Handbook of Nuclear Radiation Effects Wright Air Development Center, 1956 **Radiation Effects Design Handbook** M. L. Green, 1971 **Handbook of Environmental Degradation of Materials** Myer Kutz, 2005-06-02 Industry pays an enormous price for material degradation The Handbook of Environmental Degradation of Materials outlines these costs but more importantly explains how to measure analyze and prevent environmental degradation for a wide range of industrial materials Experts from around the world share how a diverse set of industries cope with the degradation of metals polymers reinforced concrete clothing and wood under adverse environmental conditions such as weather seawater and fire Case studies show how organizations from small consulting firms to corporate giants design and manufacture products that are more resistant to environmental effects By implementing these standards companies of all sizes should realize savings beneficial to their operations Radiation Effects Design Handbook M. Engineers, Radiation Effects Subcommittee of the IEEE Electrical Insulation Committee, 1963 CRC Handbook of Tables for Applied Engineering Science Ray E. Bolz, 1973-05-15 New tables in this edition cover lasers radiation cryogenics ultra sonics semi conductors high vacuum techniques eutectic alloys and organic and inorganic surface coating Another major addition is expansion of the sections on engineering materials and compos ites with detailed indexing by name class and usage The special Index of Properties allows ready comparisons with respect to single property whether physical chemical electrical radiant mechani cal or thermal The user of this book is assisted by a comprehensive index by cross references and by numerically keyed subject headings at the top of each page Each table is self explanatory with units abbreviations and symbols clearly defined and tabular material subdivided for easy reading **Radiation Effects Design Handbook: Transistors** ,1971 Handbook of Space-Radiation Effects on Solar-Cell Power Systems National Aeronautics and Space Administration, William C. Cooley, Robert J. Janda, 2014-01-30 In order that photovoltaic solar cells may be used more effectively to provide electrical power for spacecraft it is desirable to refine the engineering design of solar cells and power systems based on a better understanding of the space radiation environment and of radiation damage effects on semiconductor components The objective of this handbook is to provide a summary of some of the useful analytical methods and test data which can be applied in designing radiation resistant power systems It is found that the most serious obstacle which prevents accurate prediction of solar cell degradation for earth satellites is our inadequate knowledge of the fluxes and energy spectra of electrons and protons in the magnetosphere When the space environment can be better defined it will be possible to predict more accurately the degradation of present day types of silicon solar cells for which the radiation damage characteristics have been quite well determined by laboratory research As improved types of solar cells and materials become available it will be necessary to make laboratory measurements of their radiation resistance to protons and electrons in order to predict their performance in space Therefore the performance data presented herein may become obsolete However it is hoped that the methods for data correlation and analysis presented here will be an aid to understanding the nature of the problems involved and will be useful in the conduct of engineering analysis Transient Radiation Effects on Electronics (TREE) Handbook Formerly Design Handbook for TREE, Chapters 1-6 ,1995 The objectives of the Transient Radiation Effects on Electronics TREE Handbook are to 1 provide information about radiation effects on semiconductor devices and materials 2 provide guidelines for microelectronic radiation hardening technology and 3 serve as a reference for radiation hardness assurance and microelectronic radiation testing The radiation environments addressed in this handbook include those produced by nuclear weapons effects NWE and natural space The NWE environment includes x rays gamma rays and neutrons The natural space environment includes photons and electrons trapped in the Van Allen belt and neutrons heavy ions and cosmic rays found in space **Radiation Effects Handbook** Institute of Electrical and Electronics Engineers, 1963 **Radiation Effects Design Handbook** C.
