Agricultural and Pastoral Landscapes in Pre-Industrial Society Fèlix Retamero, Inge Schjellerup, Althea Davies, 2014-12-01 Through a series of case studies this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre industrial communities in the construction of varied landscapes and cultural heritage Landnam from the Old Norse for taking of land deals with

colonization including the drivers and processes through which colonizers developed an understanding of the productive potential and limitations of their new lands

Fields and field systems Field walls are a distinctive and apparently timeless characteristic of many pre industrial farming landscapes but they present many the challenges to their study such as the effects of plowing abandonment and land use change and of urban development in fertile lowland zones which may eradicate reduce or conceal past systems of land use and division The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modeling approaches emphasized

Agro pastoralism focuses on the complex time space adaptations devised for managing cultivation and livestock production particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources The contributions focus on mountainous areas where temporary migrations in the form of transhumance provided access to a diversity of resources based around seasonal constraints on their availability and productivity *Highlanders* James MacKillop, 2024-01-04

types of nations and states former empires monarchies republics pre modern modern or post imperial entities deploy and prioritise different types of museums based on art archaeology culture and ethnography in their making this book constitutes the first comprehensive and comparative perspective on national museums in Europe and their intricate relationship to the making of nations and states

Exploring Prehistoric Identity in Europe Victoria Ginn, Rebecca Enlander, Rebecca Crozier, 2014-03-19 Identity is relational and a construct and is expressed in a myriad of ways For example material culture and its pluralist meanings have been readily manipulated by humans in a prehistoric context in order to construct personal and group identities Artefacts were often from or reminiscent of far flung places and were used to demonstrate membership of an imagined regional or European community Earthworks frequently achieve maximum visual impact through elaborate ramparts and entrances with the minimum amount of effort indicating that the construction of identities were as much in the eye of the perceiver as of the perceived Variations in domestic architectural style also demonstrate the malleability of identity and the prolonged intermittent use of particular places for specific functions indicates that the identity of place is just as important in our archaeological understanding as the identity of people By using a wide range of case studies both temporally and spatially these thought processes may be explored further and diachronic and geographic patterns in expressions of identity investigated

No Stone Unturned Robert A Dodgshon,2015-05-19 A survey of how Highland society organised its farming communities exploited its resource base and interacted with its environment from prehistory to 1914 Border Straddling Heritages Ali Mozaffari,David C. Harvey,2025-11-01 The twin effects of ever increasing mobility and rising globalization have done much to dislodge formerly stable social relations and our sense of time and place In this exacting and geographically wide ranging reassessment of the overlap between borders and heritage Ali Mozaffari and David C Harvey interrogate how this hyperglobalization has simultaneously challenged and intensified notions of sovereignty and nationality Ranging from the impact of empathy in border heritage work to the Europeanization of war heritage narratives and border heritage complexes in the Middle East this volume illuminates the methodological implications of viewing heritage as both an engagement with the borders of the past and an activity that continually creates them The Origins of the British: The New Prehistory of Britain Stephen Oppenheimer,2012-03-01 British prehistory will never look the same again Professor Colin Renfrew University of Cambridge Stephen Oppenheimer s extraordinary scientific detective story combining genetics linguistics archaeology and historical record shatters the myths we have come to live by It demonstrates that the Anglo Saxon invasions contributed just a tiny fraction 5% to the English gene pool Two thirds of the English people reveal an unbroken line of genetic descent from south western Europeans arriving long before the first farmers The bulk of the remaining third arrived between 7 000 and 3 000 years ago as part of long term north west European trade and immigration especially from Scandinavia and may have brought with them the earliest forms of English language As for the Celts the Irish Scots and Welsh history has traditionally placed their origins in Iron Age Central Europe Oppenheimer s genetic synthesis tells a different story There is indeed a deep divide between the English and the rest of the British But as this book reveals the division is many thousands of years older than previously thought Be prepared to have all your cherished notions of English history and Britishness swept away Clive Gamble **A History of the Modern British Ghost Story** S. Hay,2011-10-27 Ghost stories are always in conversation with novelistic modes with which they are contemporary This book examines examples from Sir Walter Scott Charles Dickens Henry James and Rudyard Kipling amongst others to the end of the twentieth century looking at how they address empire class property history and trauma *The Land of Prehistory* Alice Beck Kehoe,2015-12-22 First published in 1998 The Land of Prehistory reveals the powerful ideological function American

archaeology has naively served from the discipline's construction in Victorian societal reform movements to the present Alice Beck Kehoe chronicles major movements and influences such as the support of racist Spencerian evolutionism and Manifest Destiny ideologies and the 1960s New Archaeology pandering to Big Science money She concludes with a discussion of the recent revolutionary shift to multicultural voices within the field
