Setting Domestic Priorities What Can Government Do:

Setting Domestic Priorities Henry Aaron, Charles L. Schultze, 2010-12-01 In recent years workers earnings have hardly grown violence and crime have plagued the inner cities homelessness and public begging have become commonplace and family life has greatly deteriorated With governments facing large deficits and slowly growing revenues and public distrust in the efficiency of government and elected officials at all time highs the authors ask What can government do for you This book brings together a prominent group of experts to answer this critical question Edited by Henry Aaron and Charles L Schultze two of the nation s most noted and experienced economists the book focuses on the crucial domestic and social issues confronting America today Seven vital areas are discussed by the following contributors Henry Aaron on health care Gordon L Berlin and William McAllister on homelessness Linda R Cohen and Roger G Noll on research and development John J DiIulio Jr on crime Frank Levy and Richard J Murnane on education and training Isabel V Sawhill on children and families and Clifford M Winston and Barry P Bosworth on infrastructure In each problem area the authors use the results of research and analysis to identify existing or proposed governmental interventions that are likely to work as well as some that are likely to fail and some that need to be reformed They then present a budget proposal that not only pays for suggested changes in domestic policy but brings the budget into virtual balance in ten years *Forum for Applied Research and Public Policy*, 1994 *Performance Measures for the Criminal Justice System* James Q. Wilson, 1994-12 Consist of 7 essays criminal justice performance measures for prisons measuring the performance of community corrections measuring police performance performance measures for the trial courts prosecution and public defense and more *Performance Measures for the Criminal Justice System*, 1993 A Discussion paper from the BJS Princeton Project *American Public Policy: Promise and Performance, 9th Edition* B. Guy Peters, 2012-10-16 Voting and elections may often be cited as the most entertaining aspect of political theatre however it is the arena of public policy that has the most direct impact on the lives of the citizenry And as we have seen played out in recent debates over healthcare reform policy changes can be dramatic sweeping and often hotly contested Known for providing a trusted and comprehensive overview of the policy process B Guy Peters returns with the ninth edition of *American Public Policy Promise and Performance* Beyond walking students through the governmental structures and policy making procedures Peters efficiently covers a wide swath of policy areas and then concludes with a look at both cost benefit analysis and ethical analysis Framed in context of the aftermath of the financial crisis and Great Recession the ninth edition considers how policy has been impacted by persistent unemployment and growing income inequality In addition Peters discusses the strain on education budgets increased oversight of financial activities fiscal policies meant to stimulate the economy and the political challenge of balancing the budget in light of increased public spending Growth with Equity Martin Neil Bailly, Gary Burtless, Robert E. Litan, 2010-12-01 For nearly two decades the U S economy has been plagued by two disturbing economic trends the slowdown in the growth rates of productivity and average

real wages and the increase in wage and income inequality The federal budget is in chronic deficit Imports have far exceeded exports for more than a decade American competitiveness has been a source of concern for even longer Many Americans worry that foreigners are buying up U S companies that the economy is losing its manufacturing base and that the gap between rich and poor is widening In this book three of the nation s most noted economists look at the primary reasons for these trends and assess which of the many suggestions for change in policy whether for increased tax incentives for investment education reform or accelerated research and development are likely to work and which may not work and could even hinder economic development The author s discuss a variety of issues connected with deindustrialization and diminished competitiveness distinguishing between problems that would be of real concern and those that should not They evaluate explanations for slow growth in aggregate productivity in the United States and its relation to slower growth in other industrialized countries They discuss the performance of the various sectors of the U S economy and systematically examine the evidence for and against the major proposals for correcting the adverse trends in productivity and inequity Growth With Equity clearly explains how the country can accomplish the challenge of accelerating growth and narrowing the gap that separates the rich from the poor While recognizing that some of their recommendations may be politically painful the authors stress the importance of adopting a purposeful long range policy to encourage growth ensure equity and reduce the government s equity

Race, Poverty, and American Cities John Charles Boger, Judith Welch Wegner, 1996-09-09

Precise connections between race poverty and the condition of America s cities are drawn in this collection of seventeen essays Policymakers and scholars from a variety of disciplines analyze the plight of the urban poor since the riots of the 1960s and the resulting 1968 Kerner Commission Report on the status of African Americans In essays addressing health care education welfare and housing policies the contributors reassess the findings of the report in light of developments over the last thirty years including the Los Angeles riots of 1992 Some argue that the long standing obstacles faced by the urban poor cannot be removed without revitalizing inner city neighborhoods others emphasize strategies to break down racial and economic isolation and promote residential desegregation throughout metropolitan areas Guided by a historical perspective the contributors propose a new combination of economic and social policies to transform cities while at the same time improving opportunities and outcomes for inner city residents This approach highlights the close links between progress for racial minorities and the overall health of cities and the nation as a whole The volume which began as a special issue of the North Carolina Law Review has been significantly revised and expanded for publication as a book The contributors are John Charles Boger Alison Brett John O Calmore Peter Dreier Susan F Fainstein Walter C Farrell Jr Nancy Fishman George C Galster Chester Hartman James H Johnson Jr Ann Markusen Patricia Meaden James E Rosenbaum Peter W Salsich Jr Michael A Stegman David Stoesz Charles Sumner Stone Jr William L Taylor Sidney D Watson and Judith Welch Wegner From Growth to Convergence F. Zhai, 2009-02-25 The economic landscape of Asia has transformed in the past two decades

