*México, nueva arquitectura 2* Antonio Toca, 1993      **Modernity and the Architecture of Mexico** Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect's agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement      **Modern Architecture in Latin America** Luis E. Carranza, Fernando Luiz Lara, 2015-01-05 Designed as a survey and focused on key examples and movements arranged chronologically from 1903 to 2003 this is the first comprehensive history of modern architecture in Latin America in any language Runner up University Co op Robert W Hamilton Book Award 2015 *Modern Architecture in Latin America* Art Technology and Utopia is an introductory text on the issues polemics and works that represent the complex processes of political economic and cultural modernization in the twentieth century The number and types of projects varied greatly from country to country but as a whole the region produced a significant body of architecture that has never before been presented in a single volume in any language *Modern Architecture in Latin America* is the first comprehensive history of this important production Designed as a survey and focused on key examples paradigms arranged chronologically from 1903 to 2003 this volume covers a myriad of countries historical social and political conditions and projects developments that range from small houses to urban plans to architectural movements The book is structured so that it can be read in a variety of ways as a historically developed narrative of modern architecture in Latin America as a country specific chronology or as a treatment of traditions centered on issues of art technology or utopia This structure allows readers to see the development of multiple and parallel branches historical strands of architecture and at times their interconnections across countries The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations      *The Architecture and Cities of Northern Mexico from Independence to the Present* Edward Burian, 2015-08-15 The states of Northern Mexico Tamaulipas Nuevo León Coahuila Chihuahua Durango Sonora Sinaloa and Baja California Norte and Sur have architecture urbanism and landscape design that offer numerous lessons in how to build

well but this constructed environment is largely undervalued or unknown To make this architecture better known to a wide professional academic and public audience this book presents the first comprehensive overview in either English or Spanish of the architecture urban landscapes and cities of Northern Mexico from the country's emergence as a modern nation in 1821 to the present day Profusely illustrated with color and black and white photographs maps and analytical drawings of urban cores of major cities The Architecture and Cities of Northern Mexico systematically examines significant works of architecture in large cities and small towns in each state from the earliest buildings in the urban core to the newest at the periphery Edward R Burian describes the most memorable works of architecture in each city in greater detail in terms of their spatial organization materials and sensory experience He also includes a concise geographical and historical summary of the region that provides a useful background for the discussions of the works of architecture Burian concludes the book with a brief commentary on lessons learned and possible futures for the architectural culture of the region as well as the first comprehensive biographical listing of the architects practicing in Northern Mexico during the past two centuries

**Constructing Identity in Contemporary Architecture** Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

**Sanctuaries of Earth, Stone, and Light** Gloria Fraser Giffords,2022-08-23 Over nearly three centuries Jesuit Franciscan and Dominican missionaries built a network of churches throughout the new world of New Spain Since the early twentieth century scholars have studied the colonial architecture of southern New Spain but they have largely ignored the architecture of the north However as this book clearly demonstrates the colonial architecture of Northern New Spain an area that encompasses most of the southwestern United States and much of northern Mexico is strikingly beautiful and rich with meaning After more than two decades of research both in the field and in archives around the world Gloria Fraser Giffords has authored the definitive book on this architecture Giffords has a remarkable eye for detail and for images both grand and diminutive Because so many of the buildings she examines have been destroyed she sleuthed through historical records in several countries and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents As she examines objects as large as churches

or as small as ornamental ceramic tile she illuminates the sometimes subtle sometimes striking influences of the religious social and artistic traditions of Europe from the beginning of the Christian era through the nineteenth century of the Muslim countries ringing the Mediterranean from the seventh through the fifteenth centuries and of Northern New Spain's indigenous peoples whose art influenced the designs of occupying Europeans Sanctuaries of Earth Stone and Light is a pathbreaking book featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches *Luis Barragán: the Quiet Revolution* Federica Zanco, 2001 Luis Barragan was one of the most extraordinary figures in international architecture between the 1930s and the 1970s His work offers a unique interpretation of international modern architecture from the perspective of the Mexican landscape **Colección**

