silence in policymaking can be deafening When advocates for a disadvantaged group decline to speak up not only are their concerns not recorded or acted upon but also the collective strength of the unspoken argument is lessened a situation that undermines the workings of deliberative democracy by reflecting only the concerns of more powerful interests But why do so many advocates remain silent on key issues they care about and how does that silence contribute to narrowly defined policies What can individuals and organizations do to amplify their privately expressed concerns for policy change In *Healthy Voices Unhealthy Silence* Colleen M Grogan and Michael K Gusmano address these questions through the lens of state level health care advocacy for the poor They examine how representatives for the poor participate in an advisory board process by tying together existing studies extensive interviews with key players and an in depth first hand look at the Connecticut Medicaid advisory board s deliberations during the managed care debate Drawing on the concepts of deliberative democracy agenda setting and nonprofit advocacy Grogan and Gusmano reveal the reasons behind advocates often unexpected silence on major issues assess how capable nonprofits are at affecting policy debates and provide prescriptive advice for creating a participatory process that adequately addresses the health care concerns of the poor and dispossessed Though exploring specifically state level health care advocacy for the poor the lessons Grogan and Gusmano offer here are transferable across issue areas and levels of government Public policy scholars advocacy organizations government workers and students of government administration will be well served by this significant study

### **Congress and the Politics of Problem Solving**

E. Scott Adler, John D. Wilkerson, 2013-01-14 How do issues end up on the agenda Why do lawmakers routinely invest in program oversight and broad policy development What considerations drive legislative policy change For many Congress is an institution consumed by partisan bickering and gridlock Yet the institution s long history of addressing significant societal problems even in recent years seems to contradict this view Congress and the Politics of Problem Solving argues that the willingness of many voters to hold elected officials accountable for societal conditions is central to appreciating why Congress responds to problems despite the many reasons mustered for why it cannot The authors show that across decades of policy making problem solving motivations explain why bipartisanship is a common pattern of congressional behavior and offer the best explanation for legislative issue attention and policy change

contemporary global economic policies are made by which institutions under what ideologies and how they are enforced The author reveals the central roles played by organizations such as the IMF and the World Bank in supervising the livelihoods of over 2 5 billion people He shows that neoliberal economic policy is enforced by a few thousand unelected and unaccountable experts in the North and has failed to deliver tolerable living conditions for the poor The book argues for a new geographic theory of power exercised through dominant institutions concentrated in hegemonic power centers It seeks to transform the existing geography of policy making power by exposing its structures centers and mechanisms critiquing its intellectual foundations uncovering its un democratic justifications and passionately supporting its opponents The conclusion makes a further positive contribution by exploring policy alternatives that point the way forward      **Index of Economic Articles in Journals and Collective Volumes** ,1983
