Setting Domestic Priorities Henry Aaron, Charles L. Schultze, 2010-12-01 In recent years workers earnings have hardly grown violence and crime have plagued the inner cities homelessness and public begging have become commonplace and family life has greatly deteriorated With governments facing large deficits and slowly growing revenues and public distrust in the efficiency of government and elected officials at all time highs the authors ask What can government do for you This book brings together a prominent group of experts to answer this critical question Edited by Henry Aaron and Charles L Schultze two of the nation s most noted and experienced economists the book focuses on the crucial domestic and social issues confronting America today Seven vital areas are discussed by the following contributors Henry Aaron on health care Gordon L Berlin and William McAllister on homelessness Linda R Cohen and Roger G Noll on research and development John J DiIulio Jr on crime Frank Levy and Richard J Murnane on education and training Isabel V Sawhill on children and families and Clifford M Winston and Barry P Bosworth on infrastructure In each problem area the authors use the results of research and analysis to identify existing or proposed governmental interventions that are likely to work as well as some that are likely to fail and some that need to be reformed They then present a budget proposal that not only pays for suggested changes in domestic policy but brings the budget into virtual balance in ten years

Growth with Equity Martin Neil Baily, Gary Burtless, Robert E. Litan, 2010-12-01 For nearly two decades the U S economy has been plagued by two disturbing economic trends the slowdown in the growth rates of productivity and average real wages and the increase in wage and income inequality The federal budget is in chronic deficit Imports have far exceeded exports for more than a decade American competitiveness has been a source of concern for even longer Many Americans worry that foreigners are buying up U S companies that the economy is losing its manufacturing base and that the gap between rich and poor is widening In this book three of the nation s most noted economists look at the primary reasons for these trends and assess which of the many suggestions for change in policy whether for increased tax incentives for investment education reform or accelerated research and development are likely to work and which may not work and could even hinder economic development The author s discuss a variety of issues connected with deindustrialization and diminished competitiveness distinguishing between problems that would be of real concern and those that should not They evaluate explanations for slow growth in aggregate productivity in the United States and its relation to slower growth in other industrialized countries They discuss the performance of the various sectors of the U S economy and systematically examine the evidence for and against the major proposals for correcting the adverse trends in productivity and inequity Growth With Equity clearly explains how the country can accomplish the challenge of accelerating growth and narrowing the gap that separates the rich from the poor While recognizing that some of their recommendations may be politically painful the authors stress the importance of adopting a purposeful long range policy to encourage growth ensure equity and reduce the government s equity
