Reeve, 2020-07-15 Gothic Architecture and Sexuality in the Circle of Horace Walpole shows that the Gothic style in architecture and the decorative arts and the tradition of medievalist research associated with Horace Walpole 1717 1797 and his circle cannot be understood independently of their own homoerotic culture Centered around Walpole's Gothic villa at Strawberry Hill in Twickenham Walpole and his Strawberry Committee of male friends designers and dilettantes invigorated an extraordinary new mode of Gothic design and disseminated it in their own commissions at Old Windsor and Donnington Grove in Berkshire Lee Priory in Kent the Wyne in Hampshire and other sites Matthew M Reeve argues that the new third sex of homoerotically inclined men and the new modern styles that they promoted including the Gothic style and chinoiserie were interrelated movements that shaped English modernity The Gothic style offered the possibility of an alternate aesthetic and gendered order a queer reversal of the dominant Palladian style of the period Many of the houses built by Walpole and his circle were understood by commentators to be manifestations of a new queer aesthetic and in describing them they offered the earliest critiques of what would be called a queer architecture Exposing the role of sexual coteries in the shaping of eighteenth century English architecture this book offers a profound and eloquent revision to our understanding of the origins of the Gothic Revival and to medievalism itself It will be welcomed by architectural historians as well as scholars of medievalism and specialists in queer studies **Sexuality & Space** Beatriz Colomina, Jennifer Bloomer, 1992 Both timely and well worth the time Thomas Keenan Newsline AIA Award Winner Oculus Bestseller *Mechanisms Driving Karyotype Evolution and Genomic*

Exploring Gender in Vernacular Architecture Jessica Ellen Sewell, 2025-02-03 In *Exploring Gender in Vernacular Architecture* Jessica Ellen Sewell considers the gender of those who create and shape spaces how gender ideology contributes to and manifests itself in built form and what research methods make the observation of gendered experience possible She discusses single gender mixed gender and queer spaces providing a comprehensive look at how gender influences the design and construction of those spaces how those spaces are used and the relationship between gender and the broader architectural landscape In her study Sewell also provides an expansive view of how gender intersects with other categories of power and difference such as race class and age and how this intersectionality contributes to the design and use of built spaces In addition to examining the spaces themselves Sewell explores research methods for studying gendered experiences in architecture She argues that traditional research methods in vernacular architecture studies which often focus on building based fieldwork should be complemented by other methods such as letters oral histories and diaries that expand the understanding of buildings beyond their construction date and reveal how those buildings have been used and represented over time Digging into primary records Sewell posits can help challenge our assumptions about who influences architecture and urban development illuminating the roles of women and others in the building and shaping of space Thoroughly researched yet accessible for scholars new to the study of vernacular architecture *Exploring Gender in Vernacular Architecture* bridges the gap between specialized scholarship and broader public understanding Students of architectural history gender studies and cultural history will find it a valuable resource not only for examining the relationship between gender and architecture but for engaging new methodological tools that may further their own research

Gender Studies in Architecture Dörte Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to

the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment
