Service Quality Measurement: Issues and Perspectives Lewlyn L. R. Rodrigues, 2013-05-22 This book is very useful for it is not just descriptive in its nature but prescriptive too It is descriptive in the sense that it describes the process of developing or using a metric in a problem situation and prescriptive as it clearly prescribes how a beginner can put the theory into practice In this globalized economy maintaining quality of products and services has been the thrust area of interest among academicians and practitioners Today there are quite a good number of books and research articles available Nevertheless service quality measurement has always posed problems particularly in the context of service industries due to the difficulty in the measurement of the intangibles and implied needs of the customers The research literature is filled with articles on how to quantify the services and there are several streams of arguments on the choice of the most ideal approach However the research gap lies in the answer to the question Do these measurement instruments concur in their measurement outcomes or do they give different results in the same situation This book primarily makes an attempt to answer this question through a case study approach Even though there are several instruments for the measurement of service quality the two most widely used instruments are SERVQUAL and SERVPERF metrics Comprehensively this book explains the systematic procedure of using both the instruments in a service sector and further the procedure for conducting a statistical analysis so that one will be able to apply the same in any service sector It then takes the reader through a series of tests in order to compare the two metrics and to prove statistically if there is the same outcome in a problem situation The results are sure to surprise the reader and trigger the research bent of mind to undertake a similar study of such metrics and gain mastery over performing an independent research with very minimal guidance from a professional gu

Service Quality : an Introduction Barton, Joan A, Marson,

D. Brian, Service Quality B.C., 1991 **Delivering Quality Service** Valarie A. Zeithaml, 2010-05-11 Excellence in customer service is the hallmark of success in service industries and among manufacturers of products that require reliable service But what exactly is excellent service It is the ability to deliver what you promise say the authors but first you must determine what you can promise Building on seven years of research on service quality they construct a model that by balancing a customer's perceptions of the value of a particular service with the customer's need for that service provides brilliant theoretical insight into customer expectations and service delivery For example Florida Power Light has developed a sophisticated computer based lightning tracking system to anticipate where weather related service interruptions might occur and strategically position crews at these locations to quicken recovery response time Offering a service that customers expect to be available at all times and that they will miss only when the lights go out FPL focuses its energies on matching customer perceptions with potential need Deluxe Corporation America's highly successful check printer regularly exceeds its customers expectations by shipping nearly 95% of all orders by the day after the orders were received Deluxe even put U S Postal Service stations inside its plants to speed up delivery time Customer expectations change over time To anticipate these changes Metropolitan Life Insurance Company regularly monitors the expectations and perceptions of their customers using focus group interviews and the authors 22 item generic SERVQUAL questionnaire which is customized by adding questions covering specific aspects of service they wish to track The authors groundbreaking model which tracks the five attributes of quality service reliability empathy assurance responsiveness and tangibles goes right to the heart of the tendency to overpromise By comparing customer perceptions with expectations the model provides marketing managers with a two part measure of perceived quality that for the first time enables them to segment a market into groups with different service expectations *A Handbook for Measuring Customer Satisfaction and Service Quality* Morpace International, Transit Cooperative Research Program, 1999 This handbook focuses on how to measure customer satisfaction and how to develop transit agency performance measures It will be of interest to transit managers market research and customer service personnel transit planners and others who need to know about measuring customer satisfaction and developing transit agency performance measures The handbook provides methods on how to identify implement and evaluate customer satisfaction and customer defined quality service FCC Record United States.
