organizations      **A Soldier and a Woman** Gerard J. De Groot, C. Peniston-Bird, 2014-07-30 The question of women's role in the military is extremely topical. A Woman and a Soldier covers the experiences of women in the military from the late mediaeval period to the present day. Written in two volumes, this comprehensive guide covers a wide range of wars: The Thirty Years War, the French and Indian Wars in Northern America, the Anglo Boer War, the First and Second World Wars, the Long March in China, and the Vietnam War. There are also thematic chapters including studies of terrorism and contemporary military service. Taking a multidisciplinary approach, historical, anthropological, and cultural, the book shows the variety of arguments used to support or deny women's military service and the combat taboo. In the process, the book challenges preconceived notions about women's integration in the military and builds a picture of the ideological and practical issues surrounding women soldiers.

*Transforming Managers* Roy Moodley, Stephen Whitehead, 2005-06-23 In the 1990s, considerable changes in the political and social world have impacted on the character of both public and private organizations. At a time of increased uncertainty and insecurity in these organizations, new ways of managing and being managed have emerged. Recognising that organizational life is partly reflective and determined by dominant social discourses, factors of gender will inevitably be central to the dynamics of organizational change. This book addresses theoretical ideas and mythologies in the examination of gendered organizations. The need to examine men in relation to family law and society in general is growing, and this book extends this interrogation to work and organizational life. It will be of interest to students in management studies, public sector management, and those involved in public policy making, as well as students and academics within gender studies and sociology.

*Social Identities* Steve Spencer, Gary Taylor, 2004-08-02 Social Identities argues that we have a collection of social selves and that our identities are influenced by such things as class, gender, sexuality, race, nationality, religious views, and by the media.

Gender, Power and Organisation Paula Nicolson, 2003-09-02 Work organisations have become a major site of gender politics for professional women and men over the last twenty years. There are more senior women today, but increased opportunities have not been gained without psychological consequences. Rather than catalogue the barriers to women's success, Paula Nicholson examines the problems they can face as a result. She re-examines the ways that patriarchal structures resist women's progress and how male success has psychological implications for women's sense of subjectivity, self-esteem, and gender identity, and how achieving against such odds has an impact on women's everyday lives.

*Developments in Sociology* Robert Burgess, Anne Murcott, 2014-06-11 Appropriate as a supplemental text to courses in Sociology, Providing an overview grounded in research, Developments in Sociology focuses on the major areas of theoretical, methodological, and substantive developments in sociology. Each author takes a field of study in which they are an acknowledged expert and highlights the way in which the subject has developed over the last fifty years.
