**Materials** Robin Kerrod, 2002 Discusses a variety of topics relating to materials and their uses including ores and minerals mining metallurgy metalworking welding ceramics pottery glass paper petrochemicals manufacturing and more

*Young Oxford Library of Science* Robin Kerrod, 2002-11 An accessible new reference for students The Young Oxford Library of Science is an 11 volume set that offers easy to find information on the physical chemical and biological sciences Each volume explains its subject in language that is easy to understand and is written by its own expert author Together these volumes form a comprehensive library of basic knowledge on all aspects of science and how it applies to our daily lives

Volume 1 Mind and Body There's much more to the human being than meets the eye Under our skin and hair are elaborate systems for everything we think feel and do Mind and Body explains these systems and how to take care of them in 24 articles on topics that include Bones and muscles The brain and nerves Digesting food Heart and blood Human reproduction Lungs and breathing

Volume 2 Plants and Animals Life comes in countless shapes and sizes but all living things have building blocks called cells and blueprints called genes Plants and Animals explores how living things came to be and how they work in 28 articles including The animal kingdom Bacteria and viruses Cells Classification Evolution The plant kingdom

Volume 3 Land Sea and Air Earth is four and a half billion years old holds a quintillion tons of water and can withstand the shock of hundreds of millions of volts Even more striking than these statistics is how the world works which Land Sea and Air introduces in 29 articles that include Atmosphere Climate Continents and plates Earth Geology Seasons

Volume 4 Atoms and Elements When certain atomic particles or elements meet chemistry goes into action Atoms and Elements contains 29 articles on nature's tiniest particles and the building blocks of all matter This book covers all the basics including Atoms and molecules Elements and compounds Gases Liquids Matter The periodic table

Volume 5 Materials Earth's riches have provided human ingenuity plenty of opportunities from wood we make paper from clay we make pottery from oil we make energy This volume explains how we extract and refine raw materials as well as our responsibility to give back to the planet what we take Its 28 articles include Chemical changes Oil products Plastics Recycling Resources Working with metals

Volume 6 Light and Sound Without an understanding of light and sound we'd have no cameras or compact discs Light and Sound explains what brings rainbows to our eyes and music to our ears Such events are described in 23 articles including Electromagnetic spectrum Fiber optics Mirrors and lenses Sound recording Sound Ultrasound

Volume 7 Electricity and Electronics Without electricity and electronics we would have no communications computers or cars Electricity and Electronics contains 24 articles that explain everything from making electricity to microchip magic Learn all about Electricity Electronics Magnetism and electromagnetism Robots and artificial intelligence Video equipment Virtual reality

Volume 8 Energy and Forces What do refrigerators watches and wheelbarrows all have in common Inventors developed them using the principles of physics which is the study of energy and forces The topics of this book's 26 articles include Energy Engines and

turbines Forces Gravity Motion Temperature Volume 9 Science in Action By understanding scientific principles we can use them to make tools and technology that make our lives easier and more interesting Science in Action shows how physics chemistry biology and botany have revolutionized human endeavors from farming to space exploration The 24 articles include Aircraft Bikes and motorcycles Buildings Printing words and pictures Satellites Technology Volume 10 Stars and Planets Stars and Planets takes us on a tour of outer space from Earth's closest neighbor the moon to galaxies 14 billion light years away But unlike stops on an ordinary tour all of these wonders are in constant motion Learn why and how in 27 articles that include Astronomy Solar System Planets Stars Galaxies Universe Volume 11 Reference Volume and Series This volume contains an index of the entire set of books in The Young Oxford Library of Science as well as ready reference material and further readings that supplement the individual titles in the series The Reference Volume and Series Index is an extraordinary resource filled with fascinating information such as Diagrams of the skeletal system eyes nose teeth heart brain and reproductive systems Lists of the ten largest islands ten highest mountains ten largest deserts ten longest rivers and ten stars closest to the sun Tables of the constellations with their common names and times when they are visible the chemical elements with their symbol number atomic weight and the year it was discovered and the galaxies their type distance and diameter Everyday information such as recommended daily servings wind chill index and heat index In addition the reference volume includes nearly 250 important inventors and discoverers listed with dates nationality and major invention and discovery and a further reading list and useful websites sorted by subject matter tied in to each volume
