Mutter, 1988 The power and potential of current ITS technology is described here by the designers and builders of major ITS projects The book illustrates how in less than a decade the field of Intelligent Tutoring Systems has advanced from experimental systems in universities to systems that perform practical real world tasks Intelligent Tutoring Systems Lessons Learned provides a first hand detailed account of how these systems were designed and built out of state of the art technology The essays build on the basic research foundations of the field and define the abilities and limitations of current knowledge With this critical volume teachers and

industrial trainers have a realistic view of the future of their professions and students researchers and professionals in AI education cognitive science and psychology have both an introduction to the field and a comprehensive reference

*Advances in Intelligent Tutoring Systems* Roger Nkambou, Riichiro Mizoguchi, Jacqueline Bourdeau, 2010-08-27 May the Forcing Functions be with You The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for *Advances in Intelligent Tutoring Systems* This collection with contributions from leading researchers in the field of artificial intelligence in education AIED constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system ITS The book not only describes some of the approaches and techniques that have been explored to meet these challenges but also some of the systems that have actually been built and deployed in this effort As discussed in the Introduction Chapter 1 the terms AIED and ITS are often used interchangeably and there is a large overlap in the researchers devoted to exploring this common field In this foreword I will use the term AIED to refer to the search area and the term ITS to refer to the particular kind of system that AIED researchers build It has often been said that AIED is AI complete in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research AI problems

**Intelligent Tutoring Systems** D. Sleeman, J. S. Brown, 1982 The first volume to appear on this topic and now a classic in the field *Intelligent Tutoring Systems* provides the reader with descriptions of the major systems implemented before 1981 The introduction seeks to emphasise the principal contributions made in the field to outline continuing research issues and to relate these to research activities in artificial intelligence and cognitive science Subject areas discussed are as varied as arithmetic algebra electronics and medicine together with some informal gaming environments

**Artificial Intelligence and Intelligent Tutoring Systems** Danny Kopec, R. Brent Thompson, 1992 This book is divided into three parts machine learning and problem solving machine teaching and Real world applications Each of these areas is in some sense critical to the present and future credibility of AI as a discipline

**Intelligent Tutoring Systems** Stefan Trausan-Matu, Kristy Boyer, Martha Crosby, Kitty Panourgia, 2014-05-24 This book constitutes the refereed proceedings of the 12th International Conference on Intelligent Tutoring Systems ITS 2014 held in Honolulu HI USA in June 2014 The 31 revised full papers 45 short papers and 27 posters presented were carefully viewed and selected from 177 submissions The specific theme of the ITS 2014 conference is Creating fertile soil for learning interactions Besides that the highly interdisciplinary ITS conferences bring together researchers in computer science learning sciences cognitive and educational psychology sociology cognitive science artificial intelligence machine learning and linguistics The papers are organized in topical sections on affect multimodality and metacognition collaborative learning data mining and student behavior dialogue and discourse generating hints scaffolds and questions game based learning and simulation graphical representations and learning student strategies and problem solving scaling ITS and assessment

*Learning Issues for Intelligent Tutoring Systems* Heinz Mandl, Alan Lesgold, 1988-06-13 Learning Issues for Intelligent

Tutoring Systems arrays the most current and exciting research in this dynamic and growing area of cognitive science The various contributions address the design and use of instructional systems as well as the important theoretical and practical questions involved in implementing knowledge based systems This book offers complete and up to date reviews of the major research programs in computer aided instruction and intelligent tutoring systems Learning Issues for Intelligent Tutoring Systems is an important and useful introduction to this rapidly changing field

**Design Recommendations for Intelligent Tutoring Systems: Volume 11 - Professional Career Education** Anne Sinatra, Art Graesser, Xiangen Hu, Lisa Townsend, Vasile Rus, 2023-09-01 The Design Recommendations for Intelligent Tutoring Systems series has covered many different topics over the past ten years Those topics have ranged from general components of intelligent tutoring systems ITSs Learner Modeling Instructional Management Authoring Tools Domain Modeling to advanced elements Assessment Methods Team Tutoring Self Improving Systems Data Visualization Competency Based Scenario Design Our most recent previous volume included a series of Strengths Weaknesses Opportunities and Threats SWOT Analyses on all the initial topics as well as overviews of ITSs in general and the Generalized Intelligent Framework for Tutoring GIFT software Sottolare et al 2012 Sottolare et al 2017 Goldberg Sinatra 2023 Each book in the Design Recommendations for Intelligent Tutoring Systems series has been associated with an Expert Workshop on the same topic These workshops are part of a cooperative agreement W911NF18 2 0039 between US Army Combat Capabilities Development Command DEVCOM Soldier Center and University of Memphis One of the goals of the expert workshops is to learn more about ITS capabilities that are being developed and how these approaches as well as lessons learned could enhance the GIFT software GIFT is freely available at <https://www.GIFTtutoring.org> Invited experts in industry academia and government discuss the expert workshop topic their applicable work and suggestions for improving GIFT in what is usually a two day event Both the University of Memphis and GIFT Teams participate in the workshop help to guide discussion and ask questions that will provide insight into current challenges in GIFT The expert workshop associated with this current book was held virtually in October 2022 and included presentations about both general approaches and specific applications to professional education in ITSs Additionally the University of Memphis team that participated in the workshop included Arthur C Graesser Xiangen Hu Vasile Rus and Jody Cockroft The US Army DEVCOM Soldier Center team who participated in the workshop included Benjamin Goldberg Gregory Goodwin Anne M Sinatra Randall Spain and Lisa N Townsend The current volume and the expert workshop that was associated with it branched out in a new direction and rather than addressing specific components of an ITS or types of features approaches that could be included in ITSs it focused on how to apply an ITS for specific types of training The specific focus was on ITSs for Professional Career Education This topic area was selected as in general ITS research tends to be focused on K 12 or college education and in many cases on domains such as algebra or physics However for the military and for industry trainees are adult learners and domains tend to be more active applied and experiential This workshop provided an

opportunity for discussion of specific examples of applied training that occurs with ITSs as well as discussion of general approaches and considerations for applied professional education in ITSs
