Gender, Power, and Communication in Human Relationships Pamela J. Kalbfleisch, Michael J. Cody, 2012-12-06 This edited volume establishes a state of the art perspective on theory and research on gender power and

communication in human relationships Both theoretical essays and review chapters address issues relevant to female and male differences in power dominance communication equality and expectations beliefs All chapter contributors share two commonalities First each provides a 1990s assessment of power and equality in female and male relationships Second each reviews respective programs of research and focuses attention on the relevance of this research to understanding the relationships of women and men Unique because it incorporates a multidisciplinary approach to the study of gender and the communication of power in human relationships this book includes the original work of intellectuals with national and international reputations in the social sciences The volume provides both scholastic breadth and centralized treatment of issues that form the very foundation of social and personal relationships It will appeal to scholars working in the disciplines of communication and psychology as well as other areas of social science research **AIDS Bibliography**, 1992 Sex, Lies, and AIDS Siddharth Dube, 2000-01-01 With reference to India *Sex at Risk* Stuart Brody, 2023-03-31 Politicians interest groups and the mass media often answer questions about how AIDS is sexually transmitted as if heterosexual vaginal intercourse is a high risk activity When it comes to understanding how AIDS is transmitted and formulating effective policy to deal with the spread of AIDS America remains confused What Brody calls ideological knowledge about AIDS is far more likely to filter through society than scientific knowledge *Sex at Risk* is a comprehensive review of the scientific literature dealing with the transmission of AIDS Like Michael Fumento's *The Myth of Heterosexual AIDS* it exposes the mythology surrounding vaginal intercourse and AIDS transmission Brody also looks deeply at reasons that fear of AIDS transmission from vaginal intercourse has spread so widely and profoundly He addresses serious methodological problems in AIDS HIV behavioral research as well as tendentious political correctness that has done a disservice to science *Sex at Risk* also comprehensively reviews the international research literature on correlates of lifetime number of sexual partners and frequency of sexual intercourse Among topics covered are relationships between lifetime number of sexual partners and mental health explanations for important differences between intercourse and masturbation the possible association of frequency with healthy functioning and correlations between frequency and national development Brody concludes by discussing what AIDS reveals about how politically correct thought impedes scientific progress when taboo themes regardless of their validity cannot be pursued *Sex at Risk* is factually grounded yet controversial Brody raises critical questions about much of what we have learned about AIDS from popular and professional publications soft scientists and public health campaigns It will be of interest to medical doctors clinicians and those interested in the sociology and psychology of knowledge **Social Work With African American Males** Waldo E. Johnson Jr., 2010-05-26 African American males have never fared as poorly as they do currently on a number of social indicators They are less likely to complete high school than their white male and female or African American female peers they are more likely to exhibit depressive symptoms and they have fewer sanctioned coping strategies Arguably no other group in American society has been more maligned regularly faced with tremendous odds that

uniquely threaten their existence When they do receive education mental health and physical health services it is often in correctional settings They are marginalized in public policies on secondary and higher education attainment marriage and parental expectations public welfare health housing and community development Yet they remain overlooked in health and social science research and are stereotyped in the popular media Taking a step back from the traditionally myopic view of African American males as criminals and hustlers this groundbreaking book provides a more nuanced and realistic portrait of their experiences in the world Chapter authors both established and emerging scholars of social problems relevant to African Americans offer a comprehensive overview of the social and economic data on black males to date and the significant issues that affect them from adolescence to adulthood Via in depth qualitative interviews as well as comprehensive surveys and data sets their physical mental and spiritual health and emerging family roles are considered within both individual and communal contexts Chapters cover health issues such as HIV and depression fatherhood and family roles suicide violence academic achievement and incarceration With original research and a special eye toward enhancing social work and social welfare intervention practice with this often overlooked subpopulation of American society this volume will be of great interest to researchers interested in African American issues students practitioners and policy makers

Handbook of Economic Evaluation of HIV Prevention Programs David R. Holtgrave, 2013-06-29 If resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount

of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations **Evaluating Women's Health Messages** Roxanne Louiselle Parrott,Celeste Michelle Condit,1996-02-01

III International Conference on Acquired Immunodeficiency Syndrome (AIDS) ,1987 *Public Health Reports* ,2010 *What's Wrong With Addiction* Helen Keane,2013-04-01 This is an impressive work carefully structured researched and written a refreshingly lucid account that is both intellectually stimulating and professionally helpful Janet McCalman Addicts are generally regarded with either pity or grave disapproval But is being addicted to something necessarily bad These attitudes are explicit both in contemporary medical literature and in popular self help texts We categorise addiction as unnatural diseased and self destructive We demonise pleasure and desire and view the addict as physically and morally damaged Helen Keane s thought provoking text examines these assumptions in a new light In asserting that the wrongness of addiction is not fixed or indeed obvious she presents a refreshing challenge to more conventional accounts of addiction She also investigates the notion that people can be addicted to eating love and sex just as they are to drugs and alcohol What s Wrong with Addiction shows that most of our ideas about addiction take certain ideals of health and normality for granted It exposes strains in our society s oppositions between health and disease between the natural and the artificial between order and disorder and between self and other
