Chinese Foreign Policy Think Tanks and China's Policy Towards Japan Xuanli Liao, 2006 Examines Chinese foreign policy think tanks and their influence in China's foreign policy towards Japan between the late 1970s and late 1990s Through case studies this book demonstrates a growing pluralistic trend in post Mao China's foreign policy making process **China - U.S. relations in the 21st century fostering cooperation preventing conflict.** , Image, Perception, and the Making of U.S.-China Relations Hongshan Li, Zhaohui Hong, 1998 Image Perception and the Making of U S China Relations examines major events in the history of the relationship between the U S and China to show the development and effects of national images and perceptions These essays expose the effects of ideology as represented through foreign policy and the actions of leaders as well as the role of the media and governments in shaping public opinion and attitudes They show the evolution of the influential forces from the nineteenth century through the twentieth century In each country a small group of people has always controlled these forces by manipulating the power of the media and governments The nature of this situation changed national perceptions as power often moved from one small group to another As a result of manipulating the images and perceptions of each country these biased and untrue views have inevitably led to conflict between the two countries A *Companion to American Foreign Relations* Robert Schulzinger, 2008-04-15 This is an authoritative volume of historiographical essays that survey the state of U S diplomatic history The essays cover the entire range of the history of American foreign relations from the colonial period to the present They discuss the major sources and analyze the most influential books and articles in the field Includes discussions of new methodological approaches in diplomatic history

The Taiwan Issue In Sinoamerican

Strategic Relations Martin L Lasater, 2019-07-09 The first two years of the Reagan administration saw a close correlation between improved unofficial relations between Washington and Taipei and a deterioration of strategic cooperation between Washington and Beijing These developments led many U S officials and scholars to conclude that U S security interests may require periodic concessions over Taiwan to ensure China's cooperation in countering the Soviet threat Rejecting this view Mr Lasater argues that Washington's and Beijing's bilateral relations with Moscow and not the Taiwan issue are the key international determinants of Sino American strategic cooperation Examining the parameters of that cooperation and the role of Taiwan in Sino American relations Mr Lasater suggests that Beijing is deliberately using U S security concerns to seek concessions on Taiwan and other issues He advises a policy that stands firm in negotiations with the Chinese and that resists the temptation to make politically expedient concessions a more balanced course of action whereby improved relations with Beijing are sought concurrently with the maintenance of friendly unofficial ties with Taipei
