A Global History of Modern Historiography Georg G Iggers, Q. Edward Wang, Supriya Mukherjee, 2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures

Lessons in Being Chinese Mette Halskov Hansen, 2011-10-01 Open access edition DOI 10.6069/9780295804125 Two very different ethnic minority communities the Naxi of the Lijiang area in northern Yunnan and the Tai Dai of Sipsong Panna Xishuangbanna along Yunnan's border with Burma and Laos are featured in this comparative study of the implementation and reception of state minority education policy in the People's Republic of China Based on field research and historical sources Lessons in Being Chinese argues that state policy which is intended to be applied uniformly across all minority regions in fact is much more successful in some than in others In Lijiang elite members of the Naxi ethnic group minzu have a centuries old connection with Chinese state educational systems as avenues

to social mobility and have continued this tradition under Communist rule. They participate enthusiastically in the present system using education to gain official and professional positions. In contrast to the Lijiang area, Sipsong Panna functioned in many ways as a separate kingdom until 1950 with its own script and a separate educational system centered in Theravada Buddhist monasteries. Today many Tai in that area still prefer monastic education for their sons and most parents are indifferent to state education. This study finds that standardized homogenizing state education is in itself incapable of instilling in students an identification with the Chinese state, ironically often increasing ethnic identity. Lessons in Being Chinese enhances our understanding of how state policy toward minorities works in many areas of life and its conclusions can be extended well beyond the sphere of education. It will be of interest to both anthropologists and educators. **Modern China** Geeta Kochhar, 2019-02-12 This book looks at the transition of modern Chinese society in terms of its culture and literature. Since the economic reforms and open door policy in 1978, the Chinese society has undergone a drastic transformation. It is headed towards becoming an ultra modern advanced society and a world superpower. Among the pillars of great change are the advances in technology and communication that have reshaped Chinese society. This volume explores China's march towards modernity in the 21st century as defined by its own terms. It discusses China's social structure, ageing population, gender stratification, marriages, cultural identity, cosmopolitanism, its history of communism, law, economic reforms, financial institutions, and challenges of the global markets. The book sheds light on Chinese literature and media and brings out various facets of social changes across time. With its topical debates and issues, this volume will be useful to scholars and researchers of Chinese studies, East Asian studies, geopolitics, area studies, international relations, politics, and foreign policy, along with think tanks and those in media and journalism. *Global History in China* Xin Fan, 2024-06-30 This book explores global history as an emerging field of scholarly studies in China today. Readers are invited to rethink the origin of global history in China and to examine its current state. Chinese scholarship is rooted in a warm appreciation of globalization in the age of Opening up and Reform and presented as a trendy transnational intellectual movement at the opening of the twenty-first century. On the one hand, global history claims an identity of the new, eager to criticize the Eurocentric bias embedded in the narratives of the old ones from world history; on the other hand, as an emerging field, it is yet to face competitions from national histories and area studies which are nurtured by latest state initiatives with outspoken political agendas. As a whole, global history captures Chinese scholars' tenacious interest in studying globalization through the lens of history. This book will interest historians, China scholars, and those trying to grasp the Chinese perspective on the world.
