Toward a Civil Society C. David Lisman,1998-08-30 Addressing the need for marshaling the resources of education to help promote a more civil society this book argues that education has a critical role to play in challenging the dominant views of politics and education Service learning or academically based community service is seen as a promising educational pedagogy that can help students acquire civic virtue and serve as a mechanism to enable institutions of higher education become stronger community partners However there is currently is a lack of theoretical grounding for the service learning movement consequently service learning is in danger of being co opted by academic traditionalism which could vitiate service learning s social transformative potential and in fact undermine efforts at democratic revitalization The author provides a basic explanation of service learning and how it is connected to promoting civic virtue It examines the underlying public philosophy debate between weak and strong democracy theorists or procedural and civic republicanism This book argues that certain approaches to service learning such as the voluntarist or charity model the experiential education model and the justice model are ineffective because of their association with weak democracy theory or procedural republicanism The central argument of this book is that a progressive communitarian public philosophy maintaining that individuals attain meaning and significance in the context of community is the most appropriate grounding for service learning The School Community Journal ,2001 **Resources in Education** ,2000-10 Culturally Engaging Service-Learning With Diverse Communities Delano-Oriaran, Omobolade O.,Penick-Parks, Marguerite W.,Fondrie, Suzanne,2017-09-13 Evaluating the experiences of racially marginalized and underrepresented groups is vital to creating equality in society Such actions have the potential to provoke an interest in universities to adopt high impact pedagogical practices that attempt to eliminate institutional injustices Culturally Engaging Service Learning With Diverse Communities is a pivotal reference source for the latest scholarly research on service learning models that recognize how systemic social injustices continue to pervade society Featuring extensive coverage on a broad range of topics and perspectives such as cultural humility oral histories and social ecology this book is ideally designed for scholars practitioners and students interested in engaging in thoughtful and authentic partnerships with diverse groups *The Inverted Classroom Model* Eva-Marie Großkurth,Jürgen Handke,2014-11-10 Only two years after its first run the Inverted Classroom Conference has become a familiar event at Marburg University Most conference participants not only knew about this digital teaching and learning scenario but were

experienced users and developers While during its predecessors most participants wanted to familiarize themselves with the central components of the Inverted Classroom Model the focus of the 3rd German Inverted Classroom Conference in 2014 to which this conference volume is dedicated was not only a discussion of variants of the model but also for the first time the inclusion of long term evaluations and aspects of student behavior This shift of emphasis is reflected in the contributions to this volume Even though all central aspects of the ICM content production and delivery testing and the in class phase are still addressed we can now find recommendations concerning digital material acquisition in class tuition the role of student tutors as well as first long term studies about ICM effects In general then the focus was much wider than that of the first two ICM conferences from a new and originally non familiar teaching and learning scenario to more general aspects of digitization of teaching and learning in the 21st century
