Making A Market The Institutional Transformation Of An African Society:

Making a Market Jean Ensminger, 1996-09-13 In *Making a Market* Jean Ensminger analyzes the process by which the market was introduced into the economy of a group of Kenyan pastoralists Professor Ensminger employs new institutional economic analysis to assess the impact of new market institutions on production and distribution with particular emphasis on the effect of institutions on decreasing transaction costs over time This study traces the effects of increasing commercialization on the economic well being of individual households rich and poor alike over considerable time and analyzes the process by which institutions themselves are transformed as a market economy develops This case study points out the importance of understanding the roles of ideology and bargaining power in addition to pure economic forces such as changing relative prices in shaping market institutions

A Research Agenda for Economic Anthropology James G. Carrier, 2019 The financial crisis and its economic and political aftermath have changed the ways that many anthropologists approach economic activities institutions and systems This insightful volume presents important elements of this change With topics ranging from the relationship of states and markets to the ways that anthropologists political preferences and assumptions harm their work the book presents cogent statements by younger and established scholars of how existing research areas can be extended and the new avenues that ought to be pursued

The Social Economics of Poverty Christopher B. Barrett, 2006-10-03 A unique analysis of the moral and social dimensions of microeconomic behaviour in developing countries this book calls into question standard notions of rationality and many of the assumptions of neo classical economics and shows how these are inappropriate in communities with widespread disparity in incomes This book will prove to be essential for students studying development economics

Veto Bargaining Charles M. Cameron, 2000-06-19 Combining game theory with unprecedented data this book analyzes how divided party Presidents use threats and vetoes to wrest policy concessions from a hostile congress

Market Institutions in Sub-Saharan Africa Marcel Fafchamps, 2003-12-05 An analysis of recent data on the economic behavior of market institutions in sub Saharan Africa with implications for future research and current policy In *Market Institutions in Sub Saharan Africa* Marcel Fafchamps synthesizes the results of recent surveys of indigenous market institutions in twelve countries including Benin Ghana Kenya Madagascar Malawi and Zimbabwe and presents findings about economics exchange in Africa that have implications both for future research and current policy Employing empirical data as well as theoretical models that clarify the data Fafchamps takes as his unifying principle the difficulties of contract enforcement Arguing that in an unpredictable world contracts are not always likely to be respected he shows that contract agreements in sub Saharan Africa are affected by the absence of large hierarchies both corporate and governmental and as a result must depend to a greater degree than in more developed economies on social networks and personal trust Fafchamps considers policy recommendations as they apply to countries in three different stages of development countries with undeveloped market institutions like Ghana countries at an intermediate

stage like Kenya and countries with developed market institutions like Zimbabwe Market Institutions in Sub Saharan Africa caps ten years of personal research by the author Fafchamps in collaboration with such institutions as the Africa Division of the World Bank and the International Food Policy Research Institute participated in the surveys of manufacturing firms and agricultural traders that provide the empirical basis for the book The result is a work that makes a significant contribution to research on the continuing economic stagnation of many countries in sub Saharan Africa and is also largely accessible to researchers in other fields and policy professionals

Theory in Economic Anthropology Jean Ensminger, 2002
 Comprising 13 contributions mostly based on papers presented at the annual conference of the Society for Economic Anthropology in 1998 at Northwestern University this volume focuses several themes the new institutionalism wealth exchange and the evolution of social institutions small producers interactions with the wider world commodity chains and the formal informal sector distinction and the role for big theory in economic anthropology Annotation copyrighted by Book News Inc Portland OR

Identity and Territorial Autonomy in Plural Societies Ramón Máiz, Safran William, 2014-01-14 Focusing on autonomy in countries whose societies are marked by ethnic diversity this work examines the effects of territorial solutions to the safeguarding of cultural identities Contributors distinguish among types of autonomy and their impact on pluralism democracy and unity of the state

Appointing Central Bankers Kelly H. Chang, 2003-08-18 This book examines monetary policy by focusing on how the President and the Senate influence monetary policy by appointing Fed members The book attempts to answer three questions about the appointment process and its effects First do politicians influence monetary policy via Fed appointments Second who influences the process the President alone or both the President and the Senate Third what explains the structure of the Fed appointment process The study extends the analysis of the Fed to the European Central bank

The Dilemma of the Commoners Tine De Moor, 2015-04-30 This book puts the debate on commons commoners and the disappearance of both throughout early modern and modern western Europe in a new light through new approaches and innovative methodologies Tine De Moor links the historical debate about the long term evolution of commons to the present day debates on common pool resources

