Indian Sex Life Durba Mitra, 2020-01-07 During the colonial period Indian intellectuals philologists lawyers scientists and literary figures all sought to hold a mirror to their country Whether they wrote novels polemics or scientific treatises all sought a better understanding of society in general and their society in particular Curiously female sexuality and sexual behavior play an outside role in their writing The figure of the prostitute is ubiquitous in everything from medical texts and treatises on racial evolution to anti Muslim polemic and studies of ancient India In this book Durba Mitra argues that between the 1840s and the 1940s the new science of sexuality became foundational to the scientific study of Indian social progress The colonial state and an emerging set of Bengali male intellectuals extended the regulation of sexuality to far reaching projects that sought to define what society should look like and how modern citizens should behave An exploration of this history of social scientific thought offers new perspectives to understand the power of paternalistic and deeply violent claims about sexual norms in the postcolonial world today These histories reveal the enduring authority of scientific claims to a tradition that equates social good with the control of women s free will and desire Thus they managed to dramatically reorganize their society around upper caste Hindu ideals of strict monogamy

Choosing Unsafe Sex E. J. Sobo, 2010-08-03 *Choosing Unsafe Sex* focuses on the ways in which condom refusal and beliefs regarding HIV testing reflect women's hopes for their relationships and their desires to preserve status and self esteem Many of the inner city women who participated in Dr Sobo's research were seriously involved with one man and they had heavy emotional and social investments in believing or maintaining that their partners were faithful to them Uninvolved women had similarly heavy investments in their abilities to identify or choose potential partners who were HIV negative Women did not see themselves as being at risk for HIV infection and so they saw no need for condoms But they did recommend that other women whom they saw as quite likely to be involved with sexually unfaithful men use them
