Saint Under Stress:

Crop Production under Stressful Conditions Makie Kokubun, Shuichi Asanuma, 2018-08-01 This book presents field studies on crop production in developing countries such as Vietnam Kenya Namibia Colombia Afghanistan and Sudan Further it examines the achievements of SATREPS a development assistance program sponsored by the Japanese government that promotes international joint research to address these global issues In this context multidisciplinary research teams consisting of breeders physiologists soil scientists agronomists and other scientists related to agricultural development worked together to tackle the challenges involved in enhancing the capacity of crop production in the respective regions In addition to presenting novel scientific findings this book highlights practical field studies that verify the effectiveness of the scientific findings in actual environments The achievements will help to improve crop production worldwide and the lessons learnt will be useful in re designing strategies to address global issues in crop production particularly in developing regions Lastly the outcomes discussed will be useful to policymakers and professionals engaged in crop production and food security in developing countries as well as researchers and students

Recent Advances of Plant Root Structure and Function Otilia Gasparíková, Slovak Academy of Sciences Dr. Milada Ciamporova, Igor Mistrík, F. Baluska, 2001-07-31 This book provides a comprehensive and interactive view of recent advances in the cytology anatomy and physiology of roots as presented at the 5th International Symposium on Structure and Function of Roots held on 31 August 4 September 1998 in Star Lesn Slovakia This edition differs from previous ones by including some aspects of functional genetics and plant morphogenesis The book is intended to serve both students and researchers as a valuable source of updated information ideas and concepts dealing with the most fundamental questions of development and function of plant roots

Photosynthesis: Mechanisms and Effects Gyözö Garab, 2012-12-06 Photosynthesis is a process on which virtually all life on Earth depends To answer the basic questions at all levels of complexity from molecules to ecosystems and to establish correlations and interactions between these levels photosynthesis research perhaps more than any other discipline in biology requires a multidisciplinary approach Congresses probably provide the only forums where progress throughout the whole field can be overviewed The Congress proceedings give faithful pictures of recent advances in photosynthesis research and outline trends and perspectives in all areas ranging from molecular events to aspects of photosynthesis on the global scale The Proceedings Book a set of 4 or 5 volumes is traditionally highly recognized and intensely quoted in the literature and is found on the shelves of most senior scientists in the field and in all major libraries

Redox-Signaling in Neurodegenerative Diseases: Biomarkers, Targets, and Therapies Andreia Neves Carvalho,Luciano Saso,Jack Van Horsen,Vasco Branco,2023-05-16 Redox homeostasis results from the balance between the production of reactive species e g ROS RNS etc and their detoxification by endogenous or exogenous antioxidants ROS play several important physiological roles however their excessive production or impaired detoxification is associated with oxidative stress and cellular injury Importantly oxidative damage to vulnerable central nervous system CNS cells is a common pathological feature of several neurodegenerative diseases Antioxidants have been considered as attractive potential therapeutic agents to prevent or halt disease progression but the clinical efficacy of antioxidant treatment strategies is still marginal Improvement of antioxidant therapy effectiveness might involve adjustment

of preclinical to clinical settings and development of new efficient delivery methods and will require a more in depth knowledge of cellular redox signaling mechanisms Promising novel redox based therapeutic strategies are gaining relevance to combat oxidative stress associated with neurodegenerative diseases These include boosting the endogenous antioxidant machinery through activation of the antioxidant master regulator Nrf2 nuclear factor erythroid 2 related factor 2 or modulation of ROS production by NOX nicotinamide adenine dinucleotide phosphate NADPH oxidase inhibitors Redox regulation of key cellular functions is currently recognized as an important cellular signaling mechanism and events such as post translational modifications e g S glutathionylation S nitrosylation glycosylation etc play important roles in redox signal transduction and might be instrumental to uncover pathological mechanisms and identify novel therapeutic targets in neurodegenerative diseases This Research Topic focuses on redox signaling mechanisms and aims to provide novel insights into the role of redox signaling with particular emphasis on redox regulation involving post translational modifications in the pathophysiology of neurodegenerative diseases Moreover it aims to present an overview of the potential of antioxidants as therapeutics for CNS disorders with a special focus on emerging novel therapeutic redox based strategies We are particularly interested in studies addressing new redox based molecular mechanisms contributing to neurodegenerative diseases exploring the role of naturally occurring compounds standard medications and nutraceuticals with antioxidant properties in modulating redox signaling pathways and limiting and or preventing oxidative damage associated with these disorders addressing mechanistically the role of post translational modifications in the pathophysiology of neurodegenerative disorders

and extensively revised Procedural chapters have been enhanced with additional concepts and illustrations particularly the hemodynamic and catheterization chapters Clinical questions have been revamped new questions have been added including a new 259 question section at the end of the book Practical Cardiovascular Medicine Second Edition is an ideal reference for the resident fellow cardiologist and any professional treating patients with cardiovascular disease *Machinery* Fred Herbert Colvin, Lester Gray French, 1928 **Theory of Gearing** Stephen P. Radzevich, 2012-07-19 The first book of its kind Theory of Gearing Kinematics Geometry and Synthesis systematically develops a scientific theory of gearing that makes it possible to synthesize novel gears with the desired performance Written by a leading gearing expert who holds more than 200 patents it presents a modern methodology for gear design The proposed theory is based on a key postulate all the design parameters for an optimal gear pair for a particular application can be derived from a given configuration of the rotation vectors of the driving and driven shafts and b the power transmitted by the gear pair This allows engineers to synthesize the desired gear pairs with only the following input information The rotation and torque on the driving shaft The configuration of the driven shaft in relation to the driving shaft The desired rotation and torque of the driven shaft Beginning with the fundamentals the book reconsiders the basic theory of kinematics and geometry of gears to provide a sound basis for the evaluation and development of future designs It then examines ideal and real gearing for parallel axis intersected axis and crossed axis gearing The book addresses how to minimize vibration and noise in gears discusses aspects of implementing the theory of gearing and analyzes principal features of power transmission and the loading of gear teeth More than 500 figures clearly illustrate the principles This is an invaluable resource for engineers and researchers who work in gear design gear production and the application of gears as well as for students in mechanical and manufacturing engineering Covering all known gear designs this book offers an analytical solution to the problem of designing optimal gear pairs for any given application It also encourages researchers to further develop the theory of gearing