Regional economies are linked and have achieved prosperity The region must now look to the future This book explores issues in Asia s long term development identifying conditions for sustained growth and income convergence *Making Schools Work* Eric A. Hanushek, 2010-12-01 Educational reform is a big business in the United States Parents educators and policymakers generally agree that something must be done to improve schools but the consensus ends there The myriad of reform documents and policy discussions that have appeared over the past decade have not helped to pinpoint exactly what should be done The case for investment in education is an economic one schooling improves the productivity and earnings of individuals and promotes stronger economic growth and better functioning of society Recent trends in schooling have however lessened the value of society s investments as costs have risen dramatically while student performance has stayed flat or even fallen The task is to improve performance while controlling costs This book is the culmination of extensive discussions among a panel of economists led by Eric Hanushek They conclude that economic considerations have been entirely absent from the development of educational policies and that economic reality is sorely needed in discussions of new policies The book outlines an improvement plan that emphasizes changing incentives in schools and gathering information about effective approaches Available research and analysis demonstrates that current central decisionmaking has worked poorly Concentrating on inputs such as pupil teacher ratios or teacher graduate degrees appears quite inferior to systems that directly reward performance Nonetheless since experience with such alternatives is very limited a program of extensive evaluation appears to be in order Attempts to institute radical change on the basis of currently available information involve substantial risks of failure Many people today find proposals such as charter schools expanded use of merit pay or educational vouchers to be appealing Yet there is little evidence of their effectiveness and widespread adoption of these proposals is sure to run into substantial problems of im

Hispanics in the United States David Engstrom, 2017-07-12 *Hispanics in the United States* represents a collective exploration providing a basic foundation of the information available to understand Hispanics in the United States and create an effective policy agenda Hispanics are projected to be the largest minority group in the United States in the twenty first century The contributions define an agenda which will be useful for students scholars service practitioners political activists as well as policy makers The opening essays define the diversity of the Hispanic experience in America and put each of the other essays within a larger context This edition adds a new introduction by the editors incorporating and evaluating the implications of the results of the national 2000 census The book is organized into two sections the first establishes the historical demographic religious and cultural context of Hispanics in the United States The second describes the major issues facing this population in the American social structure specifically the areas of health care the labor market criminal justice social welfare and education The work concludes with a discussion of the role played by Hispanics in the political life of the nation The contributors all of whom are scholars with demonstrated competence in the areas include Teresa A Sullivan David Maldonado Melissa Roderick Barry Chiswick Michael Hurst Zulema

Suarez Alvin Korte Katie McDonough Cruz Reynoso and Christine Marie Sierra as well as David Engstrom and Pastora San Juan Cafferty Together they have produced a book which will be extremely useful to anyone developing public policies and creating social interventions at either the national or local levels during the coming decade This new edition is a valuable contributor to discussions about the issues defining the population that will be the largest minority group in the United States in this century

Homelessness in New York City Thomas J. Main, 2016-07-28 Can American cities respond effectively to pressing social problems Or as many scholars have claimed are urban politics so mired in stasis gridlock and bureaucratic paralysis that dramatic policy change is impossible *Homelessness in New York City* tells the remarkable story of how America's largest city has struggled for more than thirty years to meet the crisis of modern homelessness through the landmark development since the initiation of the Callahan v Carey litigation in 1979 of a municipal shelter system based on a court enforced right to shelter New York City now shelters more than 50 000 otherwise homeless people at an annual cost of more than 1 billion in the largest and most complex shelter system in the world Establishing the right to shelter was a dramatic break with long established practice Developing and managing the shelter system required the city to repeatedly overcome daunting challenges from dealing with mentally ill street dwellers to confronting community opposition to shelter placement In the course of these efforts many classic dilemmas in social policy and public administration arose Does adequate provision for the poor create perverse incentives Can courts manage recalcitrant bureaucracies Is poverty rooted in economic structures or personal behavior The tale of how five mayors Koch Dinkins Giuliani Bloomberg and de Blasio have wrestled with these problems is one of caution and hope the task is difficult and success is never unqualified but positive change is possible *Homelessness in New York City* tells the remarkable story of what happened for good and sometimes less good when New York established the right to shelter

Knowledge Capitalism Nico Stehr,2022-06-01 In his newest book Stehr builds on his classic book Knowledge Societies 1994 to expand the concept toward one of knowledge capitalism for a now much changed era It is not only because of the onset of the Covid 19 pandemic that we are living in a new epoch it is the idea that modern societies increasingly constitute comprehensive knowledge societies under intensive capitalism whereby the legal encoding of knowledge through national and international law is the lever that enables the transformation of the knowledge society into knowledge capitalism The Trade Related Aspects of Intellectual Property Rights agreement negotiated between 1986 and 1994 as part of the World Trade Organization is the backbone of the modern society and marks a clear historical demarcation and although knowledge capitalism is primarily an economic development the digital giants who are in the driver s seat have significant effects on the social structure and culture of modern society **Leviathan Transformed** Theodore Caplow,2002-01-16 The authors using these goals as a checklist found that each of the seven states performs well in some areas and badly in others They discovered that all states approached these goals in a style shaped by their own history and in particular by how they have been affected by the troubles of the twentieth century Their investigations offer a new informative way of looking at these nation states and detail the social and political conditions in each state Contributors include Theodore Caplow Salustiano Del Campo Royal Academy of Political and Social Science Madrid Nikolai Genov Bulgaria Academy of Sciences Karl Otto Hondrich Goethe University Simon Langlois Universit de Laval Alberto Martinelli University of Milan and Henri Mendras OFCE Paris *Cityscape* ,1994
