Space: Fostering Mexican Society Jorge Alfredo Ferrer Pérez, Annette Froehlich, 2025-09-08. This book provides a comprehensive overview of the role of space exploration and technology in Mexico. The Mexican space sector is currently experiencing rapid growth with new participants entering the field and space applications increasingly supporting the country's social, economic and political development. There is a growing recognition of space as a vital component of Mexico's development agenda. Despite significant progress in recent years that has improved the living conditions of many Mexicans and helped lift people out of poverty, much work remains to be done to meet the basic needs of all citizens and ensure they receive the respect they deserve. Space technology is already being utilized in various sectors to help achieve Mexico's future objectives and there are still ample opportunities to expand the use of space systems and data. This book will interest researchers, professionals and students in fields such as space studies, international relations, governance and social and rural development.

Landscapes of a New Cultural Economy of Space Theano S. Terkenli, Anne-Marie d'Hauteserre, 2006-07-13. Making sense of new cultural economies it is argued needs consistent attention to the resonances of individual lives. Otherwise a discussion of cultural economies remains suspended in a detached virtualism. Miller, 2000. The idea of the remaking of geographies and cultural economies remains necessarily a consistent search to make the subject dynamic in its resonance with the contemporary world. In recent debates concerning the reframing of the cultural economies of geography there is an evidence of increasing acknowledgement of the overlooked importance of subjectivities within geographical explanation. This has often been difficult when trying to attend to the large scale apparent dynamics of change. The shift of geographies to focus upon cultural economies combines two profound threads that inform this chapter: the acknowledgement of the breadth and inclusivity of what economies are and the refusal mutually to isolate the cultural and the economic. Thus the economic becomes engaged and even framed in relation to the cultural and vice versa. Such an appraisal makes more robust the limits of either or claims from these two grounding components of

geographical thinking and its representation of the world These themes are sustained in different ways across the chapters of this book This chapter seeks to build a critical discourse concerning space embodied practice and lay knowledge It does this in order to address the mechanisms through which individuals are engaged in the processes of new cultural economies

The Death of Aztec Tenochtitlan, the Life of Mexico City Barbara E. Mundy, 2018-03-22 Winner Book Prize in Latin American Studies Colonial Section of Latin American Studies Association LASA 2016 ALAA Book Award Association for Latin American Art Arvey Foundation 2016 The capital of the Aztec empire Tenochtitlan was in its era one of the largest cities in the world Built on an island in the middle of a shallow lake its population numbered perhaps 150 000 with another 350 000 people in the urban network clustered around the lake shores In 1521 at the height of Tenochtitlan's power which extended over much of Central Mexico Hernando Cortés and his followers conquered the city Cortés boasted to King Charles V of Spain that Tenochtitlan was destroyed and razed to the ground But was it Drawing on period representations of the city in sculptures texts and maps *The Death of Aztec Tenochtitlan the Life of Mexico City* builds a convincing case that this global capital remained through the sixteenth century very much an Amerindian city Barbara E Mundy foregrounds the role the city's indigenous peoples the Nahuatl played in shaping Mexico City through the construction of permanent architecture and engagement in ceremonial actions She demonstrates that the Aztec ruling elites who retained power even after the conquest were instrumental in building and then rebuilding the city Mundy shows how the Nahuatl entered into mutually advantageous alliances with the Franciscans to maintain the city's sacred nodes She also focuses on the practical and symbolic role of the city's extraordinary waterworks the product of a massive ecological manipulation begun in the fifteenth century to reveal how the Nahuatl struggled to maintain control of water resources in early Mexico City *Spaces of Capital/Spaces of Resistance* Chris Hesketh, 2017-12-15 Based on original fieldwork in Chiapas and Oaxaca Mexico this book offers a bridge between geography and historical sociology Chris Hesketh examines the production of space within the global political economy Drawing on multiple disciplines Hesketh's discussion of state formation in Mexico takes us beyond the national level to explore the interplay between global regional national and sub national articulations of power These are linked through the novel deployment of Antonio Gramsci's concept of passive revolution understood as the state led institution or expansion of capitalism that prevents the meaningful participation of the subaltern classes Furthermore the author brings attention to the conflicts involved in the production of space placing particular emphasis on indigenous communities and movements and their creation of counterspaces of resistance Hesketh argues that indigenous movements are now the leading social force of popular mobilization in Latin America The author reveals how the wider global context of uneven and combined development frames these specific indigenous struggles and he explores the scales at which they must now seek to articulate themselves

Rethinking Urban Parks Setha M. Low, Dana Taplin, Suzanne Scheld, 2009-05-21 A study of public recreation space and how urban developers can encourage ethnic diversity through planning that supports multiculturalism Urban parks such as

New York City's Central Park provide vital public spaces where city dwellers of all races and classes can mingle safely while enjoying a variety of recreations. By coming together in these relaxed settings different groups become comfortable with each other thereby strengthening their communities and the democratic fabric of society. But just the opposite happens when by design or in ignorance parks are made inhospitable to certain groups of people. This pathfinding book argues that cultural diversity should be a key goal in designing and maintaining urban parks. Using case studies of New York City's Prospect Park, Orchard Beach in Pelham Bay Park and Jacob Riis Park in the Gateway National Recreation Area as well as New York's Ellis Island Bridge Proposal and Philadelphia's Independence National Historical Park the authors identify specific ways to promote, maintain and manage cultural diversity in urban parks. They also uncover the factors that can limit park use including historical interpretive materials that ignore the contributions of different ethnic groups, high entrance or access fees, park usage rules that restrict ethnic activities and park restorations that focus only on historical or aesthetic values. With the wealth of data in this book urban planners, park professionals and all concerned citizens will have the tools to create and maintain public parks that serve the needs and interests of all the public.
