Environmental History in the Making Cristina Joanaz de Melo, Estelita Vaz, Lúgia M. Costa Pinto, 2016-10-21 This book is the product of the 2nd World Conference on Environmental History held in Guimarães Portugal in 2014 It gathers works by authors from the five continents addressing concerns raised by past events so as to provide information to help manage the present and the future It reveals how our cultural background and examples of past territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions Considering that political ideologies such as socialism and capitalism as well as religion fail to offer global paradigms for common ground an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to overcome blocking factors real or invented and avoid repeating ecological loss Therefore agency environmental speech and historical research are urgently needed in order to sustain environmental paradigms and overcome political cultural and economic interests in the public arena This book intertwines reflections on our bonds with landscapes processes of natural and scientific transfer across the globe the changing of ecosystems the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources or as it in today's world can offer alternatives that avoid harming those same vital natural resources water soil and air In addition it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities which cannot be detached

from technical intervention in the world In short the book firstly studies the past approaching it as a data set of how the environment has shaped culture secondly seeks to understand the present and thirdly assesses future perspectives what to keep what to change and what to dream anew considering that conventional solutions have not sufficed to protect life on our planet

The Collapse of Rhodesia Josiah Brownell,2010-10-27 In the years leading up to Rhodesia s Unilateral Declaration of Independence in 1965 its small and transient white population was balanced precariously atop a large and fast growing African population This unstable political demography was set against the backdrop of continent wide decolonisation and a parallel rise in African nationalism within Rhodesia The Collapse of Rhodesia provides a controversial reexamination of the final decades of white minority rule Josiah Brownell argues that racial population demographics and the pressures they produced were a pervasive but hidden force behind many of Rhodesia s most dramatic political events including UDI He concludes that the UDI rebellion eventually failed because the state was unable to successfully redress white Rhodesia s fundamental demographic weaknesses By addressing this vital demographic component of the multifaceted conflict this book is an important contribution to the historiography of the last years of white rule in Rhodesia

Rhodesia Cedric Phillips,2016-08-12 Although the idea of a continuous British dominion from the Cape Colony to Cairo in Egypt was first formulated by William Gladstone and Sir Rutherford Alcock and summed up by Sir Edwin Arnold in the phrase From Cape to Cairo it was Cecil Rhodes who finally embraced this dream as a viable project This book outlines how close the dream came to reality as far as Central Africa was concerned and why in the end it was the impossible dream
