technologies and the information they disseminate *Al Jazeera and the Global Media Landscape* Tine Ustad Figenschou, 2013-10-15 This book analyzes how and why Al Jazeera English AJE became the channel of choice to understand the massive protests across the Arab world 2011 Aiming to explain the Al Jazeera moment it tracks the channel's bumpy road towards international recognition in a longitudinal in depth analysis of the channel's editorial profile and strategies Studying AJE from its launch in mid November 2006 to the Arab Spring it explains and problematizes the channel's ambitious editorial agenda and strategies examines the internal conflicts practical challenges and minor breakthroughs in its formative years The Al Jazeera phenomenon has received massive attention but it remains under researched The growth of transnational satellite television has transformed the global media landscape into a complex web of multi vocal multimedia and multi directional flows Based on a combination of policy production and content analysis of comprehensive empirical data the book offers an innovative perspective on the theorization of global news contra flows By problematizing the distinctive characteristics of AJE it examines the strategic motivation behind the channel and the ways in which its production processes and news profile are meant to be different from its Anglo American competitors These questions underscore a central nexus of the book the changing relationship between transnational satellite news and power Modern Arab Journalism Noha Mellor, 2007-11-30 Modern Arab Journalism offers a new outlook in studying Arab news media It approaches its subject from an innovative angle asking a series of key questions How is Arab journalism different from or similar to journalism in other countries What defines the tasks of journalists Who has access to this field How is power distributed inside the field of Arab journalism When were the media programs launched at Arab universities and what characterizes them Although the field of Arab journalism has received tremendous attention from the public as well as journalistic circles around the world in recent times this book presents the first detailed exploration of the area opening up a new research agenda and challenging the concepts taken for granted in Arab media scholarship **Social Semiotics of Arabic Satellite Television** Ali Darwish, 2009 Arabic satellite television is a phenomenon that has swept the Arab world in less than two decades and is said to have dramatically changed the Arab region It has created a world of contrasts and contradictions between tradition and liberalism and a polarization of views and opinions all vying for dominance and control This book examines the social semiotics of Arabic satellite television and studies the multimodal representations of Arab social and cultural values and their implied meanings in a communication medium that heavily relies on imported western models Science Journalism in the Arab World Abdullah Alhuntushi, Jairo Lugo-Ocando, 2023-01-01 This book examines the main issues and challenges that science journalism faces in the MENA region while analyzing how journalists in these countries cover science and engage with scientists Most countries in the Middle East and North Africa region have set an ambitious goal for 2030 to transform their societies and become knowledge economies This means modernizing institutions and encouraging people to embrace Science Technology Engineering and Mathematics as part of their daily lives This book's claims that the main vehicle to

achieve this goal is science news reporting as it continues to be the main platform to disseminate scientific knowledge to the general public Simultaneously it is also poorly equipped to achieve this task Interviewing dozens of journalists the authors looked at specific areas such as the gender divide and its effects on science news reporting as well as the role of religion and culture in shaping journalism as a political institution The authors conclude that traditional normative assumptions as to why science reporting does not live up to expectations need to be reviewed in light of other more structural problems such as lack of skills and specialization in science communication in the region In so doing the book sets out to understand the past present and future of science news in one of the most challenging regions in the world for journalists

Palestinians in Jerusalem and Jaffa 1948 examines Palestinian Arab society institutions and fighters in Jerusalem and Jaffa during the conflict It is one of the first books in English that deals with the Palestinian Arabs at this crucial and tragic moment in their history with extensive use of Arabic sources and an inquiry from the Palestinian vantage point It examines the causes of the social collapse of the Palestinian Arab communities in Jerusalem and Jaffa during the 1948 inter communal war and the impact of this collapse on the military defeat This book reveals that the most important internal factors to the Palestinian defeat were the social changes that took place in Arab society during the British Mandate namely internal migration from rural areas to the cities the shift from agriculture to wage labour and the rise of the urban middle class By looking beyond the well established external factors this study uncovers how modernity led to a breakdown within Palestinian Arab society widening social fissures without producing effective institutions and thus alienating social classes both from each other and from the leadership With careful examination of a range of sources and informed analysis of Palestinian social history *Palestinians in Jerusalem and Jaffa 1948* is a key resource for students and scholars interested in the modern Middle East Palestinian Studies the Arab Israeli conflict and Israel Studies **Saudi Aramco 2030** Mohamed A. Natasha Iskander, Natasha Nefertiti Iskander, 2021-11-09 Regulation how the politics of skill become law Production how skill makes cities Skill how skill is embodied and what it means for the control of bodies Protest how skillful practice becomes resistance Body how definitions of skill cause injury Earth how the politics of skill shape responses to climate change *Museums in Arabia* Karen Exell, Sarina Wakefield, 2016-05-12 Museum activity has in recent years undergone major and rapid development in the Arabian Peninsula with the regeneration of existing museums as well as the establishment of new ones Alongside such rapid

expansion questions are inevitably raised as to the new challenges museums face in this region and whether the museum as a central focus of heritage preservation also runs the risk of overshadowing local forms of heritage performance and preservation. With contributions from leading academics from a range of disciplines and heritage practitioners with first hand experience of working in the region, this volume addresses the issues and challenges facing museums in Kuwait, Saudi Arabia, Qatar, Yemen and the UAE. It focuses on the themes of politics, public engagement and the possibility of a new museum paradigm which might appropriately reflect the interests and culture of the region. The interdisciplinary approaches analyse museum development from both an inside and outside perspective, suggesting that museums do not follow a uniform trajectory across the region but are embedded within each state's socio-cultural context, individual government agendas and political realities. Including case study analysis which brings the more marginal nations into the debates, as well as new empirical data and critical evaluation of the role of the museum in the Arabian Peninsula societies, this book adds fresh perspectives to the study of Gulf heritage and museology. It will appeal to regional and international practitioners and academics across the disciplines of museum studies, cultural studies and anthropology, as well as to anyone with an interest in the Gulf and Middle East.
