Sex Drink And Fast Cars:

Sex, Drink and Fast Cars Stephen Bayley, 1986 **Sex and Buildings** Richard J. Williams, 2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue *Sex and Buildings* explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect the sexual mores of their inhabitants Richard J Williams visits modernist buildings in Southern California the Westin Bonaventure Hotel the Playboy Mansion in Chicago the Seagram in New York communes from the 1960s and more A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention *Sex and Buildings* will change the way we look at the buildings around us *Motoring* John A. Jakle, Keith A. Sculle, 2008-01-01 *Motoring* unmasks the forces that shape the American driving experience commercial aesthetic cultural mechanical as it takes a timely look back at our historically unconditional love of motor travel Focusing on recreational travel between 1900 and 1960 John A Jakle and Keith A Sculle cover dozens of topics related to drivers cars and highways and explain how they all converge to uphold that illusory notion of release and rejuvenation we call the open road Jakle and Sculle have collaborated on five previous books on the history culture and landscape of the American road Here with an emphasis on the driver s perspective they discuss garages and gas stations roadside tourist attractions freeways and toll roads truck stops bus travel the rise of the convenience store and much more All the while the authors make us think about aspects of driving that are often taken for granted how for instance the many lodging and food options along our highways reinforce the connection between driving and freedom and how by enabling greater speeds highway engineers helped to stoke motorists blessed fantasy of flight Although driving originally celebrated freedom and touted a common experience it has increasingly become a highly regulated isolated activity The motive behind America s first embrace of the automobile individual prerogative still substantially obscures this reality Americans did not have the automobile imposed on them say the authors Jakle and Sculle ask why some of the early prophetic warnings about our car culture went unheeded and why the arguments of its promoters resonated so persuasively Today the automobile is implicated in any number of environmental even social problems As the wisdom of our dependence on automobile travel has come into serious question reassessment of how we first became that way is more important than ever *Motor Vehicles, the Environment, and the Human Condition* Hans A. Baer, 2019-10-09 The world now has more than a billion motor vehicles and this number continues to increase as developing countries imitate

developed societies in their adoption of the culture of automobility This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises the latter of which are most manifest in anthropogenic climate change to which motor vehicles constitute a major contributor A political ecological perspective recognizes that motor vehicles perhaps more than any other machine embody the social structural cultural and environmental contradictions of the capitalist world system In addition to highlighting many of the environmental social and health environmental consequences of humanity s increasing reliance on motor vehicles particularly private automobiles this book argues that ultimately we need as a species to move beyond motor vehicles as much as possible but that such an effort will have be part and parcel of creating an alternative world system based on social justice democratic processes environmental sustainability and a safe climate one termed democratic eco socialism

Living in the Labyrinth of Technology Willem H. Vanderburg, 2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity's first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity's second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg's *Living in the Labyrinth of Technology* seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity's third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people's

minds and society's cultures thereby re-creating human life in the image of technology Living in the Labyrinth of Technology argues that the twenty-first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms

Our Battle for the Human Spirit Willem H. Vanderburg, 2016-08-04 Western society has become saturated with scientific and technological modes of thinking that impact our lives and our relationships Expanding social inequality the use of social media and the rise of mental illnesses such as anxiety and depression are manifestations of this shift in our civilization Our Battle for the Human Spirit is a comprehensive probe into what is happening to human life in the beginning of the 21st century It explores how culture experience and symbolization have been replaced by scientific discipline based approaches Willem H Vanderburg argues that these approaches are inadequate in understanding the complexity of human lives and societies In order to transcend these limits Vanderburg calls for the reintegration of culture and symbolization into our daily lives

Depression and World War II the automotive Golden Age of the 1950s oil crises and the turbulent 1970s the decline and then resurgence of the Big Three and how American car culture has been represented in film music and literature Updated notes and a select bibliography serve as valuable resources to those interested in automotive history **Crossing Borders**

Kimberly M. Grimes, 1998-07 Defining borders is a complex task especially today as globalization accelerates at an unprecedented rate We have entered a transnational age one in which borders are more porous So says Kimberly M Grimes in *Crossing Borders Changing Social Identities in Southern Mexico* her investigation of migration to the United States from Putla de Guerrero Oaxaca Featuring testimonies of residents and migrants Grimes allows local voices to describe the ways in which Putlecans find themselves negotiating among competing social values The testaments of the Putlecans indicate that the changes occurring in their small town as a result of the circular migration to and from such immigrant enclaves as Atlantic City New Jersey are viewed with mixed emotions Putlecans recognize the financial need to migrate north but they rue the increased consumerism pollution and trash that comes with the rising wealth Men show off by driving their fancy cars with New Jersey tags around the tiny Mexican town but influenced by Anglo culture they also provide greater assistance in child care and housework Women find the sexual and social freedoms of the United States liberating but they still return home to baptize their babies Grimes reminds us however that the Putlecans are not passive recipients of change but are actively embracing it creating it and mediating it By reaching across the border to investigate migration Grimes shows us that social and cultural change are not just the result of national and transnational influences but are also locally negotiated phenomena **Advertising**
