Seventy Five Years Of Service Cooperative Extension In Iowa:

The Rural Midwest Since World War II J. L. Anderson, 2014-02-01 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own

The Home Fronts of Iowa, 1939-1945 Lisa L. Ossian, 2009-10-16 As Americans geared up for World War II each state responded according to its economy and circumstances as well as the disposition of its citizens This book considers the war years in Iowa by looking at activity on different home fronts and analyzing the resilience of Iowans in answering the call to support the war effort With its location in the center of the country far from potentially threatened coasts Iowa was also the center of American isolationism historically Republican and resistant to involvement in another European war Yet Iowans were quick to step up and Lisa Ossian draws on historical archives as well as on artifacts of popular culture to record the rhetoric and emotion of their support Ossian shows how Iowans quickly moved from skepticism to overwhelming enthusiasm for the war and answered the call on four fronts farms factories communities and kitchens Iowa s farmers faced labor and machinery shortages yet produced record amounts of crops and animals even at the expense of valuable topsoil Ordnance plants turned out bombs and machine gun bullets Meanwhile communities supported war bond and scrap drives while housewives coped with rationing raised Victory gardens and turned to home canning The Home Fronts of Iowa 1939 1945 depicts real people and their concerns showing the price paid in physical and mental

exhaustion and notes the heavy toll exacted on Iowa's sons who fell in battle. Ossian also considers the relevance of such issues as race, class, and gender, particularly the role of women on the home front and the recruitment of both women and blacks for factory work, taking into account a prevalent suspicion of ethnic groups by the state's largely homogeneous population. The fact that Iowans could become loyal citizen soldiers, forming an Industrial and Defense Commission even before Pearl Harbor, speaks not only to the patriotism of these sturdy midwesterners but also to the overall resilience of Americans. In unraveling how Iowans could so overwhelmingly support the war, Ossian digs deep into history to show us the power of emotion and to help us better understand why World War II is consistently remembered as the Good War.

Gender and American Social Science Helene Silverberg, 2021-03-09 This collection of essays provides the first systematic and multidisciplinary analysis of the role of gender in the formation and dissemination of the American social sciences in the late nineteenth and early twentieth centuries. Other books have traced the history of academic social science without paying attention to gender or have described women's social activism while ignoring its relation to the production of new social knowledge. In contrast, this volume draws long overdue attention to the ways in which changing gender relations shaped the development and organization of the new social knowledge. And it challenges the privileged position that academic and mostly male social science has been granted in traditional histories by showing how women produced and popularized new forms of social knowledge in such places as settlement houses and the Russell Sage Foundation. The book's varied perspectives, building on recent work in history and feminist theory, break from the traditional view of the social sciences as objective bodies of expert knowledge. Contributors examine new forms of social knowledge rather than discourses about gender relations and as methods of cultural critique. The book will create a new framework for understanding the development of both social science and the history of gender relations in the United States. The contributors are Guy Alchon, Nancy Berlage, Desley Deacon, Mary Dietz, James Farr, Nancy Folbre, Kathryn Kish Sklar, Dorothy Ross, Helene Silverberg, and Kamala Visweswaran.

Loss,2014-04-07 This book tracks the dramatic outcomes of the federal government s growing involvement in higher education between World War I and the 1970s and the conservative backlash against that involvement from the 1980s onward Using cutting edge analysis Christopher Loss recovers higher education s central importance to the larger social and political history of the United States in the twentieth century and chronicles its transformation into a key mediating institution between citizens and the state Framed around the three major federal higher education policies of the twentieth century the 1944 GI Bill the 1958 National Defense Education Act and the 1965 Higher Education Act the book charts the federal government s various efforts to deploy education to ready citizens for the national bureaucratized and increasingly global world in which they lived Loss details the myriad ways in which academic leaders and students shaped and were shaped by the state s shifting political agenda as it moved from a preoccupation with economic security during the Great Depression to national security during World War II and the Cold War to securing the rights of African Americans women and other previously marginalized groups during the 1960s and 70s Along the way Loss reappraises the origins of higher education s current day diversity regime the growth of identity group politics and the privatization of citizenship at the close of the twentieth century At a time when people s faith in government and higher education is being sorely tested this book sheds new light on the close relations between American higher education and politics **The New Political Sociology of Science** Scott Frickel,Kelly Moore,2006-03-01 In the twenty first century the production and use of scientific knowledge is more regulated commercialized and participatory than at any other time The stakes in understanding those changes are high for scientist and nonscientist alike they challenge traditional ideas of intellectual work and property and have the potential to remake legal and professional boundaries and transform the practice of research A critical examination of the structures of power and inequality these changes hinge upon this book explores the implications for human health democratic society and the environment *Farmers Helping Farmers* Nancy K. Berlage,2016-07-11 One of the largest volunteer movements in the twentieth century local farm and home bureau organizations have been woefully underrepresented in socio political studies of the American Farm Bureau Federation Nancy K Berlage addresses this omission with an insightful look at how bureau members put university science to work in agricultural and rural life at the local level even while industrialization and urbanization profoundly shifted the landscape of labor in the U S In *Farmers Helping Farmers* Berlage explores how bureaus served as the locus of science based agriculture for rural communities Drawing on community bonds and culturally powerful metaphors to overcome skepticism bureaus played a critical role in circulating knowledge grounded in the new disciplines of

agricultural economics rural sociology home economics veterinary medicine child science and public health Throughout the book Berlage weaves a novel consideration of women's roles into the story of farm and home bureaus noting that these organizations served as places where supporters could grapple with issues beyond farming practices such as child welfare personal health and gender ideals They were also crucial in supporting the organization's underlying mission to strengthen community and family ties to the benefit of more efficient and productive farm In addition to bureau documents Berlage draws from cartoons films photographs and personal correspondence to add a human dimension this organizational history The resultant analysis offers a fresh look at the local bureaus social economic cultural and political functions and book highlights the organizations significant influence on American life in the early twentieth century **Handbook on**

Onuf, 2013 Pointing the way to a new history of the transformation of British subjects into American citizens State and Citizen challenges the presumption that the early American state was weak by exploring the changing legal and political meaning of citizenship The volume's distinguished contributors cast new light on the shift from

subjecthood to citizenship during the American Revolution by showing that the federal state played a much greater part than is commonly supposed. Going beyond master narratives celebratory or revisionist that center on founding principles, the contributors argue that geopolitical realities and the federal state were at the center of early American political development. The volume's editors, Peter Thompson and Peter S. Onuf, bring together political science and historical methodologies to demonstrate that citizenship was a political as well as a legal concept. The American state, this collection argues, was formed and evolved in a more dialectical relationship between citizens and government authority than is generally acknowledged. Suggesting points of comparison between an American narrative of state development previously thought to be exceptional and those of Europe and Latin America, the contributors break fresh ground by investigating citizenship in its historical context rather than by reference only to its capacity to confer privileges.
