Making Of American Liberal Theology Idealism Realism And Modernity 1900 1950:

The Making of American Liberal Theology Gary J. Dorrien, 2003-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought. The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism/atheism. It is defined by its openness to modern intellectual inquiry, its commitment to the authority of individual reason and experience, its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people. Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E. Channing, Ralph Waldo Emerson, Horace Bushnell, Henry Ward Beecher, Elizabeth Cady Stanton and Charles Briggs. Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom. **Early**

Ecotheology and Joseph Sittler Panu Pihkala, 2017 When did Christians begin to address environmental questions? What can be learned from these pioneering thinkers? This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature. The focal point is the work of Joseph Sittler (1904-1987), an American Lutheran and ecumenical theologian. The role of these early ecotheologians is discussed in relation to environmental history and education. The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s. *Series: Studies in Religion and the Environment, Studien zur Religion und Umwelt, Vol. 12, Subject: Religious Studies, Environmental Studies, Ecotheology.* Joseph Sittler. *The Bloomsbury Encyclopedia of Philosophers in America* John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought, *The Bloomsbury Encyclopedia of Philosophers in America* presents an indispensable reference work. Selecting over 700 figures from the *Dictionary of Early American Philosophers* and the *Dictionary of Modern American Philosophers*, this condensed edition includes key contributors to philosophical thought. From 1600 to the present day, entries cover psychology, pedagogy, sociology, anthropology, education, theology, and political science. Before these disciplines came to be considered distinct from philosophy, clear and accessible, each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. Featuring a new preface by the editor and a comprehensive introduction, *The Bloomsbury Encyclopedia of Philosophers in America* includes 30 new entries on twenty-first century thinkers including Martha Nussbaum and Patricia Churchland. With in-depth overviews of Waldo Emerson, Margaret Fuller, Noah Porter, Frederick Rauch, Benjamin Franklin, Thomas Paine, and Thomas Jefferson, this is an invaluable one-stop research volume to understanding leading figures in American thought and the development of American intellectual history. **Mysticism and the Inner Light in the Thought of Rufus Jones, Quaker** Helen Holt, 2021-11-01 Rufus Jones' promotion of mysticism and his novel formulation of the Inner Light, which saw God as an inherent part of human nature, were sweepingly influential within

liberal Quakerism in the early 20th century and have had long lasting effects on Quaker faith and practice In spite of the importance of his ideas however they have received little critical attention In *Mysticism and the Inner Light* Helen Holt provides a systematic analysis of Jones thought in historical context showing how he attempted to synthesize his own experience with aspects of the psychology of William James the idealism of Josiah Royce and liberal Christianity She finds that because Jones presented his ideas informally he is sometimes misinterpreted especially regarding his views on Christ and humanism The book draws on Jones extensive corpus and on unpublished archived letters

Scientific and Political Freedom in Islam Uriya Shavit, 2017-02-24 The modernist apologetic approach to the relation between revelation and science and politics has been a central part of Arab discourses on the future of Muslim societies for over a century This approach introduced historical and theological narratives and interpretative mechanisms that contextualize reason and freedom in Islamic terms to argue that unlike with Christianity it is possible for Muslim societies to be technologically and politically advanced without forfeiting revelation as an all encompassing legally binding guide *Scientific and Political Freedom in Islam* critically examines the coherence and consistency of modernist apologetic scholars This is done through a discussion of their general theorizing on reason and freedom which is then followed by discussions of their commentaries on specific scientific and political issues in light of their general theorizing Regarding the former the focus is Darwin's theory of evolution while the universality of the Biblical flood the heliocentric model the Big Bang model and Freudianism are also discussed Regarding the latter the focus is Islam's desired structure of government and concept of participatory politics while individual freedoms are also discussed The book argues that the modernist apologetic approach has great potential to be a force for liberalization but also possesses inherent limitations that render its theory on the relation between revelation and freedom self contradictory Introducing a significant body of new information on the reasons for the failure of secularism and democracy and the attitudes towards Darwinism in the Arab world this book is a valuable resource for students and scholars of Islamic Studies comparative religion democracy studies and evolution studies

