*Making a Killing* Madelaine Drohan, 2004      *Making a Killing* Madelaine Drohan, 2010-08-06 A dramatic and compelling journey into the dark heart of globalization What happens when multinational corporations decide that the use of armed force is just business by other means In *Making a Killing* Madelaine Drohan looks at the shocking number of companies that have linked up with mercenaries warlords armies and private militias in order to make a profit In a world where multinationals often rival national governments in size and clout the implications of such partnerships are ominous What leads respectable corporations down the path to violence Drohan answers this question by examining the actions of several companies operating in Africa such as Ranger Oil West Africa which used the mercenary group Executive Outcomes to take on rebels in Angola's long running civil war and Talisman Energy whose security was provided by Sudanese army units conducting a scorched earth policy in the oil fields Drohan traces the modern roots of corporate armed force beginning with Cecil Rhodes British South Africa Company which at the turn of the century built its own army Also included is the stranger than fiction tale of ex MI5 spymaster Sir Percy Sillitoe who was hired by the De Beers diamond king to prevent the Soviet Union from acquiring smuggled diamonds in order to develop the hydrogen bomb These accounts read like adventure stories in the tradition of Rudyard Kipling and Ian Fleming but they are essential reading for anyone interested in the effects of unfettered multinational influence *Making a Killing* provides a road map for corporations policy makers and investors struggling to come to terms with their roles in today's increasingly globalized world      From Mercenaries to Market Simon Chesterman, Chia Lehnardt, 2007-07-12 Frequently characterized as either mercenaries in modern guise or the market's response to a security vacuum private military companies are commercial firms offering military services ranging from combat and military training and advice to logistical support and which play an increasingly important role in armed conflicts UN peace operations and providing security in unstable states Executive Outcomes turned around an orphaned conflict in Sierra Leone in the mid 1990s Military Professional Resources Incorporated MPRI was instrumental in shifting the balance of power in the Balkans enabling the Croatian military to defeat Serb forces and clear the way for the Dayton negotiations in Iraq estimates of the number of private contractors on the ground are in the tens of thousands As they assume more responsibilities in conflict and post conflict settings their growing significance raises fundamental questions about their nature their role in different regions and contexts and their regulation This volume examines these issues with a focus on governance in particular the interaction between regulation and market forces It analyzes the current legal framework and the needs and possibilities for regulation in the years ahead The book as a whole is organized around four sets of questions which are reflected in the four parts of the book First why and how is regulation of PMCs now a challenging issue Secondly how have problems leading to a call for regulation manifested in different regions and contexts Third what regulatory norms and institutions currently exist and how effective are they And fourth what role has the market to play in regulation

Corporations, Accountability and International Criminal Law Kyriakakis, Joanna, 2021-12-09 This timely book explores the prospect of prosecuting corporations or individuals within the business world for conduct amounting to international crime. The major debates and ensuing challenges are examined arguing that corporate accountability under international criminal law is crucial in achieving the objectives of international criminal justice.

**Business and Conflict in Fragile States** Brian Ganson, Achim Wennmann, 2018-10-25 Large scale investments in fragile states in Latin America Africa the former Soviet Union and Asia become magnets for conflict which undermines business development and security. International policy responds with regulation state building and institutional reform with poor and often perverse results. Caught up in old ways of thinking about conflict and fragility and an age old fight over whether multinational corporations are good or bad for peaceful development it leaves business related conflicts in fragile states to multiply and fester. Surveying a new strategic landscape of business and conflict Brian Ganson and Achim Wennmann conclude that neither company shareholders nor advocates for peaceful development need or should accept the growing cost of business related conflict in fragile states. Drawing on decades of experience from mainstream conflict prevention and violence reduction efforts as well as promising company practice they show that even acute conflict is manageable when dealt with pragmatically locally and on its own terms. The analysis and conclusions of this Adelphi book will interest policymakers business leaders and community advocates alike all those hoping to mitigate today's conflicts while helping to reduce fragility and build a firmer foundation for inclusive development.

