## **Making And Marketing Arms:**

**Making and Marketing Arms** Edward A. Kolodziej, 2014-07-14 France ranks as the world's third largest arms exporter and supplies arms and military technology to over a hundred countries. This book exposes the compelling aims and interests, national independence, security, economic welfare, foreign influence, and grandeur that explain the nation's successes in arms production and transfers. Originally published in 1987, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. **The 1992 Project and the**

**Future of Integration in Europe** Dale L. Smith, James Lee Ray, 2016-09-16 The term 1992 Project refers to the portion of the 1987 Single European Act that commits the European Community to the completion of a single integrated market by 1992. The project has brought about a dramatic revival of interest in the EC, and this volume is a product of that revival. It provides evaluations and estimates of the future of the integration process and of the EC itself. The contributors share two broad themes. The first is a view of the integration process as a multilevel game. The second is consideration of the consequences of that process. Manufacturing Advantage Lindsay Schakenbach Regele, 2019-02-19

How manufacturing textiles and guns transformed the United States from colonial dependent to military power. In 1783 the Revolutionary War drew to a close, but America was still threatened by enemies at home and abroad. The emerging nation faced tax rebellions, Indian warfare, and hostilities with France and England. Its arsenal, a collection of hand-me-down and beat-up firearms, was woefully inadequate, and its manufacturing sector was weak. In an era when armies literally froze in the field, military preparedness depended on blankets and jackets, the importation of which the British Empire had coordinated for over 200 years. Without a ready supply of guns, the new nation could not defend itself without its own textiles; it was at the economic mercy of the British. Domestic industry offered the best solution for true economic and military independence. In Manufacturing Advantage, Lindsay Schakenbach Regele shows how the US government promoted the industrial development of textiles and weapons to defend the country from hostile armies and hostile imports. Moving from the late 1700s through the Mexican American War, Schakenbach Regele argues that both industries developed as a result of what she calls national security capitalism, a mixed enterprise system in which government agents and private producers brokered solutions to the problems of war and international economic disparities. War and State Department officials played particularly key roles in the emergence of American industry, facilitating arms makers and power loom weavers in the quest to develop industrial resources. And this defensive strategy, Schakenbach Regele reveals, eventually evolved to promote westward expansion as well as America's growing commercial and territorial empire. Examining these issues through the lens of geopolitics.

Manufacturing Advantage places the rise of industry in the United States in the context of territorial expansion diplomacy and warfare Ultimately the book reveals the complex link between government intervention and private initiative in a country struggling to create a political economy that balanced military competence with commercial needs **The Best System**

**Money Can Buy** Carolyn Warner, 2011-03-15 As the European Union moved in the 1990s to a unified market and stronger common institutions most observers assumed that the changes would reduce corruption Aspects of the stronger EU promised to preclude or at least reduce malfeasance regulatory harmonization freer trade and privatization of publicly owned enterprises Market efficiencies would render corrupt practices more visible and less common In *The Best System Money Can Buy* Carolyn M Warner systematically and often entertainingly gives the lie to these assumptions and provides a framework for understanding the persistence of corruption in the Western states of the EU In compelling case studies she shows that under certain conditions politicians and firms across Europe chose to counter the increased competition they faced due to liberal markets and political reforms by resorting to corruption More elections have made ever larger funding demands on political parties privatization has proved to be a theme park for economic crime and party profit firms and politicians collude in many areas where EU harmonization has resulted in a net reduction in law enforcement powers and state led export promotion efforts especially in the armaments infrastructure and energy sectors have virtually institutionalized bribery The assumptions that corruption and modernity are incompatible or that Western Europe is somehow immune to corruption simply do not hold as Warner conveys through colorful analyses of scandals in which large corporations politicians and bureaucrats engage in criminal activity in order to facilitate mergers and block competition and in which officials accept private payments for public services rendered At the same time the book shows the extent to which corruption is driven by the very economic and political reforms thought to decrease it **Journal of Legal Studies**, 1990 **Limiting the**

**Proliferation of Weapons** Jean-François Rioux, 1992-11-15 An international team of arms control experts addresses important questions raised by the use of export sales restrictions in controlling the spread of weapons In non technical language they examine vital issues relating to ballistic missiles as well as to nuclear chemical biological and conventional weapons **Trappings of Power** Janne E. Nolan, 2010-12-01 Since the beginning of the crisis precipitated by Iraq s

invasion of Kuwait in August 1990 the threat posed by Iraq s arsenal of ballistic missiles has been the focus of international attention In the opening days of the U S led military counteroffensive beginning on January 16 1992 Iraq launched ballistic missiles against population centers in Israel and military bases in Saudi Arabia The attacks intensified the terror of the war and prompted renewed efforts by the multinational force to destroy Saddam Hussein s military machine The countries aligned against Iraq were prepared for attacks by chemically armed missiles but Iraq s missile force proved to be of little military consequence The missiles that survived the opening hours of Operation Desert Storm were conventionally armed inaccurate and unreliable Most of those that were actually launched either were intercepted by American antimissile

defenses or failed to hit vital targets But the political impact of the missiles was inestimable The strikes symbolized Iraq's determination to prosecute the war no matter what the cost By threatening to involve Israel they created severe tensions and posed the risk that multinational military coalition would be dissolved and they underscored the potential vulnerability of all the states in the region to Iraqi aggression In this book Janne E Nolan argues that the use of missiles is a harbinger of the altered international security environment confronting the United States and its allies in the late twentieth century Long believed to be a distant prospect the adoption of technological resources to missile development is already occurring in over a dozen developing countries many of them long standing regional antagonists These capabilities present complicated challenges to American interests and foreign policy challenges that have only begun to be explored as a result of the Iraqi crisis The author examines the evolution
