Making Globalisation Robert J. Holton, 2017-03-23 This book offers a clear and concise account of the key debates in the globalization literature serving as an accessible introduction to students new to the topic It deals even handedly with all the various dimensions of globalization political economic social and cultural and particularly draws attention to the role of people in processes of globalization The book's historical dimension and its multicultural focus ensure that globalization is shown neither to be an inexorable process nor one that can be equated simply with Westernization *Making Globalization Work for Women* Valentine M. Moghadam, Suzanne Franzway, Mary Margaret Fonow, 2011-11-28 *Making Globalization Work for Women* explores the potential for trade unions to defend the socioeconomic rights of women in a global context Looking at labor policies and interviews with people in unions and nongovernmental organizations the essays diagnose the problems faced by women workers across the world and assess the progress that unions in various countries have made in responding to those problems Some concerns addressed include the masculine culture of many unions and the challenges of female leadership within them laissez faire governance and the limited success of organizations working on these issues globally *Making Globalization Work for Women* brings together in a synthetic and fruitful conversation the work and ideas of

feminists unions NGOs and other human rights workers *Global Transformations* David Held,1999 In this book the authors set forth a new model of globalization that lays claims to supersede existing models and then use this model to assess the way the processes of globalization have operated in different historic periods in respect to political organization military globalization trade finance corporate productivity migration culture and the environment Each of these topics is covered in a chapter which contrasts the contemporary nature of globalization with that of earlier epochs In mapping the shape and political consequences of globalization the authors concentrate on six states in advanced capitalist societies SIACS the United States the United Kingdom Sweden France Germany and Japan For comparative purposes other states particularly those with developing economics are referred to and discussed where relevant The book concludes by systematically describing and assessing contemporary globalization and appraising the implications of globalization for the sovereignty and autonomy of SIACS It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation

Education in the Era of Globalization Klas Roth,Ilan Gur-Ze'ev,2007-10-11 Education seems to have lost its orientation in Western culture and is in disarray all over the globe in time of global transitions Globalizing capitalism is the general headline for some of the most profound deep and dramatic developments in our era that education must address The response of educationalists is only in its beginning and there is an urgent need to address the dramatic changes inflicted on promised to our era philosophically sociologically culturally ecologically physically aesthetically and politically In the proposed book we try to address the challenge of globalization to education in the broadest sense of the concept of education by treating this challenge in various perspectives through different disciplines and topics within which the challenge of globalization is conceived as the most profound dynamic of this historical moment a development that is realized in many diverse and different levels fields and spaces of human and natural existence The various texts in this collection written by some of the famous and interesting scholars in the field of philosophy of education and the sociology of education try to address the richness and diversity of the challenge of globalization It tries to reconstruct historically sociologically and philosophically the roots the practices and the fruits of globalization as a threat and as a gateway for new possibilities for today s education The collection is a meeting point for research that is not only analytical and critical but also offers new roads and possibilities for education in the 21st century in face of globalization As such this collection is unique in this field and opens the door for further research and public discussion on the future role of education Democracy in a Global World Deen K. Chatterjee,2008 The chapters in this volume deal with timely issues regarding democracy in theory and in practice in today s globalized world Authored by leading political philosophers of our time they appear here for the first time The essays challenge and defend assumptions about the role of democracy as a viable political and legal institution in response to globalization keeping in focus the role of rights at the normative foundations of democracy in a pluralistic world

Through an examination of key topics of current relevance with contrasting views of the leading theorists the chapters address the most relevant theories and forms of globalization traditional democratic paradigms and their limits public deliberation and democratic participation the moral hazards of imperial democracy and the future of liberal democracy In addition to suggesting new perspectives on democracy they use the current debate on justice human rights sovereignty and cultural relativism to shed light on enduring questions about politics culture and global development This timely and provocative collection will be of interest to anyone concerned with democracy human rights global justice economic development poverty international law peace and various aspects of globalization
