Making Clothes For Children:

Making, Selling and Wearing Boys' Clothes in Late-Victorian England Clare Rose, 2016-12-05 There has been a great deal of recent interest in masculine clothing examining both its production and consumption and the ways in which it was used to create individual identities and to build businesses from 1850 onwards Drawing upon a wide range of sources this book studies the interaction between producers and consumers at a key period in the development of the ready made clothing industry It also shows that many innovations in advertising clothing usually considered to have been developed in America had earlier British precedents To counter the lack of documentary evidence that has hitherto hampered research into the dress practices of non elite groups this book utilises thousands of unpublished visual documents These include hundreds of manufacturers designs which underline an unexpected degree of investment by manufacturers in boys clothing and which was matched by heavy investment in advertising with thousands of images of boys clothing for shop catalogues in the Stationers Hall copyright archive Another key source is the archives of Dr Barnardo s Homes This extraordinary collection contains over 15 000 documented photographs of boys entering between 1875 and 1900 allowing us to look beyond official polarization of raggedness and respectability used by charities and social reformers of all stripes and to establish the clothing that was actually worn by a large sample of boys A close analysis of 1 800 images reveals that even when families were impoverished they strove to present their boys in ways that reflected their position in the family group and in society By drawing on these visual sources and linking the design and retailing of boys clothing with social cultural and economic issues this book shows that an understanding of the production and consumption of the boys clothing is central to debates on the growth of the consumer society the development of mass market fashion and concepts of childhood and masculinity

Clothing and Fashion in Southern History Ted Ownby, Becca Walton, 2020-07-23 Contributions by Grace Elizabeth Hale Katie Knowles Ted Ownby Jonathan Prude William Sturkey Susannah Walker Becca Walton and Sarah Jones Weicksel Fashion studies have long centered on the art and preservation of finely rendered garments of the upper class and archival resources used in the study of southern history have gaps and silences Yet little study has been given to the approach of clothing as something made worn and intimately experienced by enslaved people incarcerated people and the poor and working class and by subcultures perceived as transgressive The essays in the volume using clothing as a point of departure encourage readers to imagine the South's centuries long engagement with a global economy through garments with cotton harvested by enslaved or poorly paid workers milled in distant factories designed with influence from cosmopolitan tastemakers and sold back in the South often by immigrant merchants Contributors explore such topics as how free and enslaved women with few or no legal rights claimed to own clothing in the mid 1800s how white women in the Confederacy claimed the making of clothing as a form of patriotism how imprisoned men and women made and imagined their clothing and clothing cooperatives in civil rights era Mississippi An introduction by editors Ted Ownby and Becca Walton asks how best to begin studying clothing and fashion in southern history and an afterword by Jonathan Prude asks how best to conclude

Inskip,1926 **Clothing and Landscape in Victorian England** Rachel Worth,2018-01-30 In the context of this rapidly changing world Rachel Worth explores the ways in which the clothing of the rural working classes was represented visually in paintings and photographs and by the literary sources of documentary autobiography and fiction as well as by the

particular pattern of survival and collection by museums of garments of rural provenance Rachel Worth explores ways in which clothing and how it is represented throws light on wider social and cultural aspects of society as well as how traditional styles of dress like men's smock frocks or women's sun bonnets came to be replaced by fashion Her compelling study with black white and colour illustrations both adds a broader dimension to the history of dress by considering it within the social and cultural context of its time and discusses how clothing enriches our understanding of the social history of the Victorian period
