*Uniting the Kingdom?* Alexander Grant, Keith Stringer, 2002-11-01 In *Uniting the Kingdom* a group of the most distinguished historians from Britain and Ireland assemble to consider the question of British identity spanning the period from the Middle Ages to the present Traditional chronological and regional frontiers are broken down as medievalists early modernists and modernists debate the key issues of the British state the conflicting historiographies the nature of political tensions and the themes of expansion and contraction This outstanding collection of essays forms an illuminating introduction to the most up to date thinking about the problems of British histories and identities **The Making of the UK** Richard Allison, Carole Brown, 1990 **The UK's Changing Democracy** Patrick Dunleavy, Alice Park, Ros Taylor, 2018-11-01 The UK's Changing Democracy presents a uniquely democratic perspective on all aspects of UK politics at the centre in Westminster and Whitehall and in all the devolved nations The 2016 referendum vote to leave the EU marked a turning point in the UK's political system In the previous two decades the country had undergone a series of democratic reforms during which it seemed to evolve into a more typical European liberal democracy The establishment of a Supreme Court adoption of the Human Rights Act Scottish Welsh and Northern Irish devolution proportional electoral systems executive mayors and the growth in multi party competition all marked profound changes to the British political tradition Brexit may now bring some of these developments to a juddering halt The UK's previous exceptionalism from European patterns looks certain to continue indefinitely Taking back control of regulations trade immigration and much more is the biggest change in UK governance for half a century It has already produced enduring crises for the party system Parliament and the core executive with uniquely contested governance over critical issues and a rapidly changing political landscape Other recent trends are no less fast moving such as the revival of two party dominance in England the re creation of some mass membership parties and the disruptive challenges of social media In this context an in depth assessment of the quality of the UK's democracy is essential Each of the 2018 Democratic Audit's 37 short chapters starts with clear criteria for what democracy requires in that part of the nation's political life and outlines key recent developments before a SWOT analysis of strengths weaknesses opportunities and threats crystallises the current situation A small number of core issues are then explored in more depth Set against the global rise of debased semi democracies the book's approach returns our focus firmly to the big issues around the quality and sustainability of the UK's liberal democracy *The Making of England* John Richard Green, 2024-04-10 Reprint of the original first published in 1882 *The Making of the UK* Simon Mason, 1992 UK Communication Strategies for Afghanistan, 2001-2014 Thomas W. Cawkwell, 2016-03-09 The war in Afghanistan came to an end in 2014 after nearly thirteen years of conflict Throughout that period British officials have described UK operations there in various conflicting and often contradictory ways as a counter terrorism mission a stabilisation mission and a counter narcotics mission respectively This book investigates how the war was sold to the British public and how Britain's

transnational foreign and defence policy impacted on the unfolding of UK strategy in Afghanistan and the way it was communicated. It argues that because the UK's foreign and defence policy is transnationally oriented meaning that it is foundationally aimed at maintaining alliance with the United States and the institutional coherence of NATO, UK strategy is contingent upon collective security and crucially is fundamentally concerned with the means of policy maintaining alliances over the ends using alliances to effect change. Explaining the inalienability of collective security systems to national security is no easy task however and when faced with the adversities of Afghanistan the UK state has since 2008 instead opted to describe the significance of Afghanistan in narrow nation centric counter terrorist concerns in order to maintain public support for collective security operations there whilst paradoxically framing the conflict in a manner that avoids talking about the transnational structure and purpose of the mission. This kind of strategic communication is increasingly becoming a focus of the UK state as it faces a transnational dilemma of maintaining its collective security bonds whilst facing a public increasingly sceptical of liberal interventionism.

*Making of the UK* Kate Brown, *The Road to War in Iraq: Comparative Foreign Policy Analysis* Chris Featherstone, 2025-04-09. This book combines three Foreign Policy Analysis (FPA) models to explain both how and why the US and UK decided to invade Iraq in 2003. These three FPA models each examine a different but closely related aspect of the individual level of decision making. Firstly, Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq. Secondly, the Leadership Style framework examines how the individual leader's style of exercising their leadership affected the navigation of the decision making process. Thirdly, analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public. By achieving these objectives, *The Road to War* contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken. The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA, proposing and testing a framework that provides more complex answers through adopting a multifactorial framework. These more nuanced complex answers then reveal more about the role of the

individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade

How UK Should Be James Nicholls, 2020-12-10 This is a book which holds a very large amount of my ideological beliefs which form a new ideology quite unlike any other before it I dream of a better world a healthier world A world where people are safe and all products which poison the minds and lead to human destruction don't exist A world where animal species are never driven to extinction and co exist with people rather well where many natural areas of the world remain untouched unpolluted and humans are safe from the natural hazards of the world and the unnatural hazards of the world An economic system which is fair and relatively stable and where jobs are as easy to get as merely talking A world where every religion is at peace with the other as are its followers to followers of another A justice system which is real justice and countries whom many people can say they are honestly proud of being a citizen of A world free of economic corruption and instability Grasslands as green as the deepest green and forests which have trees not seldom seen A world where everyone can claim free speech no matter how outrageous radical stupid or barbaric it may sound to those people with differing views The name of this new ideological belief should be officially called Distributionism This book mainly focuses on the United Kingdom and what's best for the United Kingdom but it can be read comfortably by people who aren't UK citizens
