Popular Literacy in Early Modern Japan Richard Rubinger,2007-01-31 The focus of Richard Rubinger s study of Japanese literacy is the least studied yet overwhelming majority of the premodern population the rural farming class In this book length historical exploration of the topic the first in any language Rubinger dispels the misconception that there are few materials available for the study of popular literacy in Japan He analyzes a rich variety of untapped sources from the sixteenth century onward drawing for the first time on material that allows him to measure literacy signatures on apostasy oaths diaries agricultural manuals home encyclopedias rural poetry contest entries village election ballots literacy surveys and family account books The book begins by tracing the origins of popular literacy up to the Tokugawa period and goes on to discuss the pivotal roles of village headmen during the early sixteenth century a group extraordinarily skilled in administrative literacy using the Sino Japanese hybrid language favored by their warrior overlords In time literacy began to spread beyond the leadership class to household heads particularly those in towns and farming communities involved in commerce and eventually to women employees and servants Rubinger identifies substantial and enduring differences in the ability to read and write between commoners in the cities and those in the country until the eighteenth century when the vigorous popular culture of Kyoto Osaka and Edo Tokyo attracted village leaders and caused them to extend their capabilities Later chapters focus on the nineteenth century expansion of literacy to wider constituencies of farmers and townspeople Using direct measures of literacy attainment such as village surveys election ballots diaries and letters Rubinger demonstrates the spread of basic reading and writing skills into virtually every corner of Japanese society The book ends by examining data on illiteracy generated from conscription examinations given by the Japanese army during

the Meiji period bringing the discussion into the twentieth century Rubinger's analysis of this information suggests that geographical factors and local traditions of learning and culture may have been more important than school attendance in explaining why illiteracy continued to persist in some areas

Objects to Learn about and Objects for Learning 2 Joel Bisault, Roselyne Le Bourgeois, Jean-Francois Themines, Mickael Le Mentec, Celine Chauvet-Chanoine, 2022-04-05 Resulting from a conference that took place in Amiens, France, in June 2019, this book examines the place and role of objects centered in teaching practices from kindergarten to university, both in the context of France and elsewhere. These objects for learning are considered in their physicality as productions, work, or signs that are used for learning. They become objects to learn about when the object itself is the learning objective. This book offers a cross-disciplinary perspective linking the different disciplinary fields studied and the many reference sources used by the authors. This two-volume work offers an overview of current research on the subject, with this second volume focusing on objects in representations of space and time, then on learners' activities in the making or use of objects, before concluding with different cultural and philosophical perspectives on objects.

Landscapes in the European City, 1750-2010 Peter Clark, Marjaana Niemi, Catharina Nolin, 2016-12-08 Green space is a fundamental concept for understanding modern and contemporary urban society shedding light not only on the ecological development of cities but also societal relations urban governance and planning processes Closely linked to issues of environmental change changing perceptions of nature urban well being and social integration as well as city economic competitiveness and branding it is an important element both in the internationalisation of European cities and the forging of their distinctive communal identities Building upon recent research on the history of green landscapes in the city in Europe and North America this volume mirrors the burgeoning global attention to urban green space developments from city policy makers and planners architects climatologists ecologists geographers and other social scientists Taking case studies from Paris London Berlin Helsinki and other leading centres the volume examines when why and how green landscapes evolved in major cities and the extent to which they have been shaped by shared external forces as well as by distinctive and specific local needs Quantifying green space trends in this way raises important issues of classification and categorisation of the different varieties of urban green space While urban parks have received considerable coverage many other smaller less prestigious spaces have been largely ignored This volume argues that green landscapes can only be properly understood when the full range of spaces from parks to recreation grounds housing areas allotments and domestic gardens is taken into account Adopting a broader approach to urban green space helps put European developments during the 19th and 20th centuries into a global perspective **DK Eyewitness Travel Guide Europe** DK Travel, 2017-01-17 DK Eyewitness Travel
