Mexican Suite A History Of Photography In Mexico:

Mexican Suite Olivier Debroise, 2001-03-15 Now this publication is available in English as Mexican Suite Olivier Debroise and Stella de Sa Rego have revised this edition to include more current material and explanatory notes for an audience less familiar with Mexican history They have also eliminated some of the general history of photography and added more of the early history of photography in Mexico as well as many new previously unpublished images The book is organized both chronologically and thematically which allows viewer readers to follow the evolution of major photographic genres and styles Debroise also examines the role of photography in the development of modern Mexico and the influence of prominent foreign photographers such as Edward Weston Tina Modotti and Henri Cartier Bresson Photographing the Mexican Revolution

John Mraz, 2012-04-18 The Mexican Revolution of 1910 1920 is among the world's most visually documented revolutions Coinciding with the birth of filmmaking and the increased mobility offered by the reflex camera it received extraordinary coverage by photographers and cineastes commercial and amateur national and international Many images of the Revolution remain iconic to this day Francisco Villa galloping toward the camera Villa lolling in the presidential chair next to Emiliano Zapata and Zapata standing stolidly in charro raiment with a carbine in one hand and the other hand on a sword to mention only a few But the identities of those who created the thousands of extant images of the Mexican Revolution and what their purposes were remain a huge puzzle because photographers constantly plagiarized each other's images In this pathfinding book acclaimed photography historian John Mraz carries out a monumental analysis of photographs produced during the Mexican Revolution focusing primarily on those made by Mexicans in order to discover who took the images and why to what ends with what intentions and for whom He explores how photographers expressed their commitments visually what aesthetic strategies they employed and which identifications and identities they forged Mraz demonstrates that contrary to the myth that Agustín Víctor Casasola was the photographer of the Revolution there were many who covered the long civil war including women He shows that specific photographers can even be linked to the contending forces and reveals a pattern of commitment that has been little commented upon in previous studies and completely unexplored in the photography of other revolutions **The Other Fridas** Luciana Namorato, João Nemi Neto, Debora Thome, 2024-12-20 The

History and Modern Media John Mraz, 2021-04-15 In History and Modern Media John Mraz largely focuses on Mexican photography and his innovative methodology that examines historical photographs by employing the concepts of genre and function He developed this method in extensive work on photojournalism it is tested here through examining two genres Indianist imagery as an expression of imperial neo colonizing and decolonizing photography and progressive photography as

embodied in worker and laborist imagery as well as feminist and decolonizing visibility The book interweaves an autobiographical narrative with concrete research Mraz describes the resistance he encountered in US academia to this new way of showing and describing the past in films and photographs as well as some illuminating experiences as a visiting professor at several US universities More importantly he reflects on what it has meant to move to Mexico and become a Mexican Mexico is home to a thriving school of photohistorians perhaps unequalled in the world Some were trained in art history and a few continue to pursue that discipline However the great majority work from the discipline known as photohistory which focuses on vernacular photographs made outside of artistic intentions A central premise of the book is that knowing the cultures of the past and of the other is crucial in societies dominated by short term and parochial thinking and that today's hyper audiovisuality requires historians to use modern media to offer their knowledge as alternatives to the perpetual present in which we live Encyclopedia of Twentieth-Century Photography, 3-Volume Set Lynne

The Power and Politics of Art in Postrevolutionary Mexico Stephanie J. Smith, 2017-11-14 Stephanie J. Smith brings Mexican politics and art together chronicling the turbulent relations between radical artists and the postrevolutionary Mexican state The revolution opened space for new political ideas but by the late 1920s many government officials argued that consolidating the nation required coercive measures toward dissenters While artists and intellectuals some of them professed Communists sought free expression in matters both artistic and political Smith reveals how they simultaneously learned the fine art of negotiation with the increasingly authoritarian government in order to secure clout and financial patronage But the government Smith shows also had reason to accommodate artists and a surprising and volatile interdependence grew between the artists and the politicians Involving well known artists such as Frida Kahlo Diego Rivera and David Alfaro Siqueiros as well as some less well known including Tina Modotti Leopoldo Méndez and Aurora Reyes politicians began to appropriate the artists' nationalistic visual images as weapons in a national propaganda war High stakes negotiating and co-opting took place between the two camps as they sparred over the production of generally accepted notions and representations of the revolution's legacy and what it meant to

Collecting Across Cultures Daniela Bleichmar, Peter C. Mancall, 2011-03-17 In the early modern age more people traveled farther than at any earlier time in human history Many returned home with stories of distant lands and at least some of the objects they collected during their journeys And those who did not travel eagerly acquired wondrous materials that arrived from faraway places Objects traveled various routes personal imperial missionary or trade and moved not only across space but also across cultures Histories of the early modern global culture of collecting have focused for the most part on European Wunderkammern or cabinets of curiosities But the passion for acquiring unfamiliar items rippled across many lands The court in Java marveled at collected and displayed myriad goods brought through its halls African princes traded captured members of other African groups so they could get the newest kinds of cloth produced in Europe Native Americans sought colored glass beads made in Europe often trading them to other indigenous groups Items changed hands and crossed cultural boundaries frequently often gaining new and valuable meanings in the process An object that might have seemed mundane in some cultures could become a target of veneration in another The fourteen essays in *Collecting Across Cultures* represent work by an international group of historians art historians and historians of science Each author explores a specific aspect of the cross cultural history of collecting and display from the dawn of the sixteenth century to the early decades of the nineteenth century As the essays attest an examination of early modern collecting in cross cultural contexts sheds light on the creative and complicated ways in which objects in collections served to create knowledge some factual some fictional about distant peoples in an increasingly transnational world Cultural Antagonism and the Crisis of Reality in Latin America Horacio Legrás, 2022-10-06 For most of the 20th century Latin American literature and art have contested political and cultural projects of homogenization of a manifestly diverse continent *Cultural Antagonism and the Crisis of Reality in Twentieth Century Latin America* explores literary and humanist experimentations and questions of gender race and ethnicity as well as the contradictions of capitalist development that belie such homogenization by reconfiguring the sense of the real in Latin America Covering four key geographical areas Mexico the Caribbean Central America and the Andes every chapter delves into a question that has been central to the humanities in the last 20 years Indigenous world views gender race neo liberalism and visual culture Legrás illuminates these issues with a thorough consideration of the theoretical questions inherent to how new identities disrupt the imaginary stability of social formations
