magnetic phenomena as well as with engineering applications of magnetic materials to electromagnetic machines permanent magnets and electronic computers and that the purpose of his textbook is to give a general view of these magnetic phenomena focusing its main interest at the center of such a broad field Always keeping such a viewpoint in mind Professor Chikazumi has contributed a great deal to both fundamental physics and applications of magnetism This is described in Chap 1 of this book Many books have been published on both the physics and applications of magnetism However no single book has a viewpoint covering both of them The recent development of high technology needs such a broad viewpoint for scientists and engineers since it is a product of both fundamental science and technology Research in magnetism is based on the response which materials show to the application of magnetic fields
