Metropolis And Province Science In British Culture 1780 1850:

Metropolis and Province Ian Inkster, Jack Morrell, 2006-12-21 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company *Metropolis and Province* Ian Inkster, Jack Morrell, 2015-04-09 This collection of case studies focusing on British scientific culture during the first industrial revolution explores the social basis of science in the period and asks why such an extraordinarily rich variety of cultural scientific experience should have flourished at the time The book analyses science and scientific culture in their local contexts both metropolitan and provincial examining where possible the relations between the two and emphasizing the range of scientific associations in London to individual savants in the provinces This book was first published in 1983 **Geographies of Nineteenth-Century Science** David N.

Livingstone, Charles W. J. Withers, 2011-07-15 Here David Livingstone and Charles Withers gather essays that deftly navigate the spaces of science in this significant period and reveal how each is embedded in wider systems of meaning authority and identity Routledge Revivals: John Phillips and the Business of Victorian Science (2005) Jack Morrell, 2016-10-04 First

published in 2005 this book represents the first full length biography of John Phillips one of the most remarkable and important scientists of the Victorian period Adopting a broad chronological approach this book not only traces the development of Phillips career but clarifies and highlights his role within Victorian culture shedding light on many wider themes It explores how Phillips love of science was inseparable from his need to earn a living and develop a career which could sustain him Hence questions of power authority reputation and patronage were central to Phillips career and scientific work Drawing on a wealth of primary sources and a rich body of recent writings on Victorian science this biography brings together his personal story with the scientific theories and developments of the day and fixes them firmly within the context of wider society **Collaboration in the Pharmaceutical Industry** Viviane Quirke, 2012-10-12 Examining the issue of

British decline after the war this fascinating text describes the evolution of cooperation in Britain and France and argues that the relationship between these two countries helped to disseminate a culture of research resulting in the transformation of the medical sciences and the pharmaceutical industry in both countries Of interest to a wide range of academic disciplines this highly relevant book discusses topics including penicillin sulphamide drugs and the effects of war in both countries

Industrial Training and Technological Innovation Howard Gospel, 2010-11 Taking an international and comparative perspective this book focuses on the relationship between industrial training and technological change in three major global economies the UK USA and Japan The contributors an international group of leading researchers look at the origins and development of training in these countries and analyse the benefits resulting from the interaction of a skilled workforce and technological change This analysis of training in major industrial nations reveals the full complexity of the relationship between labour and technological change It shows the value of an approach which is both historical and comparative and highlights the importance of education and training as a necessary basis for successful innovation **Flesh in the Age of**

Reason Roy Porter, 2005-01-27 As an introduction to early modern thinking and the impact of past ideas on present lives this book can find few equals and no superiors Porter is a witty humane writer with an extraordinary vocabulary and a sparkling sense of fun Whether he is quoting from obscure medical texts or analysing scabrous diaries dishing the dirt on long dead bigwigs or evoking sympathy for human suffering his grasp is masterly and his erudition appealing I wish I could read it again for the first time you can Times Educational Supplement Book of the Week In this startlingly brilliant sequel to the prize winning ENLIGHTENMENT Roy Porter completes his lifetime s work offering a magical enthusiastic and charming account of the writings of some of the most attractive figures ever to write English Frankenstein Harold Bloom, 2009

Presents a collection of writings exploring the characters from Mary Shelley s **Frankenstein** **Civilization and the Culture of Science** Stephen Gaukroger, 2020-02-19 How did science come to have such a central place in Western culture How did cognitive values and subsequently moral political and social ones come to be modelled around scientific values In **Civilization and the Culture of Science** Stephen Gaukroger explores how these values were shaped and how they began in turn to shape those of society The core nineteenth and twentieth century development is that in which science comes to take centre stage in determining ideas of civilization displacing Christianity in this role Christianity had provided a unifying thread in the study of the world however and science had to match this which it did through the project of the unity of the sciences The standing of science came to rest or fall on this question which the book sets out to show in detail is essentially ideological not something that arose from developments within the sciences which remained pluralistic and modular A crucial ingredient in this process was a fundamental rethinking of the relations between science and ethics economics philosophy and engineering In his engaging description of this transition to a scientific modernity Gaukroger examines five of the issues which underpinned this shift in detail changes in the understanding of civilization the push to unify the sciences the rise of the idea of the limits of scientific understanding the concepts of applied and popular science and the way in which the public was shaped in a scientific image **Imagining Roman Britain** Virginia Hoselitz, 2015 An examination of how the Roman past was perceived and used by Victorian Britain The authority of classical texts was challenged in the mid Victorian era through the unearthing of a very different Rome in the material remains under British soil Developments in archaeology created a new picture of Roman Britain as wealthy and civilized an image which sat more comfortably with the Victorians own changing view of empire as they themselves became an imperial power Changing intellectual ideas ensured that the Roman heritage could no longer be seen solely as the preserve of the classically educated upper class excavating with a spade allowed a larger audience to participate and own the Roman past This book explores the whole phenomena using archaeological activity in four British provincial towns Caerleon Cirencester Colchester and Chester to offer an explanation of how and why it happened and providing authoritative and fresh insights into the way in which Victorian archaeology emerged developed and altered how the modern world understood the ancient In the process it brings to the fore the

frequently contradictory and confused ideas about Roman Britain in the Victorian imagination VIRGINIA HOSELITZ gained her PhD at the Department of Classics and Ancient History University of Bristol