direction of the revolution is written in the capital city The author s interdisciplinary approach offers an important contribution to the study of Mexican political history and the aesthetics of modernity **Resurrecting Tenochtitlan** Delia Cosentino, Adriana Zavala, 2023-05-16 How Mexican artists and intellectuals created a new identity for modern Mexico City through its ties to Aztec Tenochtitlan Radical Functionalism Luis E. Carranza, 2021-12-27 Radical Functionalism A Social Architecture for Mexico provides a complex and nuanced understanding of the functionalist architecture developed in Mexico during the 1930s It carefully re reads the central texts and projects of its main advocates to show how their theories responded to the socially and culturally charged Mexican context These such as architects Juan Legarreta Juan O Gorman the Union of Socialist Architects and Manuel Am bilis were part of broader explorations to develop a modern national architecture intended to address the needs of the Mexican working classes Through their refunctioning of functionalism these radical thinkers showed how architecture could stand at the precipice of Mexico s impending modernization and respond to its impending changes The book examines their engagement and negotiation with foreign influences issues of gender and class and the separation between art and architecture Functionalist practices are presented as contradictory and experimental as challenging the role of architecture in the transformation of society and as intimately linked to art and local culture in the development of new forms of architecture for Mexico including the vernacularization of functionalism itself Uniquely including translations of two manifesto like texts by O Gorman expressing the polemical nature of their investigations Radical Functionalism A Social Architecture for Mexico will be a useful reference for scholars researchers and students interested in the history of architectural movements **Modern Architecture in Mexico City** Kathryn E. O'Rourke, 2017-02-10 Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s a new generation of architects created profoundly visual modern buildings intended to convey Mexico s unique cultural character By midcentury these architects and their students had rewritten the country s architectural history and transformed the capital into a metropolis where new buildings that evoked pre conquest colonial and International Style architecture coexisted Through an exploration of schools a university campus a government ministry a workers park and houses for Diego Rivera and Luis Barragan Kathryn O Rourke offers a new interpretation of modern architecture in the Mexican capital showing close links between design evolving understandings of national architectural history folk art and social reform This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession The Death of Aztec Tenochtitlan, the Life of Mexico City Barbara E. Mundy, 2018-03-22 Winner Book Prize in Latin American Studies Colonial Section of Latin American Studies Association LASA 2016 ALAA Book Award Association for Latin American Art Arvey Foundation 2016 The capital of the Aztec empire Tenochtitlan was in its era

one of the largest cities in the world Built on an island in the middle of a shallow lake its population numbered perhaps 150 000 with another 350 000 people in the urban network clustered around the lake shores In 1521 at the height of Tenochtitlan's power which extended over much of Central Mexico Hernando Cortés and his followers conquered the city Cortés boasted to King Charles V of Spain that Tenochtitlan was destroyed and razed to the ground But was it Drawing on period representations of the city in sculptures texts and maps The Death of Aztec Tenochtitlan the Life of Mexico City builds a convincing case that this global capital remained through the sixteenth century very much an Amerindian city Barbara E Mundy foregrounds the role the city's indigenous peoples the Nahuatl played in shaping Mexico City through the construction of permanent architecture and engagement in ceremonial actions She demonstrates that the Aztec ruling elites who retained power even after the conquest were instrumental in building and then rebuilding the city Mundy shows how the Nahuatl entered into mutually advantageous alliances with the Franciscans to maintain the city's sacred nodes She also focuses on the practical and symbolic role of the city's extraordinary waterworks the product of a massive ecological manipulation begun in the fifteenth century to reveal how the Nahuatl struggled to maintain control of water resources in early Mexico City

Flaherty, 2016-08-16 In 1968 Mexico prepared to host the Olympic games amid growing civil unrest The spectacular sports facilities and urban redevelopment projects built by the government in Mexico City mirrored the country s rapid but uneven modernization In the same year a street savvy democratization movement led by students emerged in the city Throughout the summer the 68 Movement staged protests underscoring a widespread sense of political disenfranchisement Just ten days before the Olympics began nearly three hundred student protestors were massacred by the military in a plaza at the core of a new public housing complex In spite of institutional denial and censorship the 1968 massacre remains a touchstone in contemporary Mexican culture thanks to the public memory work of survivors and Mexico s leftist intelligentsia In this highly original study of the afterlives of the 68 Movement George F Flaherty explores how urban spaces material but also literary photographic and cinematic became an archive of 1968 providing a framework for de facto modes of justice for years to come
