**The Post-traumatic Theatre of Grotowski and Kantor** Magda Romanska, 2014-10-01 Despite its international influence Polish theatre remains a mystery to many Westerners This volume attempts to fill in current gaps in English language scholarship by offering a historical and critical analysis of two of the most influential works of Polish theatre Jerzy Grotowski's Akropolis and Tadeusz Kantor's Dead Class By examining each director's representation of Auschwitz this study provides a new understanding of how translating national trauma through the prism of performance can alter and deflect the meaning and reception of theatrical works both inside and outside of their cultural and historical contexts

The Theatre of Death – The Uncanny in Mimesis Mischa Twitchin, 2016-10-20 This book is concerned with such questions as the following What is the life of the past in the present How might the theatre of death and the uncanny in mimesis allow us to conceive of the afterlife of a supposedly ephemeral art practice How might a theatrical iconology engage with such fundamental social relations as those between the living and the dead Distinct from the dominant expectation that actors should appear life like onstage why is it that some theatre artists from Craig to Castellucci have conceived of the actor in the image of the dead Furthermore how might an iconology of the actor allow us to imagine the afterlife of an apparently ephemeral art practice This book explores such questions through the implications of the twofold analogy proposed in its very title as theatre is to the uncanny so death is to mimesis and as theatre is to mimesis so death is to the uncanny Walter Benjamin once observed that The point at issue in the theatre today can be more accurately defined in relation to the stage than to the play It concerns the filling in of the orchestra pit The abyss which separates the actors from the audience like the dead from the living If the relation between the living and the dead can be thought of in terms of an analogy with ancient theatre how might avant garde theatre be thought of in terms of this same relation today

Symptoms of the Self Roberta Barker, 2023-01-04 Symptoms of the Self offers the first full study of one of the most paradoxically popular

figures in transatlantic theatre history the stage consumptive Consumption or tuberculosis remains one of the world's most deadly epidemic diseases in the nineteenth and early twentieth centuries in France Britain and North America it was a leading killer responsible for the deaths of as many as one in four members of the population Despite or perhaps because of their horrific experiences of tubercular mortality throughout the nineteenth and well into the twentieth century audiences in these same countries flocked to see consumptive characters love suffer and die onstage Beginning with the origins of the stage consumptive in Romantic era France and ranging through to the queer theatres of New York City in the 1970s this book explores famous plays such as *La dame aux camélias* Camille and *Uncle Tom's Cabin* alongside rediscovered sentimental dramas frontier melodramas and naturalistic problem plays It shows how theatre artists used the symptoms of tuberculosis to perform the inward emotions and experiences of the modern self and how the new theatrical vocabulary of realism emerged out of the innovations of the sentimental stage In the theatre the consumptive character became a vehicle through which for better and for worse standards of health beauty and virtue were imposed constructions of class gender and sexuality were debated the boundaries of nationhood were transgressed or maintained and an exceedingly fragile whiteness was held up as a dominant social ideal By telling the story of tuberculosis on the transatlantic stage *Symptoms of the Self* aims to uncover some of the wellsprings of modern Western theatrical practice and of ideas about the self that still affect the way human beings live and die

**A Century of Advancing Mathematics** Paul Zorn, 2015-08-23 The MAA was founded in 1915 to serve as a home for *The American Mathematical Monthly*. The mission of the Association to advance mathematics especially at the collegiate level has however always been larger than merely publishing world class mathematical exposition. MAA members have explored more than just mathematics; we have as this volume tries to make evident investigated mathematical connections to pedagogy, history, the arts, technology, literature, every field of intellectual endeavor. Essays all commissioned for this volume include exposition by Bob Devaney, Robin Wilson, and Frank Morgan; history from Karen Parshall, Della Dumbaugh, and Bill Dunham; pedagogical discussion from Paul Zorn, Joe Gallian, and Michael Starbird; and cultural commentary from Bonnie Gold, Jon Borwein, and Steve Abbott. This volume contains 35 essays by all star writers and expositors writing to celebrate an extraordinary century for mathematics: more mathematics has been created and published since 1915 than in all of previous recorded history. We've solved age old mysteries, created entire new fields of study, and changed our conception of what mathematics is. Many of those stories are told in this volume as the contributors paint a portrait of the broad cultural sweep of mathematics during the MAA's first century. Mathematics is the most thrilling, the most human area of intellectual inquiry you will find in this volume: compelling proof of that claim.

**The Proof Stage** Stephen Abbott, 2023-07-11 How playwrights from Alfred Jarry and Samuel Beckett to Tom Stoppard and Simon McBurney brought the power of mathematics to life on the stage. The discovery of alternate geometries, paradoxes of the infinite, incompleteness, and chaos theory revealed that despite its reputation for certainty, mathematical truth is not immutable, perfect, or even perfectible. Beginning in the last century, a handful of adventurous playwrights took inspiration from the fractures of modern mathematics to expand their own artistic boundaries. Originating in the early avant garde, mathematics infused theater reached a popular apex in Tom Stoppard's 1993 play *Arcadia*. In *The Proof Stage*, mathematician Stephen Abbott explores this unlikely collaboration of theater and mathematics. He probes the impact of mathematics on such influential writers as Alfred Jarry, Samuel Beckett, Bertolt Brecht, and Stoppard, and delves into the life and mathematics of Alan Turing as they are rendered onstage. The result is an unexpected story about the mutually illuminating relationship between proofs and plays, from Euclid and Euripides to Gödel and *Godot*. Theater is uniquely poised to discover the soulful human truths embedded in the austere theorems of mathematics, but this is a difficult feat. It took Stoppard twenty-five years of experimenting with the creative possibilities of mathematics before he succeeded in making fractal geometry and chaos theory integral to *Arcadia*'s emotional arc. In addition to charting Stoppard's journey, Abbott examines the post-*Arcadia* wave of ambitious works by Michael Frayn, David Auburn, Simon McBurney, Snoo Wilson, John Mighton, and others. Collectively, these gifted playwrights transform the great philosophical upheavals of mathematics into profound and sometimes poignant revelations about the human journey.
