Capitalist Diversity on Europe's Periphery Dorothee Bohle, Bela Greskovits, 2012-08-15 With the collapse of the Council for Mutual Economic Assistance in 1991 the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future Capitalism they found was not a single set of political economic relations Rather they each had to decide what sort of capitalist nation to become In *Capitalist Diversity on Europe's Periphery* Dorothee Bohle and Bela Greskovits trace the form that capitalism took in each country the assets and liabilities left behind by socialism the transformational strategies embraced by political and technocratic elites and the influence of transnational actors and institutions They also evaluate the impact of three regional shocks the recession of the early 1990s the rolling global financial crisis that started in July 1997 and the political shocks that attended EU enlargement in 2004 Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political

economy neoliberal embedded neoliberal and neocorporatist The Baltic states followed a neoliberal prescription low controls on capital open markets reduced provisions for social welfare The larger states of central and eastern Europe Poland Hungary and the Czech and Slovak republics have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy Slovenia has proved to be an outlier successfully mixing competitive industries and neocorporatist social inclusion Bohle and Greskovits also describe the political contention over such arrangements in Romania Bulgaria and Croatia A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis

Europe Undivided Milada Anna Vachudova, 2005-02-17 Europe Undivided analyzes how an enlarging EU has facilitated a convergence toward liberal democracy among credible future members of the EU in Central and Eastern Europe It reveals how variations in domestic competition put democratizing states on different political trajectories after 1989 and how the EU's leverage eventually influenced domestic politics in liberal and particularly illiberal democracies In doing so Europe Undivided illuminates the changing dynamics of the relationship between the EU and candidate states from 1989 to 2004 and challenges policymakers to manage and improve EU leverage to support democracy ethnic tolerance and economic reform in other candidates and proto candidates such as the Western Balkan states Turkey and Ukraine Albeit not by design the most powerful and successful tool of EU foreign policy has turned out to be EU enlargement and this book helps us understand why and how it works

Mapping Versatile Boundaries Regis Darques, 2016-09-10 This book demonstrates the pivotal role played by state confines in the geography of Balkan countries through powerful GIS and remote sensing analyses It provides unique mapping perspectives on the Balkan region with over 140 illustrations The book is dedicated to applied historical and economic geographers as well as political scientists Because of its high fragmentation the Balkan area has not been studied on a systematic transnational basis The persistence of frozen and or open conflicts has also turned the border issue into an absolute taboo subject for the scientific community and civil society This results in an apparent chaos that most Western observers fail to understand

The Logic of Regional Integration Walter Mattli, 1999-05-20 In the late 1980s regional integration emerged as one of the most important developments in world politics It is not a new phenomenon however and this 1999 book presents an analysis of integration across time and across regions Walter Mattli examines projects in nineteenth and twentieth century Europe but also in Latin America North America and Asia since the 1950s Using the tools of political economy he considers why some integration schemes have succeeded while many others have failed what forces drive the process of integration and under what circumstances outside countries seek to join Unlike traditional political science approaches the book stresses the importance of market forces in determining the outcome of integration but unlike purely economic analyses it also highlights the impact of institutional factors The book will provide students of political science economics and European studies with a framework

for the study of international cooperation **Materializing Europe** A. Badenoch, A. Fickers, 2010-10-27 This book explores the relationships between European integration and material infrastructures Taking transnational infrastructures as the focal point of study the book focuses on the various forms of mediation between the material institutional and discursive levels of European integration and fragmentation in a truly transnational perspective **Roadmap to the Virginia SOL** Laura Schaefer, Princeton Review (Firm), 2005 Roadmap to the Virginia SOL EOC Virginia and United States History includes strategies that are proven to enhance student performance The experts at The Princeton Review provide content review of the crucial material most likely to appear on the test detailed lessons complete with test taking techniques for improving test scores 2 complete practice Virginia SOL EOC Virginia and United States History tests **The Oxford Handbook of International Law and Development**, 2023-11-11 Since the mid twentieth century international law and international development have become two of the most prominent secular languages through which aspirations about a better world are articulated They have shaped the both the treatment and self understanding of the developing world often by positing the West as a universal model against which developing states their citizens and natural environments should be measured and disciplined In recent years however critical scholars have investigated the deep linkages between the concept of development the doctrines and institutions of international law and broader projects of ordering at the international level They have shown how the leading models de radicalise if not derail initiatives to redefine development and pursue other forms of global well being Bringing together scholars from both the Global South and the Global North the contributions in this Handbook invite readers to consider the limits of common normative and developmentalist assumptions At the same time the Handbook demonstrates how disparate but still identifiable set of ideas imaginaries norms and institutional practices related to law development and international governance shape today s profoundly unequal material conditions threatening the future of human and nonhuman life on the planet The book focuses on five distinct areas existing disciplinary frameworks institutions and actors regional theatres of international law and development competing social and economic agendas and alternative futures Offering a unique overview of the field of international law and development and assembling major critical historical and political economic insights this Handbook is an unmissable resource for scholars of international law international relations development studies and global history as well as anyone interested in the past present and future of our world **Labour and Social Issues Arising from Problems of Cross-border Mobility of International Drivers in the Road Transport Sector**, 2006 Examines labour and social issues arising from problems of cross border mobility of international drivers in the road transport sector with an emphasis on promoting HIV AIDS prevention non discrimination visa issues improving the efficiency and effectiveness of cross border road transport operations and the living and working conditions of international drivers *Europe road atlas & travel guide 2026* Kaelen Drayvorn, 2025-08-27 For today s modern traveler the dream of a European road trip often collides with the overwhelming complexity of planning across

Thomson, 2003-01-01 Of the ten Central and Eastern European countries that have applied for membership in the European Union Romania ranks among the largest and most impoverished Romania represents the final

challenge in the European Union's enlargement to the east largely due to its major but underdeveloped agriculture and food sectors. The agriculture industry, which is a major component of the national economy, extends its pervasive influence to both Romanian social life and environment. Consequently, the transition towards a market-oriented economic system will pose new obstacles for the country's farmers, processors, traders, and policymakers. While identifying the impediments that surround Romanian agriculture and its inevitable progression towards transition is a simple task, the challenges lie in recommending solutions. Through careful analysis of numerous recent studies on reform policies in the Romanian agri-food sector during its economic transition, this comprehensive examination offers perspicacious suggestions and insights on the following topics in particular: international trade, credit for agricultural development, price policies, and rural development. The conclusions reached are not only of domestic importance and application; they are also of immediate relevance for many post-socialist countries for which the agri-food sector is a principal vehicle for rural development. *Bulgaria* Jonathan Bousfield, Dan Richardson, 2002. This guide to this little-known but deeply rewarding country includes comprehensive accounts of all the sights from the capital Sofia to the time-warped villages and wayside monasteries. It includes practical advice on outdoor pursuits, the best hikes, ski centres, and Black Sea beaches, plus a run-down on all the folk festivals and informed commentaries on Bulgaria's turbulent history.
