Royal Gardens:

Royal Gardens of the World Mark Lane, 2020-09-24 A sumptuous exploration of 21 of the world's most celebrated royal gardens from the formal splendour of Versailles to the organic sustainable Highgrove. In mainland Europe you can journey from the formal splendour of Het Loo in the Netherlands and Fontainebleau in France to the Baroque World Heritage Site of the Royal Palace of Caserta in Southern Italy. Further afield still lies the Taj Mahal in India and the Peterhof Palace in Russia. Each featured garden will include the history, plantings and evolution of the garden as well as plant portraits of key plants and information about the design and layout of each. Countries included are England, Scotland, Germany, France, Italy, Spain, Austria, the Czech Republic, the Netherlands, Sweden, Denmark, Russia, India, Bali and Japan. This inspiring global selection of royal gardens is a perfect gift for any gardening enthusiast or armchair traveller and takes the reader on a journey of architecturally significant houses and their classic gardens as well as providing planting ideas that range from modest to grand, simple to ornate.

The Sigiriya Royal Gardens Nilan Cooray, 2012-10-19 Besides the efforts that are of a descriptive and celebrative nature, studies related to Sri Lanka's historical built heritage largely view material remains in historical, sociological, socio-historical and semiological perspectives. There is hardly any serious attempt to view such material remains from a technical analytical approach to understand the compositional aspects of their design. The 5th century AC royal complex at Sigiriya is no exception in this regard. The enormous wealth of information and the material remains unearthed during more than 100 years of field-based research by several generations of archaeologists provide an ideal opportunity for such analysis. The Sigiriya Royal Gardens fills the gap in research related to Sri Lanka's historical built heritage in general and to Sigiriya in particular. Therefore, the present research attempts to read Sigiriya as a landscape architectonic design to expose its architectonic composition and design instruments. Elysium Britannicum, Or the Royal Gardens John Evelyn, 2001. Interlacing in his work practical, literary and philosophical approaches to landscape architecture, Evelyn created the first large-scale encyclopedic work on the science and art of gardening. **BOOK JACKET**

Gardens are a type of landscape art created by the hands of human beings. Chinese gardens are not only one of China's traditional cultural treasures but they are also a unique charm of human cultural heritage. Literati gardens occupy an essential position among Chinese gardens, one of the three major genres of gardens in the world. The reason why literati gardens occupy an important position in classical Chinese gardens and even in the entire system of traditional Chinese culture and art lies in their exquisite architecture, exotic flowers and whimsical stones available for the exploration and appreciation of the literati. More significantly, gardens have provided a venue of daily life, academic writings, artistic creation, social gatherings and other cultural activities for ancient Chinese scholars.