**The Ethics of Military Privatization** David M. Barnes, 2016-08-25 This book explores the ethical implications of using armed contractors taking a consequentialist approach to this multidisciplinary debate. While privatization is not a new concept for the US military the public debate on military privatization is limited to legal financial and pragmatic concerns. A critical assessment of the ethical dimensions of military privatization in general is missing. More specifically in light of the increased reliance upon armed contractors it must be asked whether it is morally permissible for governments to employ them at all. To this end this book explores four areas that highlight the ethical implications of using armed contractors: how armed contractors are distinct from soldiers and mercenaries the commodification of force the belligerent equality of combatants and the impact of armed contractors on the professional military. While some take an absolutist position wanting to bar the use of private military altogether this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option. Recognising that outsourcing force will continue this book thus proposes some changes to account for the problems of commodification belligerent equality and the challenge to the military profession. This book will be of interest to students of private security military studies ethics security studies and IR in general.

**Monsters of the Market** David McNally, 2011-07-12 Winner of the 2012 Isaac and Tamara Deutscher Memorial Prize Monsters of the Market investigates the rise of capitalism through the prism of the body panics it arouses. Drawing on folklore literature and popular culture the book links tales of monstrosity

from early modern England including Mary Shelley's Frankenstein to a spate of recent vampire and zombie fables from sub-Saharan Africa and it connects these to Marx's persistent use of monster metaphors in his descriptions of capitalism. Reading across these tales of the grotesque, *Monsters of the Market* offers a novel account of the cultural and corporeal economy of a global market system. The book thus makes original contributions to political economy, cultural theory, commodification studies, and body theory.

**Canadian Books in Print. Author and Title Index**, 1975      The New Challenges of Humanitarian Law in Armed Conflicts Pablo Antonio Fernández-Sánchez, 2005-11-01. This work represents an analysis of and a reflection on the new challenges of humanitarian law in armed conflicts. It covers the jurisprudential dimension not only of the International Court of Justice but also all the different legal bodies including the ad hoc tribunals created by the United Nations. It analyses the purely doctrinal dimension of general aspects such as the solutions to world disorder in this field, the relationship between jus in bello and jus ad bellum, the principles of universal and international jurisdiction, and the notion of justice and peace. More concrete aspects include the situation of foreigners and journalists in armed conflicts, terrorist acts in terms of international humanitarian law, and sexual violence as a war crime. Despite the range of themes addressed, they are all linked with the essential theme of the book: *The New Challenges of Humanitarian Law in Armed Conflicts*.

**A Game As Old As Empire** Steven Hiatt, 2007-02-28. John Perkins' controversial and bestselling exposé *Confessions of an Economic Hit Man* revealed for the first time the secret world of economic hit men (EHMs). But Perkins' *Confessions* contained only a small piece of this sinister puzzle. The full story is far bigger, deeper, and darker than Perkins' personal account revealed. Here, other EHMs, journalists, and investigators join Perkins to tell their own stories, providing the first probing and expansive look into this pervasive web of systematic corruption. With chapters spotlighting how specific countries around the globe have been subverted, *A Game As Old As Empire* uncovers the inner workings of the institutions behind these economic manipulations. The contributors detail concrete examples of how the economic hit man game is still being played: an officer of an offshore bank hiding hundreds of millions of dollars in stolen money; IMF advisers slashing Ghana's education and health programs; a mercenary defending a European oil company in Nigeria; a consultant rewriting Iraqi oil law; and executives financing warlords to secure supplies of coltan ore in Congo. Together, they show how this system of corruption and plunder operates in real life and reveal the price that the rest of the world must pay as a result. Most important, *A Game As Old As Empire* connects the dots, showing how the various pieces of this system come together to create the world's first truly global empire.

**Globalization and the Cultures of Business in Africa** Scott D. Taylor, 2012-09-05. Can Africa develop businesses beyond the extractive or agricultural sectors? What would it take for Africa to play a major role in global business? By focusing on recent changes, Scott D. Taylor demonstrates how Africa's business culture is marked by an unprecedented receptivity to private enterprise. Challenging persistent stereotypes about crony capitalism and the lack of development, Taylor reveals a long and dynamic history of business in Africa. He shows how a hospitable climate for business has been spurred by

institutional change globalization and political and economic reform Taylor encourages a broader understanding of the mosaic of African business and the diversity of influences and cultures that shape it

