Stevis, 2005-10-31 *Palgrave Advances in International Environmental Politics* provides a state of the art review of the major theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical questions that emerge from the review

Decolonizing Nature William Mark Adams, Martin Mulligan, 2003 British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start

of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon Decolonizing Nature explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature

Gender and Energy Transition Katarzyna Iwińska, Xymena Bukowska, 2021-11-01 This volume takes an ecofeminist perspective in analysing societal changes related to energy transition with a focus on Upper Silesia in Europe following the closure of coal mining industries in the region It provides both a macro and micro view of how energy transition in societies built around an energy industry can lead to major shifts in societal and familial dynamics and how women locate themselves in this transition period affecting the economy as well as social and environmental structures and values Densely populated Upper Silesia in southern Poland with one of the longest histories of industrialization extractivism and environmental degradation in Europe can be considered as a microcosm of regions that have undergone such changes due to energy transition The traces of telling socio economic changes as well as the tangle of modernity and conservatism are both clearly visible in the local region and society The book documents the Silesian changes and highlights the female perspective their culture identities as well as empowerment and the agency The paradigm of feminist and masculinity studies helps in presenting the complexity and the challenges of the just energy transition This is a topical volume given that many regions of the world are undergoing similar changes and is an interesting read for decision makers policy experts environmentalists as well social scientists who study issues related to sustainability and environmental societal challenges in energy transition Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com
