The Beginning of Broadcast Regulation in the Twentieth Century Marvin R. Bensman,2015-11-03 The Radio Act of August 13

1912 provided for the licensing of radio operators and transmitting stations for nearly 15 years until Congress passed the Radio Act of 1927. From 1921 to 1927 there were continual revisions and developments and these still serve as the basis for current broadcast regulation. This book chronicles that crucial six year period using primary documents. The administrative structure of the Department of Commerce and the personnel involved in the regulation of broadcasting are detailed. The book is arranged chronologically in three sections: Broadcast Regulation and Policy from 1921 to 1925; Congestion and the Beginning of Regulatory Breakdown in 1924 and 1925; and Regulatory Breakdown and the Passage of the Act of 1927. There is also discussion of the Department of Commerce divisions and their involvement until they were absorbed by the Federal Communication Commission. A bibliography and an index conclude the work.

Broadcasting Journalism Jacoby Barrera, 2019-03-19 Advertising research is a systematic process of marketing research conducted to improve the efficiency of advertising. Advertising and media research explains the complexities of planning in a fast moving non complex style. As we enter the new century of transformed advertising techniques and marketing challenges Research is to find out something new and advertising research is to find out how advertising works effectively and guide in making effective advertising decisions. There are various kinds of advertising research and these include pre testing post testing campaign research and measuring advertising effectiveness. Advertising follows logically after listening to consumer requirements introducing productive conditions distributing the goods. However the actual sequence and emphasis deriving from the diverse sub cultures can be quite differentiated. The effects of the different mass media on social psychological and physical aspects. Research survey that segments the people based on what television programs they watch radio they listen and magazines they read. Media research makes use of scientific methods of research. It aims at providing an objective unbiased evaluation of data. First the research problem is identified and then a prescribed set of procedures of research is followed to investigate the problem. Only thereafter comes report of the findings. This book is more catered to readers who have no background on the media. It is more informational than instructional. It's great if you are looking into learning about how the media works per se but not if you are concerned about effectively positioning your products in the market.
