Major Problems In American Urban And Suburban History:

Major Problems in American Urban and Suburban History Howard P. Chudacoff, Peter C. Baldwin, 2005 This volume offers an examination of the nation's urban development and reflects the city's pivotal role in the unfolding of American history The Second Edition has been significantly revised to include more than 75% new content and a greater emphasis on suburbanization and historically marginalized groups Chapters included in this edition focus on the lower classes and class relations and conditions the evolution of technology race relations and redevelopment in the postwar era and significant changes in urbanization In order to address the current urban climate the final chapter focuses on violence and the search for security in a post September 11th America [African American Urban History since World War II](#) Kenneth L. Kusmer, Joe W. Trotter, 2009-08-01 Historians have devoted surprisingly little attention to African American urban history of the postwar period especially compared with earlier decades Correcting this imbalance African American Urban History since World War II features an exciting mix of seasoned scholars and fresh new voices whose combined efforts provide the first comprehensive assessment of this important subject The first of this volume's five groundbreaking sections focuses on black migration and Latino immigration examining tensions and alliances that emerged between African Americans and other groups Exploring the challenges of residential segregation and deindustrialization later sections tackle such topics as the real estate industry's discriminatory practices the movement of middle class blacks to the suburbs and the influence of black urban activists on national employment and social welfare policies Another group of contributors examines these themes through the lens of gender chronicling deindustrialization's disproportionate impact on women and women's leading roles in movements for social change Concluding with a set of essays on black culture and consumption this volume fully realizes its goal of linking local transformations with the national and global processes that affect urban class and race relations

Urban Ecologies Christopher Schliephake, 2014-12-11 The term urban ecology has become a buzzword in various disciplines including the social and natural sciences as well as urban planning and architecture The environmental humanities have been slow to adapt to current theoretical debates often excluding human built environments from their respective frameworks This book closes this gap both in theory and in practice bringing together urban ecology with ecocritical and cultural ecological approaches by conceptualizing the city as an integral part of the environment and as a space in which ecological problems manifest concretely Arguing that culture has to be seen as an active component and integral factor within urban ecologies it makes use of a metaphorical use of the term perceiving cities as spatial phenomena that do not only have manifold and complex material interrelations with their respective natural environments but that are intrinsically connected to the ideas imaginations and interpretations that make up the cultural symbolic and discursive side of our urban lives and that are stored and constantly renegotiated in their cultural and artistic representations The city is within this framework both seen as an ecosystemically organized space as well as a cultural artifact Thus the urban ecology outlined in this study takes its main impetus from an analysis of examples taken from contemporary culture that deal with urban life and the complex interrelations between urban communities and their natural and built environments

City of Vice James Mallery, 2024-06 San Francisco's reputation for accommodating progressive and unconventional identities can find its roots in the waves of transients and migrants that flocked to San Francisco between the gold rush and World War I In the era of yellow journalism San Francisco's popular presses broadcast shocking stories about the waterfront Chinatown Barbary Coast hobo Main Stem Uptown Tenderloin and Outside Lands The women and men who lived in these districts did not passively internalize the shaming of their bodies or neighborhoods Rather many urbanites intentionally sought out San Francisco's vice and transient lodging districts They came to identify themselves in ways opposed to hegemonic notions of whiteness respectability and middle class heterosexual domesticity With the destabilizing 1906 earthquake marking its halfway point James Mallery's *City of Vice* explores the imagined cognitive mapping of the cityscape and the social history of the women and men who occupied its so called transient and vice districts between the late nineteenth century and World War I
