Rudolf Steiner, 2004-11 The soul s immortality and its repeated earthly births are not new ideas in Western thought They are implicit in the Pythagorean and Platonic traditions as well as in some branches of esoteric Judaism and Cabbala But it was not until the early years of this century that the West was given a detailed modern evolutionary philosophy of human life based on the reality of reincarnation and karma This turning point occurred when Rudolf Steiner began to make public the results of his spiritual scientific researches He viewed the revelation of reincarnation and karma as one of his most important life tasks

Steiner's contribution however remains unique in its understanding of the human being as an evolving developing being of body soul and spirit. On the basis of his researches presented in numerous books and lectures we begin to understand how the complex interaction of human lives between birth and death and between death and a new birth gives new meaning not only to individual lives lived on Earth in community with others but also to human history and evolution and to earthly and cosmic events. This book collects many of Steiner's major statements on reincarnation and karma. The primary purpose of this volume is to help readers meet the challenge of spiritual research in the area of individual evolution of the soul and spirit in the context of cultural and universal evolution. Such a study can be tremendously revealing and provide spiritual understanding in a time of increasing intellectual confusion and spiritual poverty. The notion of reincarnation and karma is generally associated in most minds with spiritual traditions of the East especially Hinduism and Buddhism. Ren Querido's in depth sixty page introduction however places these concepts within the context of Western spiritual development and esoteric tradition showing us a panoramic view of how such ideas have developed over the centuries in the West.

The Education of the Child and Early Lectures on Education Rudolf Steiner, 1996. It is necessary for human beings to remember not only what they already understand but to come to understand what they already know that is what they have acquired by memory in the way the child acquires language. In a certain sense understanding things through concepts should proceed from the stored up treasures of the memory. The more children know in memory before they begin to understand through intellectual concepts the better. p 31. As early as 1884 while tutoring a boy with special needs Steiner began a lifelong interest in applying spiritual knowledge to the practical aspects of life. Steiner originally published the essay at the core of this book in 1907. It represents his earliest ideas on education in which he lays out the soul spiritual processes of human development describing the need to understand how the being of a child develops through successive births beginning with the physical body's entry into earthly life and culminating in the emergence of the I being with adulthood. Also included are several early lectures on education ranging from 1906 to 1911 well before the birth of the Waldorf movement in 1919.

The Pictorial World of the Child Maureen Cox, 2005-11-17. This lavishly illustrated book gives a comprehensive and scholarly account of children's understanding and appreciation of art and their developing ability to produce their own pictures. It discusses the main influences on children's picture making and considers the intriguing question does children's art follow the same pattern of development as the history of art. As well as discussing the artistic development of typically developing children the book also includes a discussion of children with intellectual disabilities and those with a talent for art some of whom are children with autism.

Steiner Education, 1998. **The Essentials of Education** Rudolf Steiner, 1997. Delivered in April 1924 during an educational conference these five lectures are the last public lectures that Steiner gave in Germany. E A K Stockmeyer writes Seventeen hundred people listened to him and the prolonged generous applause from this great crowd at the end of every lecture was deeply moving while at the end of the last lecture the applause became an

ovation that seemed as if it would never end back cover

We live in a time of multiple challenges to our rights and freedoms not only in authoritarian regimes but also in liberal democracies around the globe As the storm clouds of crisis gather Rudolf Steiner's social vision now a century old offers a clear way forward Radical in his time and still so today Steiner's social threefolding is not conceived as a logical system Rather his picture of society as a living threefold unity as a social organism is an artistic insight that needs to be grasped imaginatively To understand its three dimensions the economic the political legal and cultural spiritual spheres and how they relate to each other is to experience them inwardly This requires a living creative thinking that is able to enter the archetypal forces behind the concepts a modern day truly Goethean approach to the social sciences In an illuminating study Hoffmann's dynamic presentation enables us to develop precisely such an artistic imaginative understanding of the threefold social organism He achieves this through clear descriptions of its principles and practical governance whilst offering wise advice regarding the adaptation of education at school and tertiary levels for a threefold society