**The Privatisation of Security in the Kurdistan Region of Iraq** Twana Faris Bawa, 2015-01-31 Kurdistan is technically a federal region of Iraq a weak state in dire need of security sector reform *A Game as Old as Empire (Volume 1 of 2) (EasyRead Large Bold Edition)* , **A Game as Old as Empire (Volume 1 of 2) (EasyRead Super Large 20pt Edition)** , **Earth Into Property** Tony Hall, 2010 A broad exploration of the colonial roots of global capitalism and the worldwide quest of Indigenous people for liberation through decolonization *Who Killed Hammarskjold?* Susan Williams, 2014-08-15 One of the outstanding mysteries of the twentieth century and one with huge political resonance is the death of Dag Hammarskjold and his UN team in a plane crash in central Africa in 1961 Just minutes after midnight his aircraft plunged into thick forest in the British colony of Northern Rhodesia Zambia abruptly ending his mission to bring peace to the Congo Across the world many suspected sabotage accusing the multi nationals and the governments of Britain Belgium the USA and South Africa of involvement in the disaster These suspicions have never gone away British High Commissioner Lord Alport was waiting at the airport when the aircraft crashed nearby He bizarrely insisted to the airport management that Hammarskjold had flown elsewhere even though his aircraft was reported overhead This postponed a search for so long that the wreckage of the plane was not found for fifteen hours White mercenaries were at the airport that night too including the South African pilot Jerry Puren whose bombing of Congolese villages led in his own words to flaming huts destruction and death These soldiers of fortune were backed by Sir Roy Welensky Prime Minister of the Rhodesian Federation who was ready to stop at nothing to maintain white rule and thought the United Nations was synonymous with the Nazis The Rhodesian government conducted an official inquiry which blamed pilot error But as this book will show it was a massive cover up that suppressed and dismissed a mass of crucial evidence especially that of African eye witnesses A subsequent UN inquiry was unable to rule out foul play but had no access to the evidence to show how and why Now for the first time this story can be told *Who Killed Hammarskjold* follows the author on her intriguing and often frightening journey of research to Zambia South Africa the USA Sweden Norway Britain France and Belgium where she unearthed a mass of new and hitherto secret documentary and photographic evidence At the heart of this book is Hammarskjold himself a courageous and complex idealist who sought to shield the newly independent nations of the world from the predatory instincts of the Great Powers It reveals that the conflict in the Congo was driven not so much by internal divisions as by the Cold War and by the West's determination to keep real power from the hands of the post colonial governments of Africa It shows too that the British settlers of Rhodesia would maintain white minority rule at all costs **Security Beyond the State** Rita Abrahamsen, Michael C. Williams, 2010-11-18 Across the globe from mega cities to isolated resource enclaves the provision and governance of security takes place within assemblages that are de-territorialized in terms of actors technologies norms and discourses They are embedded in a

complex transnational architecture defying conventional distinctions between public and private global and local Drawing on theories of globalization and late modernity along with insights from criminology political science and sociology *Security Beyond the State* maps the emergence of the global private security sector and develops a novel analytical framework for understanding these global security assemblages Through in depth examinations of four African countries Kenya Nigeria Sierra Leone and South Africa it demonstrates how global security assemblages affect the distribution of social power the dynamics of state stability and the operations of the international political economy with significant implications for who gets secured and how in a global era *A Game as Old as Empire (Volume 1 of 3) (EasyRead Super Large 24pt Edition)* ,

*Business and Human Rights* Wesley Cragg, 2012-01-01 The relationship between business and human rights has emerged in the last two decades as one of the most pressing issues in the field of business ethics Do corporations have human rights responsibilities If so what is that nature of those responsibilities and do they differ in any significant way from those of governments Is it reasonable or realistic to expect corporations to respect human rights in environments where governments particularly in the developing and underdeveloped world need economic development and have a limited capacity and or interest in enforcing human rights standards and laws The contributors to this groundbreaking volume take up these questions examining them from both theoretical and practical perspectives Topics discussed include the debates leading to the creation of the ISO 26000 standard and the United Nations human rights framework for business entities as well as the nature and limits of the human rights responsibilities of business the roles and responsibilities of international trade bodies like the World Trade Organization in protecting human rights and the implications of the current debate for international trade agreements and trade with China The contributors also explore the effectiveness of voluntary human rights standards in the textile and clothing trade mining advertising and the pharmaceutical industry Scholars and students in management philosophy political science sociology and law will find this volume a great resource as will activists managers and policy makers *Rethinking the Economics of War* Cynthia J. Arnson, I. William Zartman, 2005-10-12 This collection of essays questions the adequacy of explaining today's internal armed conflicts purely in terms of economic factors and re establishes the importance of identity and grievances in creating and sustaining such wars Countries studied include Lebanon Angola Colombia and Afghanistan
