Seven Steps To Nirvana Strategic Insights Into Ebusiness Transformation:

The Seven Steps to Nirvana: Strategic Insights into eBusiness Transformation Mohan Sawhney, Jeff Zabin, 2001-06-20

Today's most successful companies never sit still. Even as they introduce their newest e-business initiatives, their next generation of improvements is already near completion. Traditional organizations, especially larger low-tech businesses, must reinvent themselves if they are to hold their positions against these new business competitors. The Seven Steps to Nirvana leads managers through the systematic stages needed to transform traditional businesses, regardless of their industries, into fierce competitors. Combining hard-hitting analyses with case studies of businesses that made the transition, this concrete practical tour de force opens readers' minds to essential differences between e-commerce and e-business. The evolutionary stages of e-business intervention strategies to overcome inertia and organize for speed. Written by one of BusinessWeek's 25 most influential e-business innovators, *The Seven Steps to Nirvana* is a trove of innovative techniques for brick-and-mortar businesses to meet and overcome the challenges of today's faster, nimbler e-upstarts. *Managing (e)Business Transformation* Ali Farhoomand, M. Lynne Markus, Guy Gable, Shamza Khan, 2021-01-21

Managing e-Business Transformation comprises text and cases designed to show students how a business can be transformed into an internet-networked enterprise where IT infrastructures are used to link customers, suppliers, partners, and employees to create superior economic value. The book is written based on the premise that integrating internet technologies throughout the value chain is crucial to building and managing customer relationships. Importantly, it underscores the centrality of basic business and economic principles within the context of a networked environment. The book builds on established business and economic theories, concepts, and fundamentals to show that e-business will soon be synonymous with business. The book takes a strong managerial perspective, especially popular with MBA students, to argue that the internet is simply an enabling technology which allows firms to build the infrastructure needed to operate in an evolving business world. The application of theory concepts is emphasized throughout and contains a range of international case studies to enhance the learning experience. This book is a must for all students studying e-business strategy at undergraduate, MBA, and postgraduate level. Also available is a companion website with extra features to accompany the text. e-Transformation: Enabling New Development Strategies Nagy K. Hanna, 2009-11-11

Could information and communication technology (ICT) become the transformative tool for a new style of global development? Could ICT promote knowledge-based, innovation-driven and smart adaptive participatory development? As countries seek a way out of the present period of economic contraction, they are trying to weave ICT into their development strategies in the same way organizations have learned to use ICT to transform their business models and strategies. This integration offers a new path to development that is responsive to the challenges of our times. In *e-Transformation*, Nagy Hanna identifies the key ingredients for the strategic integration of ICT into national development with examples from around the world. He draws on his rich experience

of over 35 years at the World Bank and other aid agencies to outline the strategic options involved in using ICT to maximize developmental impact transforming public service institutions networking businesses for innovation and competitiveness and empowering communities for social inclusion and poverty reduction He identifies the key interdependencies in e transformation and offers a holistic framework to tap network effects and synergies across all elements of the process including leadership cyber policies institutions human resources technological competencies information infrastructure and ICT uses for government business and society Integrating analytical insights and practical applications across the fields of development political economy public administration entrepreneurship and technology management the author candidly argues that e transformation like all bold ideas faces implementation challenges In particular the aspiration reality gap needs to be systematically addressed if ICT enabled innovation and transformation is to become a development practice E transformation is first and foremost about thinking strategically and creatively about the options made possible by the information technology revolution in the context of globalization To this end the author provides tools and best practices designed to nurture innovation select entry points prioritize among competing demands and sequence and scale up He outlines the roles of all participants political managerial entrepreneurial social and technical whose leadership is essential for successful innovation