A Theory of the State Yoram Barzel, 2002
 This book models the emergence of the state and the forces that shape it

Public Debt and the Birth of the Democratic State David Stasavage, 2003-04-28 This book develops new theory about the link between debt and democracy and applies it to a classic historical comparison Great Britain in the eighteenth century which had strong representative institutions and sound public finance vs ancient regime France which had neither The book argues that whether representative institutions improve commitment depends on the opportunities for government creditors to form new coalitions with other social groups more likely to occur when a society is divided across multiple political cleavages It then presents historical evidence to show that improved access to finance in Great Britain after 1688 had as much to do with the development of the Whig Party as with constitutional changes In France it is suggested that the balance of partisan forces

made it unlikely that an early adoption of English style institutions would have improved credibility **Elbridge Gerry's Salamander** Gary W. Cox, Jonathan N. Katz, 2002-03-04 Publisher Description **When Majorities Fail** Josephine T. Andrews, 2002-10-21 When Majorities Fail is a study of institutional failure in Russia's first democratic legislature. Inadequate rules and a chaotic party system combined to make it nearly impossible to pass a coherent legislative program including a new constitution. The internal instability in Russia's parliament is known as cycling, one of the most important theoretical concepts in formal study of legislatures. There are few recorded cases of cycling in politically important settings. This book documents the presence of cyclical majorities in Russian Parliament with comprehensive case and statistical analysis and demonstrates how the failure to adopt a new constitution led to the confrontation between parliament and president in the fall of 1993. Earlier research has shown that the design of a legislative institution is crucial in preventing cycling. The author shows how the institutional design of the parliament failed, underscoring the importance of institutional design in a democratic transition. *Environmental Social Sciences* Ismael Vaccaro, Eric Alden Smith, Shankar Aswani, 2010-11-11 The relationship between human communities and the environment is extremely complex. In order to resolve the issues involved with this relationship, interdisciplinary research combining natural sciences, social sciences, and humanities is necessary. In this 2010 book, specialists summarise methods and research strategies for various aspects of social research devoted to environmental issues. Each chapter is illustrated with ethnographic and environmental examples ranging from Australia to Amazonia, from Madagascar to the United States, and from prehistoric and historic cases to contemporary rural and urban ones. It deals with climate change, deforestation, environmental knowledge, natural reserves, politics, and ownership of natural resources, and the effect of differing spatial and temporal scales. Contributing to the intellectual project of interdisciplinary environmental social science, this book shows the possibilities social science can provide to environmental studies and to larger global problems, and thus will be of equal interest to social and natural scientists and policy makers. **Above Politics** Gary J. Miller, Andrew B. Whitford, 2016-05-23 Economic development requires secure contract enforcement and stable property rights. Normal majority rule politics, such as bargaining over distributive and monetary policies, generate instability and frequently undermine economic development. Above Politics argues that bureaucracies can contribute to stability and economic development but only if they are insulated from unstable politics. A separation of powers stalemate creates the conditions for bureaucratic autonomy. But what keeps delegated bureaucrats from being more abusive as they become more autonomous? One answer is the negotiation of long-term cooperative relationships that, when successful, typically bind subordinates to provide more effort in exchange for autonomy. Even more compelling is professionalism, which embeds its professional practitioners in professional norms and culture and incidentally mitigates corruption. Financial examples are provided throughout the book, which ends with an analysis of the role played by professionalized bureaucracies during the Great Recession. *Spending to Win* Stephanie J. Rickard, 2018-04-19 Governments in some democracies target

economic policies like industrial subsidies to small groups at the expense of many Why do some governments redistribute more narrowly than others Their willingness to selectively target economic benefits like subsidies to businesses depends on the way politicians are elected and the geographic distribution of economic activities Based on interviews with government ministers and bureaucrats as well as parliamentary records industry publications local media coverage and new quantitative data Spending to Win Political Institutions Economic Geography and Government Subsidies demonstrates that government policy making can be explained by the combination of electoral institutions and economic geography Specifically it shows how institutions interact with economic geography to influence countries economic policies and international economic relations Identical institutions have wide ranging effects depending on the context in which they operate No single institution is a panacea for issues such as income inequality international economic conflict or minority representation **Partisan**