The World Come of Age Lilian Calles Barger, 2018-07-02 On November 16 2017 Pope Francis tweeted Poverty is not an accident It has causes that must be recognized and removed for the good of so many of our brothers and sisters With this statement and others like it the first Latin American pope was associated in the minds of many with a stream of

theology that swept the Western hemisphere in the 1960s and 70s the movement known as liberation theology Born of chaotic cultural crises in Latin America and the United States liberation theology was a trans American intellectual movement that sought to speak for those parts of society marginalized by modern politics and religion by virtue of race class or sex Led by such revolutionaries as the Peruvian Catholic priest Gustavo Guti rrez the African American theologian James Cone or the feminists Mary Daly and Rosemary Radford Ruether the liberation theology movement sought to bridge the gulf between the religious values of justice and equality and political pragmatism It combined theology with strands of radical politics social theory and the history and experience of subordinated groups to challenge the ideas that underwrite the hierarchical structures of an unjust society Praised by some as a radical return to early Christian ethics and decried by others as a Marxist takeover liberation theology has a wide raging cross sectional history that has previously gone undocumented In The World Come of Age Lilian Calles Barger offers for the first time a systematic retelling of the history of liberation theology demonstrating how a group of theologians set the stage for a torrent of new religious activism that challenged the religious and political status quo

A Theology for the Twenty-First Century Douglas F. Ottati, 2020-10-15 Christianity in the United States is in crisis Liberalism is declining evangelicalism is splintering increasing numbers of Christians are slipping away from churches and more and more young people are for various reasons finding Christianity as they conceive it a metaphysical thought system or society of science deniers or an ideology for oppressors not just implausible but repellent At the same time Christians across denominational and ideological divides are rediscovering a moral core especially in the Jesus of the Gospels that reactivates and unites them and this kind of faith appeals to many who consider themselves averse to all traditional organized religion But any revitalized Christian faith is going to need to understand its rootedness in and interpretation of Christianity's foundational texts and traditions Noted theologian Douglas F. Ottati steps in to offer a theology for this new era Combining deep learning in texts and traditions with astute awareness of contemporary questions and patterns of thought and life he asks what does it mean in our time to understand the God of the Bible as Creator and Redeemer Distilling the content of Christian faith into seventy concise propositions he explains each in lucid cogent prose A Theology for the Twenty First Century will be an essential textbook for those training for ministry in our current climate a wise guide for contemporary believers who wonder how best to understand and communicate their faith and an inviting and intelligent resource for serious inquirers who wonder whether the way of Jesus might help them grasp the real world while remaining open to the transcendent

Music for Others Nathan Myrick, 2021-03-12 Musical activity is one of the most ubiquitous and highly valued forms of social interaction in North America to say nothing of world over being engaged from sporting events to political rallies concerts to churches Moreover music's use as an affective agent for political and religious programs suggests that it has ethical significance Indeed many have said as much It is surprising then that music's ethical significance remains one of the most undertheorized aspects of both moral philosophy and music scholarship Music for Others Care Justice and Relational Ethics in Christian Music fills part of this scholarly gap by focusing on the religious aspects of musical activity particularly on the practices of Christian communities Based on ethnomusicological fieldwork at three Protestant churches and a group of seminary students studying in an immersion course at South by Southwest SXSW and synthesizing theories of discourse formation and care ethics oriented towards restorative justice it first argues that relationships are ontological for both human beings and musical activity It further argues that musical meaning and emotion converge in human bodies such that music participates in personal and communal identity construction in affective ways yet these constructions are not always just Thus considering these aspects of music's ways of being in the

world Music for Others finally argues that music is ethical when it preserves people in and restores people to just relationships with each other and thereby with God

On the Scope and Truth of Theology Robert Cummings Neville, 2006-06-05 This is the first volume of Robert Cumming Neville's magnum opus Theology as Symbolic Engagement Neville is the premier American systematic theologian of our time His work is profoundly influenced by Paul Tillich Friedrich Schleiermacher and the American pragmatists John Dewey and Charles Sanders Pierce From Tillich he takes the notion of religion art and morality as symbol and the notion that religion is the substance of culture and culture the form of religion Thus theology is symbolic engagement with cultural forms and Neville explores the ways that such engagement occurs among various religious traditions One of the most important tasks in theology is to devise ways of testing correcting or affirming claims that we had been unable to question before This book will argue that system in theology is not merely correlating assertions but rather building perspectives from which we can render the various parts of theology vulnerable for assessment In fact one of the unique features of this book is its engagement with other religions Such dialogue has been a feature of Neville's work from the beginning Theology as Symbolic Engagement breaks the boundaries of systematic theology and moves away from the static character that characterizes such enterprises from Barth onward Instead Neville's book showcases the dynamic character of all theology The hallmark of this entire project is its effort to show theology to be hypothetical and to make it vulnerable to correction
