Liliane Voyé,Jaak Billiet,1999 What are the relations between sociology and the different religions Christianity with its various branches Judaism Islam Oriental religions sects and New Religious Movements That is the question which this work conceived on the occasion of the XXVth Conference of the International Society for the Sociology of Religion Soci t Internationale de Sociologie des Religions SISR wishes to clarify The book retraces the varied and troubled history of these relations and also reveals how in opening up its research to other religions besides the Christian sociology is forced to redefine the very object of its field of study What is the religious This question which until recently was considered impertinent informs this book throughout If confronts the necessity of rethinking theories and methodological approaches which constructed in the context of 19th and early 20th century Western Europe prove to be rather inadequate for encompassing contemporary religious phenomena and religious manifestations in other contexts To these new theoretical and methodological demands is added for the sociologist a deontological imperative which takes on all the more importance

Sociological Trespasses

James Aho,2011-05-05 Racism collective violence sickness environmental catastrophe body obsession greed and accelerated life concern everyone They are also the subject matter of this book Here however they are not viewed as social problems to be solved by technical experts Instead they are viewed as products of the joint transference of aspects of ourselves onto objects independent of ourselves More specifically they emerge from conviction there is something out there say a nation an enemy time money the environment a medical cure a bodily orifice the mouth or genitals a significant individual or an anonymous public etc the advancement of accumulation of defeat of management of or obeisance to can complete us secure us fill us stabilize us or in some other way enable us to escape from or deny our lack our existential precariousness or death Sociological Trespasses attempts to disillusion readers of this conviction This is not done for itself but to create space for imagining new horizons of lived possibility such as tolerance of human difference simplicity slowness care and wakefulness

The Location of Religion Kim Knott,2015-08-12 The ways in which humans interact with their location is an important topic within sociological studies of religion It is integral to the place of religion in secular society *The Location of Religion A Spatial Analysis* offers an overview of the ways in which religion can be located within social cultural and physical space It examines contemporary spatial theory notably the work of the influential sociologist Henri Lefebvre and the many disciplines that have contributed to the spatial study of religion This volume will be invaluable to all those interested in the role of religion in spatial analysis

Mapping the Academic Debate Johannes Duschka,Christoph Kleine,Monika

Wohlrab-Sahr, Florian Zemmin, 2024-12-16 This volume maps the international academic debate on secularity It places seminal contributions from within Western academia alongside less well known texts from various parts of the world in several cases this is the first time that they have been translated into English The volume demonstrates that the academic debate on secularity was and is a global debate with contributions from many regions The collected texts relate to each other either directly or indirectly by referring to similar arguments whether reinforcing or criticising them and thus create a discourse When speaking of global secularity we therefore do not insinuate a uniform world secularity resulting from the alleged global diffusion of Western norms ideas and concepts It is rather a web of relations that is constituted via various different references These references are not evenly distributed the development in the West is often the point of reference to which positions from other regions relate to which they connect or from which they distance themselves But the references are not completely unidirectional We also present texts from Europe that underline the multidirectionality of the process even early on Thereby the volume offers the reader the material with which to trace these global exchanges and references

Global Pentecostalism: An Inquiry Into the Cultural Dimensions of Globalization Matthias Deininger, 2013-05-24 The rapid global expansion of Pentecostal Christianity is one of the most striking religious phenomena in our contemporary world Today Pentecostalism is by no means some marginal or peculiar denomination within world Christianity It is not simply a niche product in the global religious market but the most dynamic and fastest growing religious movement within the contemporary Christian world From Singapore over Brazil to Ghana Pentecostal Christians are historically and presently rooted in many cultural contexts throughout the world As such Pentecostalism is a religious movement that is both shaped by globalization processes but also a major contributor to the globalization of religion Until recently social scientific approaches to Christianity have often been informed by a rather selective understanding of Christianity stressing its ascetic components premised on a body spirit dualism and seeing its importance mainly as a harbinger of secular modernity Hence where Christianity was studied outside the West it has usually been peripheral and viewed as an alien intrusion undermining local cosmologies However rather than a religious rejection of the world Pentecostalism accommodates to the world and modernity It transcends locality by promulgating a universal imaginary of the world while at the same time incorporating itself successfully into the socio cultural contexts of any new cultures it encounters The fundamental fluidity of the transnational Pentecostal network is conducive for its flexibility to react on the enormous upheavals and changes in a globalized world and to accommodate to them in constructive ways Thus Pentecostalism can be regarded as a paradigmatic case of a glocalised religion it has the ability to adapt itself to local conditions while maintaining and preserving its distinct religious features at the same time This study focuses on the different theoretical attempts made to explain the massive global expansion of Pe

The Pragmatics of Defining Religion Platvoet, Arie Molendijk, 2018-11-13 This volume promotes a pragmatic anti essentialist and anti hegemonic

approach to the problem of the definition of religion It argues that definitions of religion are context bound strategies for pursuing a variety of purposes extra academic as well as academic Religions being immensely varied complex and multi functional phenomena they need to be studied by several academic disciplines from many different perspectives It is therefore legitimate and useful that many definitions of religions are developed The volume has contributions from scholars in Philosophy of Religion the Comparative Study of Religions Anthropology of Religion Sociology of Religion and Psychology of Religion It has chapters on the polemics of defining religion in modern contexts the history of the concept of religion and the methodology of its definition it includes several definition proposals