Bonds Jeffrey D. Grynviski, 2010-02-22 Political scientists have long painted American voters dependence on partisan cues at the ballot box as a discouraging consequence of their overall ignorance about politics Taking on this conventional wisdom Jeffrey D Grynviski advances the provocative theory that voters instead rely on these cues because party brand names provide credible information about how politicians are likely to act in office despite the weakness of formal party organization in the United States Among the important empirical implications of his theory which he carefully supports with rigorous data analysis are that voter uncertainty about a party s issue positions varies with the level of party unity it exhibits in government that party preferences in the electorate are strongest among the most certain voters and that party brand names have meaningful consequences for the electoral strategies of party leaders and individual candidates for office The Commons in a Glocal World Tobias Haller, Thomas Breu, Tine De Moor, Christian Rohr, Heinzpeter Znoj, 2019-04-30 This volume focuses on how in Europe the debate on the commons is discussed in regard to historical and contemporary dimensions critically referencing the work of Elinor Ostrom It also explores from the perspective of new institutional political ecology NIPE how Europe directly and indirectly affected and affects the commons globally Most of the research on the management of commons pool resources is limited to dealing with one of two topics either the interaction between local participatory governance and development of institutions for commons management or a political economy approach that focuses on global change as it is related to the increasingly globalised expansion of capitalist modes of production consumption and societal reproduction This volume bridges the two addressing how global players affect the commons worldwide and how they relate to responses emerging from within the commons in a global local glocal world Authors from a range of academic disciplines present research findings on recent developments on the commons including historical insights new innovations for participatory institutions building in Europe or several types of commons grabbing especially in Africa related to European investments and restrictions on the management of commons at the international level European case studies are included providing interesting examples of local participation in commons resource management while

simultaneously showing Europe as a centre for globalized capitalism and its norms and values affecting the rest of the world particularly developing countries This book will be of interest to students and researchers from a wide range of disciplines including natural resource management environmental governance political geography and environmental history

Consent, Dissent, and Patriotism Margaret Levi, 1997-10-13 Democratic governments are able to elicit legally and legitimately both money and men from their populations Certainly there is tax evasion draft evasion and even outright resistance yet to a remarkable extent citizens acquiesce and even actively consent to the demands of governments well beyond the point explicable by coercion This is a puzzle for social scientists particularly those who believe that individuals are self interested rational actors who calculate only the private egoistic costs and benefits of possible choices The provisions of collective good should never justify a quasi voluntary tax payment and the benefits of a war could not possibly exceed the cost of dying This book explains the institutionalization of policy in response to anticipated and actual citizen behaviour and the conditions under which citizens give refuse and withdraw their consent Professor Levi claims that citizens consent is contingent upon the perceived fairness of both the government and of other citizens Most citizens of democracies most of the time are more likely to give their consent if they believe that government actors and other citizens are behaving fairly toward them

Cooperation Without Trust? Karen S. Cook, Russell Hardin, Margaret Levi, 2005-06-30 Some social theorists claim that trust is necessary for the smooth functioning of a democratic society Yet many recent surveys suggest that trust is on the wane in the United States Does this foreshadow trouble for the nation In *Cooperation Without Trust* Karen Cook Russell Hardin and Margaret Levi argue that a society can function well in the absence of trust Though trust is a useful element in many kinds of relationships they contend that mutually beneficial cooperative relationships can take place without it *Cooperation Without Trust* employs a wide range of examples illustrating how parties use mechanisms other than trust to secure cooperation Concerns about one's reputation for example could keep a person in a small community from breaching agreements State enforcement of contracts ensures that business partners need not trust one another in order to trade Similarly monitoring worker behavior permits an employer to vest great responsibility in an employee without necessarily trusting that person Cook Hardin and Levi discuss other mechanisms for facilitating cooperation absent trust such as the self regulation of professional societies management compensation schemes and social capital networks In fact the authors argue that a lack of trust or even outright distrust may in many circumstances be more beneficial in creating cooperation Lack of trust motivates people to reduce risks and establish institutions that promote cooperation A stout distrust of government prompted America's founding fathers to establish a system in which leaders are highly accountable to their constituents and in which checks and balances keep the behavior of government officials in line with the public will Such institutional mechanisms are generally more dependable in securing cooperation than simple faith in the trustworthiness of others *Cooperation Without Trust* suggests that trust may be a complement to governing institutions not a substitute for them

Whether or not the decline in trust documented by social surveys actually indicates an erosion of trust in everyday situations this book argues that society is not in peril Even if we were a less trusting society that would not mean we are a less functional one A Volume in the Russell Sage Foundation Series on Trust
