The language of the fantastic left its mark upon many different thinkers in 19th century Europe Marx's comparison of consumer goods to fetish objects works by Villiers de l'Isle Adam or other novelists about machines that assume lives of their own or the diagnoses of psychological illness offered by doctors in Maupassant's tales all blur the lines between scientific

description and beliefs in the magical Building upon a wealth of critical studies devoted to the fantastic and upon Freud's theory of the unconscious Jutta Fortin proposes that many classic stories of the fantastic undermine basic psychological mechanisms that are designed to help their users cope with shocking or disturbing events By defining five of these defence mechanisms and analyzing stories by eight writers that both illustrate and subvert such mechanisms Dr Fortin offers reasons why fantastic stories appealed to those readers who wished to better understand human motivations BOOK JACKET

Instinct and Revelation Alondra Oubre, 2013-10-11 Instinct and Revelation revolves around the hypothesis that ritual behavior and imaginative awareness in early hominids may have helped to spawn the evolution of the human brain and human consciousness Using an integral perspective comparable with systems theory the book carefully interweaves fact and theory from physical and cultural anthropology psychobiology and the brain sciences psychology and to a lesser degree eastern philosophy This book breaks from tradition by discussing from a primarily anthropological perspective the origin of human consciousness within a philosophical framework that embraces precepts from human evolution evolutionary psychology the neurosciences biocultural anthropology and cultural symbolic anthropology *Empathic Care for Children with Disorganized Attachments* Chris Taylor, 2012 This book is a practical guide to caring for children and young people with disorganised attachment and related emotional and psychological difficulties **Attachment and Character** Edward Harcourt, 2021-10-14 There are many exciting points of contact between developmental psychology in the attachment paradigm and the kinds of questions first raised by Aristotle's ethics and which continue to preoccupy moral philosophers today The book brings experts from both fields together to explore them for the first time to demonstrate why philosophers working in moral psychology or in virtue ethics better the triangle of relationships between the concepts of human nature human excellence and the best life for human beings should take attachment theory more seriously than they have done to date Attachment theory is a theory of psychological development And the characteristics attachment theory is a developmental theory of the various subvarieties of attachment are evaluatively inflected to be securely attached to a parent is to have a kind of attachment that makes for a good intimate relationship But obviously the classification of human character in terms of the virtues is evaluatively inflected too So it would be strange if there were no story to be told about how these two sets of evaluatively inflected descriptions relate to one another Attachment and Character explores the relationship between attachment and prosocial behaviour probes the concept of the prosocial itself and the relationship between prosocial behaviour virtue and the quality of the social environment the question whether there even are such things as stable character traits and whether attachment theory in locating the origins of virtue in secure attachment and attachment dispositions in human evolutionary history gives support to ethical naturalism in any of the many meanings of that expression **Sex Offenders and the Internet** Dennis Howitt, Kerry Sheldon, 2009-09-28 Online the opportunity to commit a crime is never more than a few clicks away Sex Offenders and the Internet explores the nature of online sex
