Photography and the Making of the Nazi Racial Community Julie R. Keresztes, 2025-01-15 Photography and the Making of the Nazi Racial Community examines the role of photography in the construction of the Nazi Volksgemeinschaft a racially exclusive community during the Third Reich Julie R Keresztes explores how the dictatorship promoted photography for those who belonged to that community and excluded Jews from the practice As Nazi officials dispossessed Jewish

photographers and robbed them of their equipment studios and eventually their lives they made photography more accessible to non Jewish Germans But they inadvertently created spaces for photography to be used as resistance and revenge in concentration camps where forced laborers salvaged photographs that exposed the extermination of Europe s Jews As the victims of Nazi persecution used photography to gather evidence of the Holocaust German troops and their families used photography to portray themselves as dutiful members of the Volksgemeinschaft rather than show the reality of war and genocide Ultimately Photography and the Making of the Nazi Racial Community shows how the configuration of photography along racial lines shaped the imagery of the Second World War Published in Association with the US Holocaust Memorial Museum

Making Movies into Art Kaveh Askari, 2014-12-12 Focusing on early cinema's relationship with the pictorial arts this pioneering study explores how cinema's emergence was grounded in theories of picture composition craft and arts education from magic lantern experiments in 1890s New York through to early Hollywood feature films in the 1920s Challenging received notions that the advent of cinema was a celebration of mechanisation and a radical rejection of nineteenth century traditions of representation Kaveh Askari instead emphasises the overlap between craft traditions and modernity in early film Opening up valuable new perspectives on the history of film as art Askari links American silent cinema with the practice of teaching the public how to appreciate fine art charts its entrance into arts education via art schools and university film courses shows how concepts of artistic production entered films through a material interest in the studio and examines the way in which Maurice Tourneur and Rex Ingram made early art films by shaping an image of the film director around the idea of the fine artist

Sitvast,2020-10-28 In healthcare nurses often have a great deal of contact with patients on a 24 hour basis They are in a position to hear the patient s stories not only while giving care but also during more informal communication throughout the day This puts them in a position to use their response to patients in a more conscious manner and realize therapeutic aims by exploiting narrative means in a methodological way This book extensively describes how this can be accomplished not only through a theoretical expos but also using case studies In addition to this pragmatic focus it explains how narrative relates to larger concepts such as self management shared decision making recovery and person centred care and shows that narrative can be a vehicle to these desired outcomes The book also considers organizational aspects of narrative oriented healthcare by introducing a model in which narrative plays an important role As such it will allow nurses in the field to make a paradigmatic switch from a perspective dominated by delivery of care to one that is person centred recovery oriented and dialogic in nature *Photography for Everyone* Kerry Ross,2015-06-24

The Japanese passion for photography is almost a cliché but how did it begin Although Japanese art photography has been widely studied this book is the first to demonstrate how photography became an everyday activity Japan s enthusiasm for photography emerged alongside a retail and consumer revolution that marketed products and activities that fit into a modern tasteful middle class lifestyle Kerry Ross examines the magazines and merchandise promoted to ordinary Japanese people in the early twentieth century that allowed Japanese consumers to participate in that lifestyle and gave them a powerful tool to define its contours Each chapter discusses a different facet of this phenomenon from the revolution in retail camera shops to the blizzard of socially constructive how to manuals and to the vocabulary of popular aesthetics that developed from enthusiasts sharing photos Ross looks at the quotidian activities that went into the entire picture making process activities not typically understood as photographic in nature such as shopping for a camera reading photography magazines and even preserving one s pictures in albums These very activities promoted and sponsored by the industry embedded the camera in everyday life as both a consumer object and a technology for understanding modernity making it the irresistible enterprise that Eastman encountered in his first visit to Japan in 1920 when he remarked that the Japanese people were almost as addicted to the Kodak habit as ourselves

the Debschitz School the book explores women's important contributions to modern German culture as collectors consumers critics designers educators and patrons This book offers a new interpretation of this vibrant period by considering diverse manifestations of historical female agency that pushed against historically entrenched conventions and gender roles The book's rigorous approach reshapes Jugendstil historiography by positing women's lived experiences against dominant ideologies that emerged at this precise moment In short the book advocates women as an integral part of the emergence dissemination and reception of Jugendstil and questions the deeply gendered histories of this key period in modern art architecture and design Encyclopedia of Nineteenth-Century Photography John Hannavy,2013-12-16 The Encyclopedia of
