sequencing data epigenomic data and biological network and semantic analyses In addition detailed attention is devoted to integrative genomic data analysis including multivariate data projection gene metabolic pathway mapping automated biomolecular annotation text mining of factual and literature databases and integrated management of biomolecular databases The textbook is primarily intended for life scientists medical scientists statisticians data processing researchers engineers and other beginners in bioinformatics who are experiencing difficulty in approaching the field However it will also serve as a simple guideline for experts unfamiliar with the new developing subfield of genomic analysis within bioinformatics **Relationships First** Andy Akrouche,2015-01-09 It is no secret that the majority of complex business arrangements fail to achieve their objectives in the long run Structured as transactions or deals the contract parties become hostage to fixed performance based models and change order processes that drive adversarial behaviour and limit innovation and industrial benefit which further widen the contract divide It is time for stakeholders to begin working together to establish and manage insight based adaptive

relationships that foster innovation create change and enable evolution These relationships must be built on respect alignment mutuality transparency and joint governance It is also time for policy and procurement regimes to recognize and support the relationship as the pivotal point at which delivery and performance are conducted measured and evolved
