Religion And Psychological Studies Mapping The Terrain:

Religion and Psychology Diane Jonte-Pace, William B. Parsons, 2002-09-26 Religion and Psychology is a thorough and incisive survey of the current relationship between religion and psychology from the leading scholars in the field This is an essential resource for students and researchers in the area of psychology of religion Issues addressed are The Psychology Theology Dialogue The Psychology Comparativist Dialogue Psychology Religion and Gender Studies Psychology as Religion Social Scientific Approaches to the Psychology of Religion The Empirical Approach International Perspectives *Religion and Psychology* Diane Jonte-Pace, William B. Parsons, 2002-09-26 This work is a survey of the current state of the relationship between religion and psychology from the leading scholars in the field

Roads of Excess, Palaces of Wisdom Jeffrey J. Kripal, 2001-12 William Blake once wrote that The road of excess leads to the palace of wisdom Inspired by these poetic terms Jeffrey J Kripal reveals how the works of scholars of mysticism are often rooted in their own mystical experiences roads of excess which can both lead to important insights into these scholars works and point us to our own palaces of wisdom In his new book Kripal addresses the twentieth century study of mysticism as a kind of mystical tradition in its own right with its own unique histories discourses sociological dynamics and rhetorics of secrecy Fluidly combining autobiography and biography with scholarly exploration Kripal takes us on a tour of comparative mystical thought by examining the lives and works of five major historians of mysticism Evelyn Underhill Louis Massignon R C Zaehner Agehananda Bharati and Elliot Wolfson as well as relating his own mystical experiences The result Kripal finds is seven palaces of wisdom the religious power of excess the necessity of distance in the study of mysticism the relationship between the mystical and art the dilemmas of male subjectivity and modern heterosexuality a call for ethical criticism the paradox of the insider outsider problem in the study of religion and the magical power of texts and their interpretation An original and penetrating analysis of modern scholarship and scholars of mysticism Roads of Excess Palaces of Wisdom is also a persuasive demonstration of the way this scholarly activity is itself a mystical phenomenon

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental und standings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow

for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult

Integrating Psychology, Religion, and Culture Jenny H. Pak, 2020-12-15 Although science was originally broadly conceptualized as a systematic rigorous activity to produce trustworthy knowledge psychologists adopted a single philosophy of science and strictly enforced natural science as the only proper scientific psychology Qualitative research has been part of modern psychology from the beginning but it was obscured for nearly a century as positivist epistemology came to dominate the field Building culturally robust and intelligible theories capable of responding more effectively to complex problems faced by a rapidly changing world calls for openness in methodological diversity Deeply rooted in a hermeneutic tradition cultural psychology has challenged the appropriateness of seeking reductive knowledge because higher mental processes such as religious beliefs values and choices are bound by historical and cultural context As greater interdisciplinary integration and methodological innovations are necessary to keep psychology of religion relevant narrative inquiry has emerged as a promising integrative paradigm

The Oxford Handbook of New Religious Movements James R Lewis, 2008-07-17 The Oxford Handbook of New Religious Movements both covers the current state of the field and breaks new ground Its contributors drawn from both sociology and religious studies are leading figures in the study of NRMs

Sacred Science? Simen Andersen Øyen, Tone Lund-Olsen, Nora Sørensen Vaage, 2012-05-19 Science and religion are often viewed as dichotomies But although our contemporary society is often perceived as a rationalization process we still need broad metaphysical beliefs outside of what can be proven empirically Rituals and symbols remain at the core of modern life Do our concepts of science and religion require revitalization Can science itself be considered a religion a belief or an ideology Science's authority and prestige allows for little in the way of alternate approaches not founded in empirical science It is not unusual to believe that technology and science will solve the world's fundamental problems Has truth been colonized by science Have scientific disciplines become so specialized and operationally closed that they have constructed barriers to other disciplines as well as the general public The writers of this book set out to investigate whether the symbols of academia may in some cases take on a quality of sacrality whether the rule of experts can be said to have the character of a priesthood of knowledge whether religion has a place in scientific contexts and a selection of other questions concerning science and its relations to religious belief

Religion and Society in Sub-Saharan Africa and Southern Asia Carole Rakodi, 2019-03-18 This book analyses how religion is entangled in people's lives in Sub-Saharan Africa and southern Asia It provides an introduction to the teachings practices and values promoted by the main religious traditions in these regions and an overview of the evidence on what religion means to people in terms of their beliefs and religious practices and how it influences their values attitudes and day to day relationships with others especially their families Over the course of the book Carole Rakodi explores similarities

and differences between and within religious traditions and identifies some of the key factors that influence and explain the roles played by religion in people's personal lives and social relationships. A separate companion volume will go on to focus on the social and political roles and relationships of religious groups and organisations. This book will be of great interest to academics and students working in a range of disciplines especially sociology, religious studies and development studies but also anthropology, geography and area studies. *Mystical Encounters with the Natural World* Paul Marshall, 2005-07-07

Some experiences of the natural world bring a sense of unity, knowledge, self-transcendence, eternity, light and love. This is the first detailed study of these intriguing phenomena. Paul Marshall explores the circumstances, characteristics and after-effects of this important but relatively neglected type of mystical experience and critiques explanations that range from the spiritual and metaphysical to the psychoanalytic, contextual and neuropsychological. The theorists discussed include R. M. Bucke, Edward Carpenter, W. R. Inge, Evelyn Underhill, Rudolf Otto, Sigmund Freud, Aldous Huxley, R. C. Zaehner, W. T. Stace, Steven Katz and Robert Forman, as well as contemporary neuroscientists. The book makes a significant contribution to current debates about the nature of mystical experience. *Terror and Triumph* Anthony B. Pinn, 2022-07-26. Given the unique history of African Americans and their diverse religious flowering in Black Christianity, the Nation of Islam, voodoo and others, what is the heart and soul of African American religious life? As a leader in both Black religious studies and theology, Anthony Pinn has probed the dynamism and variety of African American religious expressions. In this work based on the Edward Cadbury Lectures at the University of Birmingham, England, he searches out the basic structure of Black religion, tracing the Black religious spirit in its many historical manifestations. Pinn finds in the terrors of enslavement of Black bodies and subsequent oppressions the primal experience to which the Black religious impulse provides a perennial and cumulative response. Oppressions entailed the denial of personhood and creation of an object: the negro. Slave auctions, punishments and later lynchings created an existential dread but also evoked a quest, a search for complex subjectivity or authentic personhood that still fuels Black religion today. In this 20th anniversary edition of Pinn's groundbreaking work, the author offers a new reflection on the argument in retrospect and invites a panel of five contemporary scholars to examine what it means for current and future scholarship. Contributors include Keri Day, Sylvester Johnson, Anthony G. Reddie, Calvin Warren and Carol Wayne White.
