Making Of The Holocaust Ideology Ethic:

The Making of the Holocaust André Mineau, 2022-07-18 What made the Holocaust possible What does it mean from a moral viewpoint These two questions constitute the main focus of this book Through concepts borrowed mostly from systems theory an attempt is made at establishing a theoretical framework for a broad understanding of the genesis of the Holocaust More specifically the relationships between ideology political power and genocide are discussed and the following topics are covered 1 the constitution and the historical evolution of the ideology of the Holocaust through the genesis of anti Semitism the impact of the modern paradigms and the apparent peculiarities of Nazism 2 the emergence of powerful means of action designed for implementing the ideology in the context of totalitarianism 3 control and freedom as the basic parameters in a decision making process that went along with a diffuse Holocaust phase and generated mechanisms of extensive cooperation 4 the values and norms that made sense to the Nazis in relation to the Holocaust with a critical assessment of Nazi ethics insofar as it aimed at subverting the concept of evil and at destroying the self This book deals with four key dimensions of the Ethics in Biomedical Research Matti Häyry, Tuija Takala, Peter Holocaust ideology power act and meaning Herissone-Kelly, 2007 This book deals with the international assessment and regulation of biomedical research In its chapters some of the leading figures in today s bioethics address guestions centred on global development scientific advances and vulnerability The series Values In Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics The Ethics of Homelessness, 2021-11-22 This book extends the study of homelessness beyond the need of shelter Philosophical exploration exposes the fragility of human fulfillment in contemporary society. The authors weave the moral fabric of what it means to be human They show how economic and political values compromise the dignity of homeless persons They argue for recognition of rights for the homeless who otherwise would be voiceless and without membership in the moral community This pioneering contribution instills our moral sensitivity to the homeless condition and justifies our moral responsibility to Local Insights, Global Ethics for Business Daryl Koehn, 2021-11-08 This book evaluates change that condition strategies for managing ethical conflict Macro approaches that attribute select values to entire peoples and claim supremacy for these values are suspect A micro approach focusing on the ethics of individual thinkers is better The study uses the ethics of Confucius and Tetsuro Watsuji to derive a process based universal ethic that respects local differences yet is not relativistic The Problem of Evil ,2022-04-19 This book is an intercultural exploration of the full scope of evil The problems of evil have beset humanity throughout the ages and continue to trouble us The studies here examine evil in Asian thought in Western theory in the cosmic order in human psychology and in social practice Insights are added to the philosophical discussions from religion culture history law technology and literature Personalism Revisited, 2021-11-08 This book presents selected addresses presented before the Personalist Discussion Group meetings held in conjunction with the annual

meetings of The American Philosophical Association Eastern Division It includes the central ideas of American Personalistic Idealism developed during the twentieth century its major criticisms and recent developments by philosophers who are either Personalistic Idealists or sympathetic to the position Richard Rorty Richard Rumana, 2021-12-13 Demonstrating Richard Rorty s breadth of scholarship and his influence on diverse issues across the social sciences and humanities this comprehensive bibliography contains 1 165 citations A unique reference work on neo pragmatism this bibliography is essential for anyone researching Rorty s work and its impact on philosophy literature the arts religion the social sciences Matter, Mind, and Medicine Jacques Kriel, 2021-12-06 This book critically assesses the politics and education implications of modern medicine s claim to be a natural science Medicine models its scientific and clinical self understanding on an obsolete positivist conception of science reality and consciousness In this view the body is modeled as a biological machine disease as breakdown of the machine and therapy as physical measures to fix the machine The problems besetting medical science and practice are rooted in the inadequacy of the positivist philosophical assumptions regarding the nature of science reality and consciousness To base the diagnostic practices and therapeutic regimes purely on knowledge of physical processes in the human body is in view of this analysis at best grossly inadequate at worst thoroughly dehumanizing Anton van Niekerk Editorial Foreword This means that medicine s clinical method cannot be transformed without transforming the underlying view of science of reality and of the human person The book proposes a broader model of science which overcomes the outdated dichotomy between human and natural sciences Science is viewed as an interdisciplinary exercise generating multiple perspectives The insights of the human sciences are essential for scientific clinical medicine Utilizing evolutionary biology and complexity theory the author proposes an alternative understanding of reality and human consciousness as a basis for a transformed clinical method Reality is a hierarchy of systems of increasing complexity Different levels can be distinguished namely material systems living material systems conscious living material systems and self conscious living material systems Each level represents a new manner of being which requires a different scientific discourse of understanding Using this model of reality the author argues against understanding human consciousness as a byproduct of physical processes in the brain The human person is a self conscious complex psycho somatic system whose Conversations with Pragmatism Paul Custodio well being is conditioned by much more than physical processes Bube, Jeffrey L. Geller, 2002 This book represents the reflections of scholars coming from varied disciplinary backgrounds who have found a conversation partner in pragmatism The conversations recorded here demonstrate pragmatism s versatility and contemporary relevance Whether it be rhetoric literature philosophy religion or social psychology pragmatism provides the contributors fruitful insights into and methods of examining both practical and theoretical issues What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State

Raymond Angelo Belliotti, 2021-08-04 This book and contingent existence examines core concerns of human life What is the relationship between a meaningful life and theism Why are some human beings radically adrift without radical foundations and struggling with hopelessness Is the cosmos meaningless Is human life akin to the ancient Myth of Sisyphus What is the role of struggle and suffering in creating meaning How do we discover or create value Is happiness overrated as a goal of life How if at all can we learn to die meaningfully The Dissolution of Mind Oscar Vilarroya, 2021-12-28 This book presents an original thesis about the notion of sensory experience and of the mind s architecture which is grounded in current trends in cognitive science and philosophy of mind Presented in the form of a dialogue the book explores some of the psychological and philosophical consequences that the author derives from his proposal The Future of Value Inquiry ,2021-12-28 This book explores the nature of values and the status of value studies at the turn of the millennium The contributors nineteen philosophers from fourteen countries introduce and defend an enriching variety of views regarding the present state and future prospects of value inquiry **Cultural Beings** Yuval Lurie, 2000 Human beings are a cultural species This predicament enables them to take on many different cultural identities all of which transcend the bounds of natural behavior of other species To contemplate this predicament through philosophy is to reflect on such guestions as What makes cultural forms of life possible What is encompassed in them What lies at their core What distinguishes them from natural forms of life What brings them about sustains and causes them to change Philosophical answers to these questions predate abstract ways of thinking as they are sometimes embedded in ancient mythical and religious narratives Such is the story told in the first three chapters of the book of Genesis in the Bible revealing how human beings became the cultural beings that they are This study suggests how that ancient and most celebrated story in the literature of the West may be read as harboring insightful philosophical observations on the cultural nature of human beings It first focuses on the very concept of cultural forms of life revealing its complicated conceptual links to natural forms of life It then offers an interpretive framework for reading mythical symbolic narratives Using these ideas it provides a philosophical reading of the Biblical narrative disclosing it to harbor a metaphysically oriented conception of nature and two insightful philosophical overviews of the cultural nature of human beings Both overviews endow human beings with an ability to manipulate nature but in different ways the first by subjugating parcels of nature to human will the second by subjugating human beings themselves to a value laden conception of things and ethical forms of life Thus human beings are portrayed as natural creatures possessed of a cultural nature that enables them to transform nature and recreate themselves through their unique cultural predicament Nazi Ideology and Ethics Wolfgang Bialas, Lothar Fritze, 2014-03-26 This volume documents the still rare encounter of moral philosophical historiographic and medical ethical research on National Socialism

Banki, Judith Hershcopf Banki, John T.