A Companion to Nineteenth-Century Britain Chris Williams, 2008-04-15 A Companion to Nineteenth Century Britain presents 33 essays by expert scholars on all the major aspects of the political social economic and cultural history of Britain during the late Georgian and Victorian eras Truly British rather than English in scope Pays attention to the experiences of women as well as of men Illustrated with maps and charts Includes guides to further reading

Science in the Marketplace Aileen Fyfe, Bernard Lightman, 2007-09-10 The nineteenth century was an age of transformation in science when scientists were rewarded for their startling new discoveries with increased social status and authority But it was also a time when ordinary people from across the social spectrum were given the opportunity to participate in science for education entertainment or both In Victorian Britain science could be encountered in myriad forms and in countless locations in panoramic shows exhibitions and galleries in city museums and country houses in popular lectures and even in domestic conversations that revolved around the latest books and periodicals Science in the Marketplace reveals this other side of Victorian scientific life by placing the sciences in the wider cultural marketplace ultimately showing that the creation of new sites and audiences was just as crucial to the growing public interest in science as were the scientists themselves By focusing attention on the scientific audience as opposed to the scientific community or self styled popularizers Science in the Marketplace ably links larger societal changes in literacy in industrial technologies and in leisure to the evolution of popular science

Urban Histories of Science Oliver Hochadel, Agustí Nieto-Galan, 2018-09-20 This book tells ten urban histories of science from nine cities Athens Barcelona Budapest Buenos Aires Dublin 2 articles Glasgow Helsinki Lisbon and Naples situated on the geographical margins of Europe and beyond Ranging from the mid nineteenth to the early twentieth centuries the contents of this volume debate why and how we should study the scientific culture of cities often considered peripheral in terms of their production of knowledge How were scientific practices debates and innovations intertwined with the highly dynamic urban space around 1900 The authors analyze zoological gardens research stations observatories and international exhibitions along with hospitals newspapers backstreets and private homes while also stressing the importance of concrete urban spaces for the production and appropriation of knowledge They uncover the diversity of actors and urban publics ranging from engineers scientists architects and physicians to journalists tuberculosis patients and fishermen Looking at these nine cities around 1900 is like glancing at a prism that produces different and even conflicting notions of modernity In their totality the ten case studies help to overcome an outdated centre periphery model This volume is thus able to address far more intriguing historiographical questions How do science technology and medicine shape the debates about modernity and national identity in the urban space To what degree do cities and the heterogeneous elements they contain have agency These urban histories show that science and the city are consistently and continuously co constructing each other

A Mad, Bad, and

Dangerous People? Boyd Hilton, 2008-06-19 In a period scarred by apprehensions of revolution war invasion poverty and disease elite members of society lived in fear of revolt Boyd Hilton examines the changes in society between 1783 1846 and the transformations from raffish and rakish behaviour to the new norms of Victorian respectability *Frankenstein, Creation, and Monstrosity* Stephen Bann, 1994 Deals with the place of the monster in Western *Transfiguring the Arts and Sciences* Jon Klancher, 2013-08 This book discusses how Romantic age writers and new cultural institutions transformed ideas of knowledge inherited from the early modern period **Women in Science** Ruth Watts, 2013-05-13 The first book of its kind to provide a full and comprehensive historical grounding of the contemporary issues of gender and women in science Women in Science includes a detailed survey of the history behind the popular subject and engages the reader with a theoretical and informed understanding with significant issues like science and race gender and technology and masculinity It moves beyond the historical work on women and science by avoiding focusing on individual women scientists

Regionalizing Science Simon Naylor, 2016-09-12 Victorian England as is well known produced an enormous amount of scientific endeavour but what has previously been overlooked is the important role of geography on these developments Naylor seeks to rectify this imbalance by presenting a historical geography of regional science Taking an in depth look at the county of Cornwall questions on how science affected provincial Victorian society how it changed people s relationship with the landscape and how it shaped society are applied to the Cornish case study allowing a depth and texture of analysis denied to more general scientific overviews of the period *The English Higher Grade Schools* Meriel Vlaeminke, 2013-09-05 The English higher grade schools formed a key part of an expanding 19th century education system but they threatened the vested interests of a powerful Establishment bent on reaffirming the status quo The author analyzes the 1902 Education Act as a retrogressive move by which much was lost Popular Exhibitions, Science and Showmanship, 1840-1910 Joe Kember, John Plunkett, Jill A. Sullivan, 2016-09-12 Victorian culture was characterized by a proliferation of shows and exhibitions These were encouraged by the development of new sciences and technologies together with changes in transportation education and leisure patterns The essays in this collection look at exhibitions and their influence in terms of location technology and ideology
