El-Rouayheb, 2015-07-08 For much of the twentieth century the intellectual life of the Ottoman and Arabic Islamic world in the seventeenth century was ignored or mischaracterized by historians Ottomanists typically saw the seventeenth century as marking the end of Ottoman cultural florescence while modern Arab nationalist historians tended to see it as yet another century of intellectual darkness under Ottoman rule This book is the first sustained effort at investigating some of the intellectual currents among Ottoman and North African scholars of the early modern period Examining the intellectual production of the ranks of learned ulema scholars through close readings of various treatises commentaries and marginalia Khaled El Rouayheb argues for a more textured and text centered understanding of the vibrant exchange of ideas and transmission of knowledge across a vast expanse of Ottoman controlled territory [A History of Magic and Experimental](#)

nurtured the first Industrial Revolution Religion, Magic, and Science in Early Modern Europe and America Allison P. Coudert, 2011-10-17 This fascinating study looks at how the seemingly incompatible forces of science magic and religion came together in the 15th 16th and 17th centuries to form the foundations of modern culture As Religion Magic and Science in Early Modern Europe and America makes clear the early modern period was one of stark contrasts witch burnings and the brilliant mathematical physics of Isaac Newton John Locke s plea for tolerance and the palpable lack of it the richness of intellectual and artistic life and the poverty of material existence for all but a tiny percentage of the population Yet for all the poverty insecurity and superstition the period produced a stunning galaxy of writers artists philosophers and scientists This book looks at the conditions that fomented the emergence of such outstanding talent innovation and invention in the period 1450 to 1800 It examines the interaction between religion magic and science during that time the impossibility of clearly differentiating between the three and the impact of these forces on the geniuses who laid the foundation for modern science and culture **The New Cambridge Bibliography of English Literature** George Watson, Ian Roy Willison, 1974

English Population History from Family Reconstitution 1580-1837 E. A. Wrigley, 1997-07-24 This book uses data from 26 Anglican to provide information about fertility morality and nuptiality in the past Seventeenth-century Art & Architecture Ann Sutherland Harris, 2005 Encompassing the socio political cultural background of the period this title takes a look at the careers of the Old Masters and many lesser known artists The book covers artistic developments across six countries and examines in detail many of the artworks on display *Malleable Anatomies* Lucia Dacome, 2017-06-02 *Malleable Anatomies* offers an account of the early stages of the practice of anatomical modelling in mid eighteenth century Italy It investigates the mania for anatomical displays that swept the Italian peninsula and traces the fashioning of anatomical models as important social cultural and political as well as medical tools Over the course of the eighteenth century anatomical specimens offered particularly accurate insights into the inner body Being coloured soft malleable and often life size they promised to foster anatomical knowledge for different audiences in a delightful way But how did anatomical models and preparations inscribe and mediate bodily knowledge How did they change the way in which anatomical knowledge was created and communicated And how did they affect the lives of those involved in their production display viewing and handling Examining the circumstances surrounding the creation and early viewing of anatomical displays in Bologna and Naples *Malleable Anatomies* addresses these questions by reconstructing how anatomical modelling developed at the intersection of medical discourse religious ritual antiquarian and artistic cultures and Grand Tour display While doing so it investigates the development of anatomical modelling in the context of the diverse worlds of visual and material practices that characterized the representation and display of the body in mid eighteenth century Italy Drawing attention to the artisanal dimension of anatomical practice and to the role of women as both makers and users of anatomical models it considers how anatomical specimens lay at the centre of a composite world of social interactions which led to the fashioning

of modellers as anatomical celebrities Moreover it examines how anatomical displays transformed the proverbially gruesome practice of anatomy into an enthralling experience that engaged audiences senses *Travel Narratives, the New Science, and Literary Discourse, 1569-1750* Judy A. Hayden, 2016-03-03 The focus of this volume is the intersection and the cross fertilization between the travel narrative literary discourse and the New Philosophy in the early modern to early eighteenth century historical periods Contributors examine how in an historical era which realized an emphasis on nation and during a time when exploration was laying the foundation for empire science and the literary discourse of the travel narrative become intrinsically linked Together the essays in this collection point out the way in which travel narratives reflect the anxiety from changes brought about through the discoveries of the new knowledge and the way this knowledge in turn provided a new and more complex understanding of the expanding world in which the writers lived The worlds in this text are many for no world is monomial from the antipodes to the New World from the heavens to the seas and from fictional worlds to the world which contains and or constructs one s nation and empire All of these essays demonstrate the manner in which the New Philosophy dramatically changed literary discourse *The Ashgate Research Companion to Dutch Art of the Seventeenth Century* Wayne Franits, 2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public s ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently **A Culture of Fact** Barbara J. Shapiro, 2000 Shapiro traces the genesis of the fact a modern concept that originated not in natural science but in legal discourse She follows the concept s evolution and diffusion across a variety of disciplines in early modern England **Making Natural Knowledge** Jan Golinski, 2008-07-22 Arguably the best available introduction to constructivism a research paradigm that has dominated the history of science for the past forty years Making Natural Knowledge reflects on the importance of this theory tells the history of its rise to prominence and traces its most important tensions Viewing scientific knowledge as a product of human culture Jan Golinski challenges the traditional trajectory of the history of science as steady and autonomous progress In exploring topics such as the social identity of the scientist the significance of places where science is practiced and the roles played by language instruments and images Making Natural Knowledge sheds new light on the relations between science and other cultural domains A standard introduction to historically minded scholars interested in the constructivist programme In fact it has been called the constructivist s bible in many a conference corridor Matthew Eddy British Journal for the History of Science
