CHOICE [Assuring a Future U.S.-Based Nuclear and Radiochemistry Expertise](#) National Research Council, Policy and Global Affairs, Board on Higher Education and Workforce, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Board on Chemical Sciences and Technology, Committee on Assuring a Future U.S.-Based Nuclear Chemistry Expertise, 2012-09-16

The growing use of nuclear medicine the potential expansion of nuclear power generation and the urgent needs to protect the nation against external nuclear threats to maintain our nuclear weapons stockpile and to manage the nuclear wastes generated in past decades require a substantial highly trained and exceptionally talented workforce

Assuring a Future U S Based Nuclear and Radiochemistry Expertise examines supply and demand for expertise in nuclear chemistry nuclear science and radiochemistry in the United States and presents possible approaches for ensuring adequate availability of these skills including necessary science and technology training platforms

Considering a range of reasonable scenarios looking to the future none of these areas are likely to experience a decrease in demand for expertise

However many in the current workforce are approaching retirement age and the number of students opting for careers in nuclear and radiochemistry has decreased dramatically over the past few decades

In order to avoid a gap in these critical areas increases in student interest in these careers in the research and educational capacity of universities and colleges and sector specific on the job training will be needed

Concise recommendations are given for actions to avoid a shortage of nuclear chemistry nuclear scientists and radiochemists in the future
